English Translation of an Audit Report Originally Issued in Chinese INDEPENDENT AUDITORS' REPORT

To: The Board of Directors and Shareholders of Simula Technology Inc.

Opinion

We have audited the accompanying parent-company-only balance sheets of Simula Technology Inc. (the "Company") as of December 31, 2022 and 2021, and the related parent-company-only statements of comprehensive income, changes in equity and cash flows for the years then ended, and notes to the parent-company-only financial statements, including the summary of significant accounting policies (together referred as "the parent-company-only financial statements").

In our opinion, the parent-company-only financial statements referred to above present fairly, in all material respects, the parent-company-only financial position of the Company as of December 31, 2022 and 2021, and the parent-company-only financial performance and cash flows for the years then ended, in conformity with the requirements of the Regulations Governing the Preparation of Financial Reports by Securities Issuers.

Basis for Opinion

We conducted our audits in accordance with the Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants and the Standards on Auditing of the Republic of China. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Parent-Company-Only Financial Statements section of our report. We are independent of the Company in accordance with the Norm of Professional Ethics for Certified Public Accountant of the Republic of China (the "Norm"), and we have fulfilled our other ethical responsibilities in accordance with the Norm. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of the most significance in our audit of parent-company-only financial statements for the year ended December 31, 2022.

These matters were addressed in the context of our audit of the parent-company-only financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Revenue recognition

We determine that revenue recognition is one of the key audit matters. The Company's revenue amounting to NT\$1,122,031 thousand for the year ended December 31, 2022 is a significant account to the Company's financial statements. The Company has conducted these sale activities in multi-marketplace, including Taiwan, China, USA, etc. Furthermore, the timing of fulfilling performance obligation needs to be determined based on varieties of sale terms and conditions enacted in the main sale contracts or sale orders. Our audit procedures therefore include, but not limit to, evaluating the properness of accounting policy for revenue recognition, assessing and testing the effectiveness of relevant internal controls related to revenue recognition, sampling-test of details, including obtaining major sale orders or agreements to inspect the terms and conditions, checking the consistency of the fulfillment timing, performing analytical review procedures on monthly sale revenues, executing sale cut-off tests, etc. We have also evaluated the appropriateness of the related disclosure in Note 6 to the parent-company-only financial statements.

Market valuation on inventory (including inventories of the subsidiaries under the equity method)

We determine the market valuation on inventory including inventories of the subsidiaries under the equity method is one of the key audit matters in considering that the amount of inventory was significant and the assessment of sufficiency of inventory loss requires significant management judgement. The Company's main products, are characterized by rapid development in technology and the trend of consumers' preference. Management, in timely considering the status of new products development and the demand from clients, has to evaluate the loss due to market value decline as well as write-down on slow-moving inventories to their net realizable value. Our audit procedures therefore include, but not limit to, evaluating the Company's policy with respect to the assessment of the loss from slow-moving inventory and phased-out items, testing the accuracy of inventory aging schedule, analyzing inventory movement, performing observation on the Company's inventory physical-taking, and inspecting the current status of inventory usage, etc.

Responsibilities of Management and Those Charged with Governance for the Parent-Company-Only Financial Statements

Management is responsible for the preparation and fair presentation of the parent-company-only financial statements in accordance with the requirements of the Regulations Governing the Preparation of Financial Reports by Securities Issuers and for such internal control as management determines is necessary to enable the preparation of parent-company-only financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the parent-company-only financial statements, management is responsible for assessing the ability to continue as a going concern of the Company, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, including audit committee, are responsible for overseeing the financial reporting process of the Company.

Auditor's Responsibilities for the Audit of the Parent-Company-Only Financial Statements

Our objectives are to obtain reasonable assurance about whether the parent-company-only financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing of the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these parent-company-only financial statements.

As part of an audit in accordance with the Standards on Auditing of the Republic of China, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

1. Identify and assess the risks of material misstatement of the parent-company-only financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- 2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the internal control of the Company.
- 3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- 4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability to continue as a going concern of the Company. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- 5. Evaluate the overall presentation, structure and content of the parent-company-only financial statements, including the accompanying notes, and whether the parent-company-only financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- 6. Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Company to express an opinion on the parent-company-only financial statements. We are responsible for the direction, supervision and performance of the company audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of 2022 parent-company-only financial statements and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

/s/Chen, Kuo-Shuai

English Translation of Parent-Company-Only Financial Statements and Footnotes Originally Issued in Chinese Simula Technology Inc.

Notes to the Parent-Company-Only Financial Statements (Amounts Expressed in Thousands of New Taiwan Dollars unless Otherwise Specified)

1. HISTORY AND ORGANIZATION

Simula Technology Inc. (referred to "the Company") was established on December 15, 2003. Its main business activities include the manufacture of electronic products, the whole-sale and product designing, and international trading. The Company's common shares were publicly listed on the Taiwan Over-The-Counter Securities Exchanges on September 16, 2008. The registered business premise and main operation address is at 14F., No. 1351, Zhongzheng Rd., Taoyuan Dist., Taoyuan City, Taiwan.

2. <u>DATE AND PROCEDURE OF AUTHORIZATION FOR FINANCIAL STATEMENTS ISSUANCE</u>

The financial statements of the Company were authorized to be issued in accordance with a resolution of the Board of Directors' meeting held on February 21, 2023.

3. <u>NEWLY ISSUED OR REVISED STANDARDS AND INTERPRETATIONS</u>

(1) Changes in accounting policies resulting from applying for the first time certain standards and amendments

The Company applied for the first time International Financial Reporting Standards, International Accounting Standards, and Interpretations issued, revised or amended which are recognized by Financial Supervisory Commission ("FSC") and become effective for annual periods beginning on or after January 1, 2022. The adoption of these new standards and amendments had no material impact on the Company.

(2) Standards or interpretations issued, revised or amended, by International Accounting Standards Board ("IASB") which are endorsed by FSC, but not yet adopted by the Company as at the end of the reporting period are listed below.

		Effective Date
Items	New, Revised or Amended Standards and Interpretations	issued by IASB
a	Disclosure Initiative – Accounting Policies – Amendments to	January 1, 2023
	IAS 1	
b	Definition of Accounting Estimates – Amendments to IAS 8	January 1, 2023
c	Deferred Tax related to Assets and Liabilities arising from a	January 1, 2023
	Single Transaction – Amendments to IAS 12	

(A) Disclosure Initiative – Accounting Policies – Amendments to IAS 1

The amendments improve accounting policy disclosures that to provide more useful information to investors and other primary users of the financial statements.

(B) Definition of Accounting Estimates – Amendments to IAS 8

The amendments introduce the definition of accounting estimates and included other amendments to IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors to help companies distinguish changes in accounting estimates from changes in accounting policies.

(C) Deferred Tax related to Assets and Liabilities arising from a Single Transaction – Amendments to IAS 12

The amendments narrow the scope of the recognition exemption in paragraphs 15 and 24 of IAS 12 so that it no longer applies to transactions that, on initial recognition, give rise to equal taxable and deductible temporary differences.

The abovementioned standards and interpretations were issued by IASB and endorsed by FSC so that they are applicable for annual period beginning on or after January 1, 2023. The Company assesses all standards and interpretations have no material impact on the Company.

(3) Standards or interpretations issued, revised or amended, by IASB which are not endorsed by FSC, and not yet adopted by the Company as at the end of the reporting period are listed below.

		Effective Date
Items	New, Revised or Amended Standards and Interpretations	issued by IASB
a	IFRS 10 "Consolidated Financial Statements" and IAS 28	To be determined
	"Investments in Associates and Joint Ventures" - Sale or	by IASB
	Contribution of Assets between an Investor and its Associate	
	or Joint Ventures	
b	IFRS 17 "Insurance Contracts"	January 1, 2023
c	Classification of Liabilities as Current or Non-current -	January 1, 2024
	Amendments to IAS 1	
d	Lease Liability in a Sale and Leaseback - Amendments to	January 1, 2024
	IFRS 16	
e	Non-current Liabilities with Covenants - Amendments to	January 1, 2024
	IAS 1	

(A) IFRS 10 "Consolidated Financial Statements" and IAS 28 "Investments in Associates and Joint Ventures" – Sale or Contribution of Assets between an Investor and its Associate or Joint Ventures

The amendments address the inconsistency between the requirements in IFRS 10 Consolidated Financial Statements and IAS 28 Investments in Associates and Joint Ventures, in dealing with the loss of control of a subsidiary that is contributed to an associate or a joint venture. IAS 28 restricts gains and losses arising from contributions of non-monetary assets to an associate or a joint venture to the extent of the interest attributable to the other equity holders in the associate or joint ventures. IFRS 10 requires full profit or loss recognition on the loss of control of the subsidiary. IAS 28 was amended so that the gain or loss resulting from the sale or contribution of assets that constitute a business as defined in IFRS 3 between an investor and its associate or joint venture is recognized in full.

IFRS 10 was also amended so that the gains or loss resulting from the sale or contribution of a subsidiary that does not constitute a business as defined in IFRS 3 between an investor and its associate or joint venture is recognized only to the extent of the unrelated investors' interests in the associate or joint venture.

(B) IFRS 17 "Insurance Contracts"

IFRS 17 provides a comprehensive model for insurance contracts, covering all relevant accounting aspects (including recognition, measurement, presentation and disclosure requirements). The core of IFRS 17 is the General (building block) Model, under this model, on initial recognition, an entity shall measure a group of insurance contracts at the total of the fulfilment cash flows and the contractual service margin. The carrying amount of a group of insurance contracts at the end of each reporting period shall be the sum of the liability for remaining coverage and the liability for incurred claims.

Other than the General Model, the standard also provides a specific adaptation for contracts with direct participation features (the Variable Fee Approach) and a simplified approach (Premium Allocation Approach) mainly for short-duration contracts.

IFRS 17 was issued in May 2017 and it was amended in 2020 and 2021. The amendments include deferral of the date of initial application of IFRS 17 by two years to annual beginning on or after January 1, 2023 (from the original effective date of January 1, 2021); provide additional transition reliefs; simplify some requirements to reduce the costs of applying IFRS 17 and revise some requirements to make the results easier to explain. IFRS 17 replaces an interim Standard – IFRS 4 Insurance Contracts – from annual reporting periods beginning on or after January 1, 2023.

(C) Classification of Liabilities as Current or Non-current – Amendments to IAS 1

These are the amendments to paragraphs 69-76 of IAS 1 Presentation of Financial statements and the amended paragraphs related to the classification of liabilities as current or non-current.

(D) Lease Liability in a Sale and Leaseback – Amendments to IFRS 16

The amendments add seller-lessees additional requirements for the sale and leaseback transactions in IFRS 16, thereby supporting the consistent application of the standard.

(E) Non-current Liabilities with Covenants – Amendments to IAS 1

The amendments improved the information companies provide about long-term debt with covenants. The amendments specify that covenants to be complied within twelve months after the reporting period do not affect the classification of debt as current or non-current at the end of the reporting period.

The abovementioned standards and interpretations issued by IASB have not yet endorsed by FSC at the date when the Company's financial statements were authorized for issue, the local effective dates are to be determined by FSC. The Company assesses all standards and interpretations have no material impact on the Company.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(1) Statement of compliance

The parent-company-only financial statements of the Company for the years ended December 31, 2022 and 2021 were prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers ("the Regulations").

(2) Basis of preparation

The Company prepared parent-company-only financial statements in accordance with Article 21 of the Regulations, which provided that the profit or loss and other comprehensive income for the period presented in the parent-company-only financial statements shall be the same as the profit or loss and other comprehensive income attributable to stockholders of the parent presented in the consolidated financial statements for the period, and the total equity presented in the parent-company-only financial statements shall be the same as the equity attributable to the parent company presented in the consolidated financial statements. Therefore, the Company accounted for its investments in subsidiaries using equity method and, accordingly, made necessary adjustments.

The parent-company-only financial statements have been prepared on a historical cost basis, except for financial instruments that have been measured at fair value. The parent-company-only financial statements are expressed in thousands of New Taiwan Dollars ("NT\$") unless otherwise stated.

(3) Foreign currency transactions

The Company's parent-company-only financial statements are presented in its functional currency, New Taiwan Dollars (NTD). Items included in the parent-company-only financial statements are measured using that functional currency.

Transactions in foreign currencies are initially recorded by the Company at functional currency rates prevailing at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency closing rate of exchange ruling at the reporting date. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. Non-monetary items that are measured at historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions.

All exchange differences arising on the settlement of monetary items or on translating monetary items are taken to profit or loss in the period in which they arise except for the following.

- (a) Exchange differences arising from foreign currency borrowings for an acquisition of a qualifying asset to the extent that they are regarded as an adjustment to interest costs are included in the borrowing costs that are eligible for capitalization.
- (b) Foreign currency items within the scope of IFRS 9 Financial Instruments are accounted for based on the accounting policy for financial instrument.
- (c) Exchange differences arising on a monetary item that forms part of a reporting entity's net investment in a foreign operation is recognized initially in other comprehensive income and reclassified from equity to profit or loss on disposal of the net investment.

When a gain or loss on a non-monetary item is recognized in other comprehensive income, any exchange component of that gain or loss is recognized in other comprehensive income. When a gain or loss on a non-monetary item is recognized in profit or loss, any exchange component of that gain or loss is recognized in profit or loss.

(4) Translation of financial statements in foreign currency

The assets and liabilities of foreign operations are translated into NTD at the closing rate of exchange prevailing at the reporting date and the income and expenses are translated at an average exchange rate for the period. The exchange differences arising on the translation are recognized in other comprehensive income. On disposal of a foreign operation, the cumulative amount of the exchange differences relating to that foreign operation, recognized in other comprehensive income and accumulated in the separate component of equity, is reclassified from equity to profit or loss when the gain or loss on disposal is recognized. The following are accounted for as disposals even if an interest in the foreign operation is retained by the Company: the loss of control over a foreign operation, the loss of significant influence over a foreign operation, or the loss of joint control over a foreign operation.

On partial disposal of a subsidiary that includes a foreign operation that does not result in a loss of control, the proportionate share of the cumulative amount of the exchange differences recognized in other comprehensive income is re-attributed to the non-controlling interests in that foreign operation. In partial disposal of an associate or jointly controlled entity that includes a foreign operation that does not result in a loss of significant influence or joint control, only the proportionate share of the cumulative amount of the exchange differences recognized in other comprehensive income is reclassified to profit or loss.

Any goodwill and any fair value adjustments to the carrying amounts of assets and liabilities arising on the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and expressed in its functional currency.

(5) Current and non-current distinction

An asset is classified as current when:

- (a) The Company expects to realize the asset, or intends to sell or consume it, in its normal operating cycle.
- (b) The Company holds the asset primarily for the purpose of trading.
- (c) The Company expects to realize the asset within twelve months after the reporting period.
- (d) The asset is cash or cash equivalent unless the asset is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is classified as current when:

- (a) The Company expects to settle the liability in its normal operating cycle.
- (b) The Company holds the liability primarily for the purpose of trading.
- (c) The liability is due to be settled within twelve months after the reporting period.
- (d) The Company does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting period. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

All other liabilities are classified as non-current.

(6) Cash and cash equivalents

Cash and cash equivalents comprises cash on hand, demand deposits and short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value (include fixed-term deposits that have matures of 3 months from the date of acquisition).

(7) Financial instruments

Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the instrument.

The Company determines the classification of its financial assets at initial recognition. In accordance with IFRS 9 and the Regulations, financial assets of the Company are classified as financial assets at fair value through profit or loss, financial assets at fair value through other comprehensive income, financial assets measured at amortized cost and notes, accounts and other receivables. All financial assets are recognized initially at fair value plus, in the case of investments not at fair value through profit or loss, directly attributable costs. Financial assets carried at fair value through profit or loss are initially recognized at fair value, and transaction costs are expensed in the income statement.

(A) Financial assets: Recognition and Measurement

Purchase or sale of financial assets is recognized using trade date accounting.

The Company classified financial assets as subsequently measured at amortized cost, fair value through other comprehensive income or fair value through profit or loss on the basis of both:

- (a) The Company's business model for managing the financial assets and
- (b) The contractual cash flow characteristics of the financial asset.

Financial assets measured at amortized cost

A financial asset is measured at amortized cost if both of the following conditions are met and presented as note receivables, trade receivables financial assets measured at amortized cost and other receivables etc., on balance sheet as at the reporting date:

- (a) The financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and
- (b) The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Such financial assets are subsequently measured at amortized cost (the amount at which the financial asset is measured at initial recognition minus the principal repayments, plus or minus the cumulative amortization using the effective interest method of any difference between the initial amount and the maturity amount and adjusted for any loss allowance) and is not part of a hedging relationship. A gain or loss is recognized in profit or loss when the financial asset is derecognized, through the amortization process or in order to recognize the impairment gains or losses.

Interest revenue is calculated by using the effective interest method. This is calculated by applying the effective interest rate to the gross carrying amount of a financial asset except for:

- (a) Purchased or originated credit-impaired financial assets. For those financial assets, the Company applies the credit-adjusted effective interest rate to the amortized cost of the financial asset from initial recognition.
- (b) Financial assets that are not purchased or originated credit-impaired financial assets but subsequently have become credit-impaired financial assets. For those financial assets, the Company applies the effective interest rate to the amortized cost of the financial asset in subsequent reporting periods.

Financial asset measured at fair value through other comprehensive income

A financial asset is measured at fair value through other comprehensive income if both of the following conditions are met:

- (a) The financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and
- (b)The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Recognition of gain or loss on a financial asset measured at fair value through other comprehensive income are described as below:

- (a) A gain or loss on a financial asset measured at fair value through other comprehensive income recognized in other comprehensive income, except for impairment gains or losses and foreign exchange gains and losses, until the financial asset is derecognized or reclassified.
- (b) When the financial asset is derecognized the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss as a reclassification adjustment.

- (c)Interest revenue is calculated by using the effective interest method. This is calculated by applying the effective interest rate to the gross carrying amount of a financial asset except for:
 - (i) Purchased or originated credit-impaired financial assets. For those financial assets, the Company applies the credit-adjusted effective interest rate to the amortized cost of the financial asset from initial recognition.
 - (ii) Financial assets that are not purchased or originated credit-impaired financial assets but subsequently have become credit-impaired financial assets. For those financial assets, the Company applies the effective interest rate to the amortized cost of the financial asset in subsequent reporting periods.

Besides, at initial recognition, the Company make an irrevocable election to present in other comprehensive income subsequent changes in the fair value of an investment in an equity instrument within the scope of IFRS 9 that is neither held for trading nor contingent consideration recognized by an acquirer in a business combination to which IFRS 3 applies. Amounts presented in other comprehensive income are not be subsequently transferred to profit or loss (when disposal of such equity instrument, its cumulated amount included in other components of equity is transferred directly to the retained earnings) and should recorded as financial assets measured at fair value through other comprehensive income on balance sheet. Dividends on such investment are recognized in profit or loss unless the dividends clearly represents a recovery of part of the cost of investment.

Financial asset measured at fair value through profit or loss

Financial assets were measured at amortized cost or measured at fair value through other comprehensive income only if they met particular conditions. All other financial assets were measured at fair value through profit or loss and presented on the balance sheet as financial assets measured at fair value through profit or loss and trade receivable.

Such financial assets are measured at fair value, the gains or losses resulting from remeasurement is recognized in profit or loss which includes any dividend or interest received on such financial assets.

(B) Impairment of financial assets

The Company is recognized a loss allowance for expected credit losses on debt instrument investments measured at fair value through other comprehensive income and financial asset measured at amortized cost. The loss allowance on debt instrument investments measured at fair value through other comprehensive income is recognized in other comprehensive income and not reduce the carrying amount in the statement of financial position.

The Company measures expected credit losses of a financial instrument in a way that reflects:

- (a)An unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- (b) The time value of money; and
- (c)Reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

The loss allowance is measures as follows:

- (a)At an amount equal to 12-month expected credit losses: the credit risk on a financial asset has not increased significantly since initial recognition or the financial asset is determined to have low credit risk at the reporting date. In addition, the Company measures the loss allowance for a financial asset at an amount equal to lifetime expected credit losses in the previous reporting period but determines at the current reporting date that condition is no longer met.
- (b)At an amount equal to the lifetime expected credit losses: the credit risk on a financial asset has increased significantly since initial recognition or financial asset that is purchased or originated credit-impaired financial asset.
- (c) For trade receivables or contract assets arising from transactions within the scope of IFRS 15, the Company measures the loss allowance at an amount equal to lifetime expected credit losses.

(d)For lease receivables arising from transactions within the scope of IFRS 16, the Company measures the loss allowance at an amount equal to lifetime expected credit losses.

At each reporting date, the Company needs to assess whether the credit risk on a financial asset has been increased significantly since initial recognition by comparing the risk of a default occurring at the reporting date and the risk of default occurring at initial recognition. Please refer to Note 12 for further details on credit risk.

(C) Derecognition of financial assets

A financial asset is derecognized when:

- (a) The rights to receive cash flows from the asset have expired
- (b) The Company has transferred the asset and substantially all the risks and rewards of the asset have been transferred
- (c) The Company has neither transferred nor retained substantially all the risks and rewards of the asset but has transferred control of the asset.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the consideration received or receivable including any cumulative gain or loss that had been recognized in other comprehensive income, is recognized in profit or loss.

(D) Financial liabilities and equity

Classification between liabilities or equity

The Company classifies the instrument issued as a financial liability or an equity instrument in accordance with the substance of the contractual arrangement and the definitions of a financial liability, and an equity instrument.

Notes to Parent-Company-Only Financial Statements (Continued)

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. The transaction costs of an equity transaction are accounted for as a deduction from equity (net of any related income tax benefit) to the extent they are incremental costs directly attributable to the equity transaction that otherwise would have been avoided.

Financial liabilities

Financial liabilities within the scope of IFRS 9 Financial Instruments are classified as financial liabilities at fair value through profit or loss or financial liabilities measured at amortized cost upon initial recognition.

Financial liabilities at amortized cost

Financial liabilities measured at amortized cost include interest bearing loans and borrowings that are subsequently measured using the effective interest rate method after initial recognition. Gains and losses are recognized in profit or loss when the liabilities are derecognized as well as through the effective interest rate method amortization process.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or transaction costs.

Derecognition of financial liabilities

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified (whether or not attributable to the financial difficulty of the debtor), such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss.

(E) Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the balance sheet if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously.

(8) Derivative instrument

The Company uses derivative instruments to hedge its foreign currency risks and interest rate risks. A derivative is classified in the balance sheet as financial assets or liabilities at fair value through profit or loss except for derivatives that are designated as and effective hedging instruments which are classified as financial assets or liabilities for hedging.

Derivative instruments are initially recognized at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative. The changes in fair value of derivatives are taken directly to profit or loss, except for the effective portion of hedges, which is recognized in either profit or loss or equity according to types of hedges used.

When the host contracts are either non-financial assets or liabilities, derivatives embedded in host contracts are accounted for as separate derivatives and recorded at fair value if their economic characteristics and risks are not closely related to those of the host contracts and the host contracts are not designated at fair value though profit or loss.

(9) Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- (a) In the principal market for the asset or liability, or
- (b)In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible to by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

(10) Inventories

Inventories are valued at lower of cost or net realizable value item by item.

Costs incurred in bringing each inventory to its present location and condition are accounted for as follows.

Raw materials - At actual purchase cost, using weighted average method Finished goods and work in progress - Including cost of direct materials and labor and a proportion of manufacturing overheads based on normal operating capacity, using weighted average method.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

Rending of service is accounted in accordance with IFRS 15 but not within the scoping of inventories.

(11) Investments accounted for using the equity method

The Company accounted for its investments in subsidiaries using equity method and made necessary adjustments in accordance with Article 21 of the Regulations. Such adjustments were made after the Company considered the different accounting treatments to account for its investments in subsidiaries in the consolidated financial statements under IFRS 10 "Consolidated Financial Statements" and the different IFRSs adopted from different reporting entity's perspectives, and the Company recorded such adjustments by crediting or debiting to investments accounted for under the equity method, share of profit or loss of subsidiaries, associates and joint ventures and share of other comprehensive income of subsidiaries, associates and joint ventures.

The Company's investment in its associate is accounted for using the equity method other than those that meet the criteria to be classified as held for sale. An associate is an entity over which the Company has significant influence. A joint venture is a type of joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint venture.

Under the equity method, the investment in the associate or investment in a joint venture is carried in the balance sheet at cost and adjusted thereafter for the post-acquisition change in the Company's share of net assets of the associate or joint venture. After the interest in the associate or joint venture is reduced to zero, additional losses are provided for, and a liability is recognized, only to the extent that the Company has incurred legal or constructive obligations or made payments on behalf of the associate or joint venture. Unrealized gains and losses resulting from transactions between the Company and the associate or joint venture are eliminated to the extent of the Company's related interest in the associate or joint venture.

When changes in the net assets of an associate or a joint venture occur and not those that are recognized in profit or loss or other comprehensive income and do not affects the Company's percentage of ownership interests in the associate or joint venture, the Company recognizes such changes in equity based on its percentage of ownership interests. The resulting capital surplus recognized will be reclassified to profit or loss at the time of disposing the associate or joint venture on a pro rata basis.

When the associate or joint venture issues new stock, and the Company's interest in an associate or a joint venture is reduced or increased as the Company fails to acquire shares newly issued in the associate or joint venture proportionately to its original ownership interest, the increase or decrease in the interest in the associate or joint venture is recognized in Additional Paid in Capital and Investment accounted for using the equity method. When the interest in the associate or joint venture is reduced, the cumulative amounts previously recognized in other comprehensive income are reclassified to profit or loss or other appropriate items. The aforementioned capital surplus recognized is reclassified to profit or loss on a pro rata basis when the Company disposes the associate or joint venture.

The financial statements of the associate or joint venture are prepared for the same reporting period as the Company. Where necessary, adjustments are made to bring the accounting policies in line with those of the Company.

The Company determines at each reporting date whether there is any objective evidence that the investment in the associate or an investment in a joint venture is impaired in accordance with IAS 28 Investments in Associates and Joint Ventures. If this is the case the Company calculates the amount of impairment as the difference between the recoverable amount of the associate or joint venture and its carrying value and recognizes the amount in the 'share of profit or loss of an associate' in the statement of comprehensive income in accordance with IAS 36 Impairment of Assets. In determining the value in use of the investment, the Company estimates:

- (a) Its share of the present value of the estimated future cash flows expected to be generated by the associate or joint venture, including the cash flows from the operations of the associate and the proceeds on the ultimate disposal of the investment; or
- (b) The present value of the estimated future cash flows expected to arise from dividends to be received from the investment and from its ultimate disposal.

Because goodwill that forms part of the carrying amount of an investment in an associate or an investment in a joint venture is not separately recognized, it is not tested for impairment separately by applying the requirements for impairment testing goodwill in IAS 36 Impairment of Assets.

Upon loss of significant influence over the associate or joint venture, the Company measures and recognizes any retaining investment at its fair value. Any difference between the carrying amount of the associate or joint venture upon loss of significant influence and the fair value of the retaining investment and proceeds from disposal is recognized in profit or loss. Furthermore, if an investment in an associate becomes an investment in a joint venture or an investment in a joint venture becomes an investment in an associate, the entity continues to apply the equity method and does not remeasure the retained interest.

(12) Property, plant and equipment

Property, plant and equipment are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of dismantling and removing the item and restoring the site on which it is located and borrowing costs for construction in progress if the recognition criteria are met. Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately. When significant parts of property, plant and equipment are required to be replaced in intervals, the Company recognized such parts as individual assets with specific useful lives and depreciation, respectively. The carrying amount of those parts that are replaced is derecognized in accordance with the derecognition provisions of IAS 16 "Property, plant and equipment". When a major inspection is performed, its cost is recognized in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognized in profit or loss as incurred.

Depreciation is calculated on a straight-line basis over the estimated economic lives of the following assets:

Buildings 48 to 50 years

Machinery 4 to 7 years

Office equipment 3 to 5 years

Transportation 5 years

Other equipment 2 to 6 years

Leasehold improvements The shorter of lease terms or economic useful lives

An item of property, plant and equipment or any significant part initially recognized is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset is recognized in profit or loss.

The property, plant and equipment's residual values, useful lives and methods of depreciation are reviewed at each financial year. If the expected values differ from the estimates, the differences are recorded as a change in accounting estimate.

(13)Leases

The Company assesses whether the contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset for a period of time, the Company assesses whether, throughout the period of use, has both of the following:

- (a) the right to obtain substantially all of the economic benefits from use of the identified asset; and
- (b) the right to direct the use of the identified asset.

For a contract that is, or contains, a lease, the Company accounts for each lease component within the contract as a lease separately from non-lease components of the contract. For a contract that contains a lease component and one or more additional lease or non-lease components, the Company allocates the consideration in the contract to each lease component on the basis of the relative stand-alone price of the lease component and the aggregate stand-alone price of the non-lease components. The relative stand-alone price of lease and non-lease components shall be determined on the basis of the price the lessor, or a similar supplier, would charge the Company for that component, or a similar component, separately. If an observable stand-alone price is not readily available, the Company estimates the stand-alone price, maximising the use of observable information.

Company as a lessee

Except for leases that meet and elect short-term leases or leases of low-value assets, the Company recognizes right-of-use asset and lease liability for all leases which the Company is the lessee of those lease contracts.

At the commencement date, the Company measures the lease liability at the present value of the lease payments that are not paid at that date. The lease payments discount using the interest rate implicit in the lease if that rate can be readily determined. If that rate cannot be readily determined, the Company uses it's incremental borrowing rate. At the commencement date, the lease payments included in the measurement of the lease liability comprise the following payments for the right to use the underlying asset during the lease term that are not paid at the commencement date:

- (a) fixed payments (including in-substance fixed payments), less any lease incentives receivable;
- (b) variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- (c) amounts expected to be payable by the lessee under residual value guarantees;
- (d) the exercise price of a purchase option if the Company is reasonably certain to exercise that option; and
- (e) payments of penalties for terminating the lease, if the lease term reflects the lessee exercising an option to terminate the lease.

After the commencement date, the Company measures the lease liability on an amortised cost basis, which is increasing the carrying amount to reflect interest on the lease liability by using an effective interest method; and reducing the carrying amount to reflect the lease payments made.

At the commencement date, the Company measures the right-of-use asset at cost. The cost of the right-of-use asset comprises:

- (a) the amount of the initial measurement of the lease liability;
- (b) any lease payments made at or before the commencement date, less any lease incentives received;
- (c) any initial direct costs incurred by the lessee; and
- (d) an estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease.

For subsequent measurement of the right-of-use asset, the Company measures the right-of-use asset at cost less any accumulated depreciation and any accumulated impairment losses. That is, the Company measures the right-of-use applying a cost model.

If the lease transfers ownership of the underlying asset to the Company by the end of the lease term or if the cost of the right-of-use asset reflects that the Company will exercise a purchase option, the Company depreciates the right-of-use asset from the commencement date to the end of the useful life of the underlying asset. Otherwise, the Company depreciates the right-of-use asset from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term.

The Company applies IAS 36 "Impairment of Assets" to determine whether the right-of-use asset is impaired and to account for any impairment loss identified.

Except for leases that meet and elect short-term leases or leases of low-value assets, the Company presents right-of-use assets and lease liabilities in the balance sheet and separately presents lease-related interest expense and depreciation charge in the statement comprehensive income.

For short-term leases or leases of low-value assets, the Company elects to recognize the lease payments associated with those leases as an expense on either a straight-line basis over the lease term or another systematic basis.

Company as a lessor

At inception of a contract, the Company classifies each of its leases as either an operating lease or a finance lease. A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership of an underlying asset. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership of an underlying asset. At the commencement date, the Company recognizes assets held under a finance lease in its balance sheet and present them as a receivable at an amount equal to the net investment in the lease.

For a contract that contains lease components and non-lease components, the Company allocates the consideration in the contract applying IFRS 15.

The Company recognizes lease payments from operating leases as rental income on either a straight-line basis or another systematic basis. Variable lease payments for operating leases that do not depend on an index or a rate are recognized as rental income when incurred.

(14) Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is its fair value as at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses, if any. Internally generated intangible assets, not meeting the recognition criteria, are not capitalized and expenditure is reflected in profit or loss for the year in which the expenditure is incurred.

The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired.

The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least at the end of each financial year. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are accounted for by changing the amortization period or method, as appropriate, and are treated as changes in accounting estimates.

Intangible assets with indefinite useful lives are not amortized, but are tested for impairment annually, either individually or at the cash-generating unit (CGU) level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis.

Gains or losses arising from derecognition of an intangible asset are recognized in profit or loss.

The Company's accounting policies for intangible assets are as follows:

	Patents	Cost of Computer Software
Useful economic life	5 years	3 to 5 years
Amortization method	Straight-line method during	Straight-line method during
	the period of the patent	the contract term
Internally generated or acquired	Acquired externally	Acquired externally
externally		

(15) Impairment of non-financial assets

The Company assesses at the end of each reporting period whether there is any indication that an asset in the scope of IAS 36 "Impairment of Assets" may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Company would conduct impairment tests at individual or CGU level. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired. An asset's recoverable amount is the higher of an asset's net fair value or its value in use.

For assets excluding goodwill, an assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the Company estimates the recoverable amount of the asset or CGU. A previously recognized impairment loss is reversed only if there has been an increase in the estimated service potential of an asset which in turn increases the recoverable amount. However, the reversal is limited so that the carrying amount of the asset does not exceed the carrying amount that would have been determined, net of depreciation or amortization, had no impairment loss been recognized for the asset in prior years.

Impairment loss or reversals of continuing operations are recognized in profit or loss.

(16) Revenue recognition

The Company's revenue arising from contracts with customers mainly includes sale of goods. The accounting policies for the Company's types of revenue are explained as follow:

Sale of goods

The Company mainly manufactures and sells of its products. Sales are recognized when control of the goods is transferred to the customer and the goods are delivered to the customers. The main product of the Company is substrate and revenue is recognized based on the consideration stated in the contract. The remaining sales transactions are usually accompanied by volume discounts (based on the accumulated total sales amount for a specified period). Therefore, revenue from these sales is recognized based on the price specified in the contract, net of the estimated volume discounts. Accumulated experience is used to estimate and provide for the discounts, using the expected value method. Revenue is only recognized to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognized will not occur when the uncertainty associated with the variable consideration is subsequently resolved. During the period specified in the contract, refund liability is recognized for the products expected to be returned.

The credit period of the Company's sale of goods is from 30 to 120 days. For most of the contracts, when the Company transfers the goods to customers and has a right to an amount of consideration that is unconditional, these contracts are recognized as trade receivables. The period between the time when the Company transfers the goods to customers and when the customers pay for that goods is usually short and have no significant financing component to the contract. In the case that the Company has the right to transfer the goods to customers but does not has a right to an amount of consideration that is unconditional, these contacts should be presented as contract assets. Besides, in accordance with IFRS 9, the Company measures the loss allowance for a contract asset at an amount equal to the lifetime expected credit losses.

(17)Post-employment benefits

All regular employees of the Company are entitled to a pension plan that is managed by an independently administered pension fund committee. Fund assets are deposited under the committee's name in the specific bank account and hence, not associated with the Company. Therefore, fund assets are not included in the Company's parent-company-only financial statements. Pension benefits for employees of the overseas subsidiaries and the branches are provided in accordance with the respective local regulations.

For the defined contribution plan, the Company will make a monthly contribution of no less than 6% of the monthly wages of the employees subject to the plan. The Company recognizes expenses for the defined contribution plan in the period in which the contribution becomes due. Overseas subsidiaries and branches make contribution to the plan based on the requirements of local regulations and the contribution is expensed as incurred.

Post-employment benefit plan that is classified as a defined benefit plan uses the Projected Unit Credit Method to measure its obligations and costs based on actuarial assumptions. Remeasurements, comprising of the effect of the actuarial gains and losses, the effect of the asset ceiling (excluding net interest) and the return on plan assets, excluding net interest, are recognized as other comprehensive income with a corresponding debit or credit to retained earnings in the period in which they occur. Past service costs are recognized in profit or loss on the earlier of:

- (a) the date of the plan amendment or curtailment, and
- (b) the date that the Company recognizes restructuring-related costs

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset, both as determined at the start of the annual reporting period, taking account of any changes in the net defined benefit liability (asset) during the period as a result of contribution and benefit payment.

(18) Income tax

Income tax expense (benefit) is the aggregate amount included in the determination of profit or loss for the period in respect of current tax and deferred tax.

Current income tax

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities, using the tax rates and tax laws that have been enacted or substantively enacted by the end of the reporting period. Current income tax relating to items recognized in other comprehensive income or directly in equity is recognized in other comprehensive income or equity and not in profit or loss.

The income tax for undistributed earnings of the Company is recognized as income tax expense in the subsequent year when the distribution proposal is approved by the Shareholders' meeting.

Deferred income tax

Deferred income tax is a temporary difference between the tax bases of assets and liabilities and their carrying amounts in balance sheet at the reporting date.

Deferred tax liabilities are recognized for all taxable temporary differences, except:

- (a) Where the deferred tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit (loss);
- (b) In respect of taxable temporary differences associated with investments in subsidiaries, and associates and interests in joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognized for all deductible temporary differences, any unused tax losses and carry forward of unused tax credits to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilized, except:

- (a) Where the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; or
- (b) In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will be reversed in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted at the reporting date. The measurement of deferred tax assets and liabilities reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities. Deferred tax relating to items recognized outside profit or loss is recognized outside profit or loss. Deferred tax items are recognized in correlation to the underlying transaction either in other comprehensive income or directly in equity. Deferred tax assets are reassessed and recognized at each reporting date.

Deferred tax assets and liabilities are offset, if a legally enforceable right exists to set off current income tax assets against current income tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

5. SIGNIFICANT ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of the Company's financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. However, uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

(1) Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date that would have a significant risk for a material adjustment to the carrying amounts of assets and liabilities within the next fiscal year are discussed below.

(a) Fair value of financial instruments

Where the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be derived from active markets, they are determined using valuation techniques including income approach (for example, the discounted cash flows model) or the market approach. Changes in assumptions about these factors could affect the reported fair value of the financial instruments. Please refer to Note 12 for more details.

(b) Post-employment benefits

The cost of post-employment benefit pension plan and the present value of the defined benefit obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions, including the change in the discount rate and expected salary level. The assumptions used for measuring pension cost and defined benefit obligation are disclosed in Note 6(13).

(c) Income tax

Uncertainties exist with respect to the interpretation of complex tax regulations and the amount and timing of future taxable income. Given the wide range of international business relationships and the long-term nature and complexity of existing contractual agreements, differences arising between the actual results and the assumptions made, or future changes to such assumptions, could necessitate future adjustments to tax income and expense already recorded. The Company establishes provisions, based on reasonable estimates, for possible consequences of audits by the tax authorities of the respective counties in which it operates. The amount of such provisions is based on various factors, such as experience of previous tax audits and differing interpretations of tax regulations by the taxable entity and the responsible tax authority. Such differences of interpretation may arise on a wide variety of issues depending on the conditions prevailing in the respective company's domicile.

Deferred tax assets are recognized for all carryforward of unused tax losses and unused tax credits and deductible temporary differences to the extent that it is probable that taxable profit will be available or there are sufficient taxable temporary differences against which the unused tax losses, unused tax credits or deductible temporary differences can be utilized. The amount of deferred tax assets determined to be recognized is based upon the likely timing and the level of future taxable profits and taxable temporary differences together with future tax planning strategies.

(d) Accounts receivables – estimation of impairment loss

The Company estimates the impairment loss of accounts receivables at an amount equal to lifetime expected credit losses. The credit loss is the present value of the difference between the contractual cash flows that are due under the contract (carrying amount) and the cash flows that expects to receive (evaluate forward looking information). However, as the impact from the discounting of short-term receivables is not material, the credit loss is measured by the undiscounted cash flows. Where the actual future cash flows are lower than expected, a material impairment loss may arise. Please refer to Note 6(16) for more details.

(e) Inventory

Estimates of net realizable value of inventories take into consideration that inventories may be damaged, become wholly or partially obsolete, or their selling prices have declined. The estimates are based on the most reliable evidence available at the time the estimates are made. Please refer to Note 6(4) for more details.

6. CONTENTS OF SIGNIFICANT ACCOUNTS

A. Investments in subsidiaries

Investments in subsidiaries were present in the parent-company-only financial statements under the caption of investments accounted for under equity method. Valuation adjustment is made if deemed necessary.

On April 12, 2021, the Company acquired 23,775,571 shares from the original shareholders of Action Star Technology Co., Ltd. with NT\$844,033 thousand in cash, and participated in the cash capital increase of Action Star Technology Co., Ltd., subscribed for 8,225,000 shares for NT\$139,825 thousand, obtained a total of 32,000,571 shares, with a shareholding ratio of 59.35%, and obtained more than half of the directors' seats, thereby gaining control of the company, and began to merge into the merged entity after the controlling date.

B. Investments in associates:

The Company's investments in Mcurich Inc. was not individually material. The aggregate carrying amount of the Company's interests in Mcurich Inc. was NT\$ 0 and NT \$947 thousand as of December 31, 2022 and 2021 respectively. The aggregate financial information based on the Company's share of other companies was as follows:

Taiwan Business Bank	\$190,000	Variable interest	Effective July 5, 2021 to July 5, 2026.
Credit loan		rate +0.41%	Repayable quarterly NT\$10,000 thousand.
Less: current portion	(40,000)		
Total	\$150,000		

Long-term loans were not pledged.

(13) Post-employment benefits

Defined contribution plan

The Company adopted a defined contribution plan in accordance with the Labor Pension Act of the R.O.C. Under the Labor Pension Act, the Company will make monthly contributions of no less than 6% of the employees' monthly wages to the employees' individual pension accounts. The Company has made monthly contributions of 6% of each individual employee's salaries or wages to employees' pension accounts.

Expenses under the defined contribution plan for the years ended December 31, 2022 and 2021 are NT\$4,092 thousand and NT\$4,126 thousand, respectively.

Defined benefits plan

The Company adopts a defined benefit plan in accordance with the Labor Standards Act of the R.O.C. The pension benefits are disbursed based on the units of service years and the average salaries in the last month of the service year. Two units per year are awarded for the first 15 years of services while one unit per year is awarded after the completion of the 15th year. The total units shall not exceed 45 units. Under the Labor Standards Act, the Company contributes an amount equivalent to 2% of the employees' total salaries and wages on a monthly basis to the pension fund deposited at the Bank of Taiwan in the name of the administered pension fund committee.

The Ministry of Labor is in charge of establishing and implementing the fund utilization plan in accordance with the Regulations for Revenues, Expenditures, Safeguard and Utilization of the Labor Retirement Fund. The pension fund is invested in-house or under mandate, based on a passive-aggressive investment strategy for long-term profitability. The Ministry of Labor establishes checks and risk management mechanism based on the assessment of risk factors including market risk, credit risk and liquidity risk, in order to maintain adequate manager flexibility to achieve targeted return without over-exposure of risk. With regard to utilization of the pension fund, the minimum earnings in the annual distributions on the final financial statement shall not be less than the earnings attainable from the amounts accrued from two-year time deposits with the interest rates offered by local banks. Treasury Funds can be used to cover the deficits after the approval of the competent authority. As the Company does not participate in the operation and management of the pension fund, no disclosure on the fair value of the plan assets categorized in different classes could be made in accordance with paragraph 142 of IAS 19. The Group expects to contribute NT\$141 thousand to its defined benefit plan during the 12 months beginning after December 31, 2022.

As of December 31, 2022 and 2021, the maturities of the Company's defined benefit plan are in 2031 and 2030.

Pension costs recognized in profit or loss are as follows:

	For the year ended December 31,		
	2022	2021	
Current service costs	\$102	\$99	
Net interest of defined benefit liability (asset)	66	32	
Total	\$168	\$131	

Reconciliation of liability (asset) of the defined benefit plan is as follows:

	As of December 31,	
	2022	2021
Defined benefit obligation	\$8,989	\$17,996
Plan assets at fair value	(6,051)	(7,976)
Other non-current liabilities – net defined		
benefit liability	\$2,938	\$10,020

Reconciliation of liability (asset) of the defined benefit liability is as follows:

	Present value		
	of defined		Net defined
	benefit	Fair value of	benefit
	obligation	plan assets	liability(asset)
1/1/2021	\$17,156	\$(7,685)	\$9,471
Current service cost	99	-	99

Total	683	(110)	573
Benefits paid	-	-	-
Contributions by employer	-	(155)	(155)
12/31/2021	17,996	(7,976)	10,020
Current service cost	102	-	102
Interest cost	117	(51)	66
Total	219	(51)	168
Re-measurement on defined benefit liability/assets:			
Actuarial gain/loss due to change in financial assumptions	(721)	-	(721)
Experience gain/loss	(5,763)	-	(5,763)
Re-measurement on defined benefit assets		(612)	(612)
Total	(6,484)	(612)	(7,096)
Benefits paid	(2,742)	2,742	-
Contributions by employer		(154)	(154)
12/31/2022	\$8,989	\$ (6,051)	\$2,938

The actuarial assumptions used for the Company's defined benefit plan are shown below.

	As of December 31,	
	2022	2021
Discount rate	1.35%	0.67%
Expected rate of salary increases	2.00%	2.00%

Sensitivity analysis

	For the year ended December 31,			
	2022		20	021
	Increase Decrease		Increase	Decrease in
	in defined	in defined	in defined	defined
	benefit benefit		benefit	benefit
	obligation	obligation	obligation	obligation
Discount rate increased by 0.25%	\$-	\$(260)	\$-	\$(414)
Discount rate decreased by 0.25%	270	-	432	-
Expected salary level increased by 0.5%	539	-	846	-
Expected salary level decreased by 0.5%	-	(503)	-	(792)

For the purpose of sensitivity analysis above, the Company calculated the impact on defined benefit obligation due to a reasonable and feasible change of one single assumption (i.e. discount rate or expected salary level) with other assumptions remaining equal. Please note that the sensitivity analysis has its limitation due to the co-relation between different actuarial assumptions and the rarity that only one assumption changes at a time.

The method used in the analysis is consistent for both current and prior years.

(14) Equity

A. Common stock

As of December 31, 2022 and 2021, the Company's authorized capital were NT\$1,200,000 thousand, the Company's paid-in capital were NT\$799,729 thousand, each share at par value of NT\$10, respectively, divided into 79,972,945 shares, respectively.

B. Capital surplus

	As of December 31,	
	2022	2021
Additional paid-in capital	\$545,978	\$545,978
All changes in interests in subsidiaries	1,172	1,172
Changes in equity of investment accounted for using equity method	1,350	1,350
Other	3,218	3,218
Total	\$551,718	\$551,718

According to Taiwan Company Act, the capital surplus shall not be used except for making good the deficit of the Company. When a company incurs no loss, it may distribute the capital surplus related to the income derived from the issuance of new shares at a premium or income from endowments received by the company up to a certain percentage of paid-in capital. The said capital surplus could be distributed in cash to its shareholders in proportion to the number of shares being held by each of them. Capital surplus related to long-term equity investments cannot be used for any purpose.

On August 18, 2021, the board of directors resolved at their meeting to appropriate the 2020 earnings by distributing the cash dividends NT\$19,993 thousand from capital surplus of NT\$565,971 thousand on the basis of the shareholdings of each shareholder as set out in the register of shareholders on the basis date of the allotment.

C. Appropriation of earnings and dividend policies

(a) Legal reserve

According to the Company Act, legal reserve shall be set aside until such amount equal total authorized capital. Legal reserve can be used to offset deficits. If the Company does not incur any loss, the portion of legal reserve exceeding 25% of the paid-in capital may be distributed to shareholders by issuing new shares or by cash in proportion to the number of shares held by each shareholder.

(b)Special reserve

The FSC issued Order No. Financial-Supervisory-Securities-Corporate-1090150022 on March 31, 2021, which sets out the following provisions for compliance:

On a public company's first-time adoption of the IFRS, for any unrealized revaluation gains and cumulative translation adjustments (gains) recorded to shareholders' equity that the company elects to transfer to retained earnings by application of the exemption under IFRS 1, the company shall set aside special reserve. For any subsequent use, disposal or reclassification of related assets, the company can reverse the special reserve by proportion and transfer to retained earnings.

As of December 31, 2022 and 2021, the Company first-time adoption of T-IFRS NT\$26,375 thousand, respectively.

(c) Earning distribution and dividend policies

(1)Earning distribution

According to the Company's Articles of Incorporations, current year's earnings, if any, shall be distributed in the following order:

- a. Payment of all taxes and dues;
- b. Offsetting prior years' operation losses;
- c. Set aside 10% of the remaining amount after deducting items (a) and (b) as legal reserve;
- d. Set aside or reverse special reserve in accordance with law and regulations; and
- e. The distribution of the remaining portion, if any, will be recommended by the Board of Directors and resolved in the shareholders' meeting.

(2)Dividend policies

The policy of dividend distribution should reflect factors such as the current and future investment environment, fund requirements, financial structures and earnings etc. If there is a surplus in the final annual accounts and the distributable surplus for the current year reaches 2% of the capital, the dividend distribution should not be less than 10% of the distributable surplus for the year. The distribution of surplus may be made in accordance with the company's overall capital budget planning. Accordingly, at least 10% of the dividends must be paid in the form of cash.

The Company may issue new shares or cash in accordance to the Company's Articles of Incorporations 241 in the form of statutory surplus reserve or capital reserve, and if the preceding paragraph is done in cash, it should authorize the board of directors to resolve and report to the shareholders' meeting.

The appropriations of earnings for the years 2022 were approved through the Board of Directors' meetings and held on February 21, 2023. The details of the distributions are as follows:

Appropriation of earnings	Dividend per share
2022	2022
\$24,547	
(1,050)	
199,932	\$2.5
\$223,429	
	2022 \$24,547 (1,050) 199,932

The appropriations of earnings for the years 2021 were approved through the shareholders' meetings held on June 10, 2022. The details of the distributions are as follows:

_	Appropriation of earnings	Dividend per share
_	2021	2021
Legal reserve	\$11,064	
Special reserve	1,050	
Cash dividend(Note)	79,973	\$1
Total	\$92,087	

According to the Company's Articles of Incorporations, The appropriations of Cash dividend for the years 2021 were approved through the Board of Directors' meeting held on February 25, 2022.

Please refer to Note 6(18) for details on employees' compensation and remuneration to directors and supervisors.

(15) Sales

	For the year ended December 31,	
	2022	2021
Revenue from customer contracts		
Sales of goods	\$1,122,031	\$1,305,242

Analysis of revenue from contracts with customers during the year ended December 31, 2022 and 2021 are as follows:

A. Disaggregation of revenue

	For the year ended December 31,	
	2022	2021
Sales of goods	\$1,122,031	\$1,305,242
The timing for revenue recognition:		
At a point in time	\$1,122,031	\$1,305,242

B. Contract balances

(a) Contract liabilities – current

	As of	
	12/31/2022	12/31/2021
Sales of goods	\$2,139	\$10,071

Notes to Parent-Company-Only Financial Statements (Continued)

The significant changes in the Company's balances of contract liabilities for the year periods ended December 31, 2022 and 2021 are as follows:

	2022	2021	_
The opening balance transferred to revenue	\$(8,646)	\$(10,381)	
Increase in receipts in advance during the period	714	9,988	
(excluding the amount incurred and transferred to			
revenue during the period)			

C. Assets recognized from costs to fulfil a contract

None.

(16) Expected credit losses (gains)

	For the year ended December 31,	
	2022	2021
Operating expenses – Expected credit losses / (gains)		
Accounts receivable	\$-	\$200

Please refer to Note 12 for more details on credit risk.

The Company measures the loss allowance of its contract assets and accounts receivable (including notes receivable and accounts receivable) at an amount equal to lifetime expected credit losses. The assessment of the Company's loss allowance as of December 31, 2022 and 2021 are as follows:

The Company considers the grouping of accounts receivable by counter-parties' credit rating, by geographical region and by industry sector and its loss allowance is measured by using a provision matrix. Details are as follows:

December 31, 2022	Not past due			Past due			
	(Note)	<=30 days	31-90 days	91-120 days	121-270 days	>=271 days	Total

Carrying amount of							
accounts receivable	\$319,350	\$5,820	\$372	\$-	\$-	\$-	\$325,542

The movement in the provision for impairment of notes receivable, and accounts receivable during the years ended December 31, 2022 and 2021 are as follows:

	Accounts receivable
Beginning balance as of January 1, 2022	\$538
Addition/(reversal) for the current period	-
Transfer to other receivable	(200)
Write off	
Ending balance as of December 31, 2022	\$338
Beginning balance as of January 1, 2021	\$338
Addition/(reversal) for the current period	200
Transfer to other receivable	-
Write off	
Ending balance as of December 31, 2021	\$538

(17) Leases

Company as a lessee

The Company leases various properties, including real estate such as buildings and transportation equipment. The lease terms range from 3 to 10 years.

The Company's leases effect on the financial position, financial performance and cash flows are as follows:

A. Amounts recognized in the balance sheet

a. Right-of-use assets

	As of December 31,	
	2022	2021
Buildings	\$216	\$4,933
Transportation equipment		240
Total	\$216	\$5,173

b. Lease liabilities

	As of December 31,	
	2022	2021
Lease liabilities (include related	\$227	\$5,364
party)		
Current	\$227	\$5,019
Non-current	\$-	\$345

Please refer to Note 6 (19)(3) for the interest on lease liabilities recognized during the year ended December 31, 2022 and 2021 and refer to Note 12 (5) Liquidity Risk Management for the maturity analysis for lease liabilities as at December 31, 2022 and 2021.

B. Amounts recognized in the income statement

Right-of-use assets

	For the year ended December 31,		
	2022	2021	
Buildings	\$3,669	\$6,164	
Transportation equipment	159	960	
Total	\$3,828	\$7,124	

C. Income and costs relating to leasing activities

_	For the year ended December 31,		
_	2022	2021	
The expenses relating to short-term leases	\$143	\$246	
The expenses relating to leases of low-	464	209	
value assets-non-current			

The portfolio of short-term leases of the Company to which it is committed at the end of the reporting period is dissimilar to the portfolio of short-term leases to which the short-term lease expenses disclosed above, and the amount of its lease commitments is NT\$0.

D. Cash outflow relating to leasing activities

During the year ended December 31, 2022 and 2021, the Company's total cash outflow for leases amounting to NT\$4,618 thousand and NT\$7,924 thousand, respectively.

(18) Summary statement of employee benefits, depreciation and amortization by function is as follows:

Function		2022			2021	
	Cost of	Operating		Cost of	Operating	
Nature	goods sold	expense	Total	goods sold	expense	Total
Employee benefit						
Salaries & wages	\$-	\$ 75,425	\$ 75,425	\$-	\$ 81,287	\$ 81,287
Labor and health insurance	-	7,191	7,191	-	7,647	7,647
Pension	-	4,260	4,260	-	4,257	4,257
Directors' remuneration	-	6,438	6,438	-	5,763	5,763
Other employee benefit	-	33,210	33,210	_	28,556	28,556
Depreciation	5,300	9,785	15,085	_	19,542	19,542
Amortization	-	1,172	1,172	_	1,010	1,010

Note 1: The headcounts of the Company amounted to 77 and 86, respectively, as of December 31, 2022 and 2021. Among the Company's directors, there were 6 and 6 who were not the employees, respectively.

Note 2 : Companies who have been listed on Taiwan Stock Exchange or Taiwan Over – The Counter Securities Exchange should disclose the following information:

- (1) Average employee benefits of 2022 and 2021 are NT\$1,599 thousand and NT\$1,573 thousand, respectively.
- (2) Average salaries of 2022 and 2021 are NT\$1,005 thousand and NT\$1,050 thousand, respectively.
- (3) Change in average salaries are (4.33)%.
- (4) In accordance with the regulations, the Company has established an audit committee to replace the supervisor, so the supervisor's remuneration has not been recognized.

(5) The salary and remuneration policy of the Company:

Board of Directors and managers' salaries are referred to the industry standards, and the bonuses are allocated according to their performance, risk taking and level of contribution, etc. Employees' salaries are based on their academic background, professional knowledge, years of experience, and their KPI. Employees' annual salaries are also adjusted based on Company's condition to motivate and retain outstanding employees.

Note 3 : According to the resolution, not lower than 5% of profit of the current year is distributable as employees' compensation and no higher than 3% of profit of the current year is distributable as remuneration to directors and supervisors. However, the Company's accumulated losses shall have been covered. The aforementioned employees' compensation will be distributed in shares or cash. The employees who fulfill specific requirements may be granted such compensation.

The Company's shareholders meeting held on August 18, 2021 resolved an amendment on the ration of employees' compensation. According to the resolution, 5%~20% of profit of the current year is distributable as employees' compensation and no higher than 1% of profit of the current year is distributable as remuneration to directors and supervisors. However, the Company's accumulated losses shall have been covered. The Company may, by a resolution adopted by a majority vote at a meeting of Board of Directors attended by two-thirds of the total number of directors, have the profit distributable as employees' compensation in the form of shares or in cash; and in addition thereto a report of such distribution is submitted to the shareholders' meeting. Information on the Board of Directors' resolution regarding the employees' compensation and remuneration to directors and supervisors can be obtained from the "Market Observation Post System" on the website of the TWSE.

The Company estimated the amounts of the employees' compensation and remuneration to directors and supervisors for the year ended December 31, 2022 and 2021 to be not lower than 6% and not higher than 0.75% of profit of the current period, respectively, recognized as employee benefits expense. As such, employees' compensation and remuneration to directors and supervisors for the year ended December 31, 2022 amounted to NT\$17,253 thousand and NT\$2,157 thousand, respectively, and, for the year ended December 31, 2021 amounted to NT\$8,609 thousand and NT\$1,076 thousand, respectively. The employees' compensation and remuneration to directors and supervisors were recognized as salaries.

The board of directors of the company resolved to pay the employees' compensation and remuneration to directors and supervisors amount NT\$8,609 thousand and NT\$1,076 thousand respectively on February 25, 2022.

The board of directors of the company resolved to pay the employees' compensation and remuneration to directors and supervisors amount NT\$17,253 thousand and NT\$2,157 thousand respectively on February 21, 2023.

Deferred tax liabilities

A. Unrecognized deferred tax assets

As of December 31, 2022 and 2021, deferred tax assets that have not been recognized as they may not be used to offset future taxable income amounted to NT\$40,052 thousand and NT\$37,782 thousand, respectively.

B. The assessment of income tax return

As of December 31, 2022, the tax assessments on the Company's tax filings have been approved up to the year of 2020.

(22) Earnings per share

Basic earnings per share is calculated by dividing net profit for the year attributable to the common shareholders of the parent entity by the weighted average number of common shares outstanding during the year.

A. Basic earnings per share

	For the year ended December 31,	
	2022	2021
Net income available to common shareholders		
of the parent	\$249,235	\$111,216
Weighted average number of common shares		
outstanding (in thousand shares)	79,973	79,973
Basic earnings per share (in NT\$)	\$3.12	\$1.39

B. Diluted earnings per share

	For the year ended December 31,	
	2022	2021
Net income available to common shareholders		
of the parent	\$249,235	\$111,216
Net income available to common shareholders		
of the parent after dilution	\$249,235	\$111,216
-		
Weighted average number of common shares		
outstanding (in thousand shares)	79,973	79,973
Effect of dilution:		
Employee bonus (compensation) – stock (in		
thousand shares)	560	236
Weighted average number of common shares		
outstanding after dilution (in thousand		
shares)	80,533	80,209
Diluted earnings per share (in NT\$)	\$3.09	\$1.39

No other transactions that would significantly change the outstanding common shares or potential common shares incurred during the period after reporting date and up to the approval date of financial statements.

Long-term loans (including current portion with	150,000	190,000
maturity less than 1 year)		
Lease liabilities	227	5,364
Total	\$309,806	\$533,102

(2) Objectives and policies of financial risk management

The Company's principal financial risk management objective is to manage the market risk, credit risk and liquidity risk related to its operating activates. The Company identifies, measures, and manages the aforementioned risks based on its policy and risk preferences.

The Company has established appropriate policies, procedures and internal controls for financial risk management. Before entering into significant transactions, due approval process by the Board of Directors and Audit Committee must be carried out based on related protocols and internal control procedures. The Company complies with its financial risk management policies at all times.

(3) Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of the changes in market prices. Market risk comprises currency risk, interest rate risk and other price risk (e.g. equity instruments).

In practice, it is rarely the case that a single risk variable will change independently from other risk variables. There are usually interdependencies between risk variables. However, the sensitivity analysis disclosed below does not take into account the interdependencies between risk variables.

Foreign currency risk

The Company's exposure to foreign currency risk relates primarily to the Company's operating activities (when revenue or expense are denominated in a different currency from the Company's functional currency) and the Company's net investments in foreign operations.

The Company has certain foreign currency receivables denominated in the same foreign currency as certain foreign currency payables, therefore natural hedge is achieved. Thus, hedge accounting is not adopted.

The foreign currency sensitivity analysis of the possible change in foreign exchange rates on the Company's profit/loss and equity is performed on significant monetary items denominated in foreign currencies as of the reporting period-end. The Company's foreign currency risk is mainly related to volatility in the exchange rates of US dollars. It is stated as follows:

If NT dollars appreciates/depreciates against US dollars by 1%, the net income (loss) for the years ended December 31, 2022 and 2021 would decrease/increase by NT\$1,726 thousand and NT\$2,213 thousand, respectively.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to interest rate risk relates primarily to the Company's investments with variable interest rates and loans with fixed and variable interest rates, which are all categorized as loans and receivables.

The interest rate sensitivity analysis is performed on items exposed to interest rate risk as of the end of the reporting period and presumed to be held for one accounting year, including investments and loans with variable interest rates. If interest rate increases/decreases by 0.1%, the net income (loss) for the years ended December 31, 2022 and 2021 would decrease/increase by NT\$95 thousand and NT\$54 thousand, respectively.

Equity price risk

The fair value of the Company's listed and unlisted equity securities and conversion rights of the Euro-convertible bonds issued are susceptible to market price risk arising from uncertainties about future values of the investment securities. The Company's listed and unlisted equity securities are classified under financial assets measured at fair value through profit or loss and financial assets measured at fair value through other comprehensive income, while conversion rights of the Euro-convertible bonds issued are classified as financial liabilities at fair value through profit or loss as it does not satisfy the definition of an equity component. The Company manages the equity price risk through diversification and placing limits on individual and total equity instruments. Reports on the equity portfolio are submitted to the Company's senior management on a regular basis. The Company's Board of Directors reviews and approves all equity investment decisions.

Please refer to Note 12(9) for sensitivity analysis information of other equity instruments or derivatives that are linked to such equity instruments whose fair value measurement is categorized under Level 1.

(4) Credit risk management

Credit risk is the risk that counterparty will not meet its obligations under a contract and result in a financial loss. The Company is exposed to credit risk from operating activities (primarily for accounts and notes receivable) and financing activities (primarily for bank deposits and other financial instruments).

Customer credit risk is managed by each business unit subject to the Company's established policy, procedures and control relating to customer credit risk management. Credit risk of all customers are assessed based on a comprehensive review of the customers' financial status, credit ratings from credit institutions, past transactions, current economic conditions and the Company's internal credit ratings. The Company also employs some credit enhancement instruments (e.g. prepayment or insurance) to reduce certain customers' credit risk.

As of December 31, 2022 and 2021, receivables from the top ten customers were accounted for 77.63% and 83.95% of the Company's total accounts receivable, respectively. The concentration of credit risk is relatively not significant for the remaining receivables.

Credit risk from balances with banks, fixed-income securities and other financial instruments is managed by the Company's finance division in accordance with the Company's policy. The counterparties that the Company transacts with are determined by internal control procedures. They are banks with fine credit ratings and financial institutions, corporate and government agencies with investment-grade credit ratings. Thus, there is no significant default risk. Consequently, there is no significant credit risk for these counter parties.

(5) Liquidity risk management

The Company maintains financial flexibility through the use of cash and cash equivalents, highly-liquid marketable securities, bank loans, etc. The table below summarizes the maturity profile of the Company's financial liabilities based on the contractual undiscounted payments and contractual maturity. The payment amount includes the contractual interest. The undiscounted interest payment relating to borrowings with variable interest rates is extrapolated based on the estimated yield curve as of the end of the reporting period.

Non-derivative financial instruments

				More than	
	Less than 1 year	1 to 2 years	2 to 3 years	3 years	Total

As of December 31, 2021	\$106,880	\$-	\$190,000	\$5,364	\$302,244

(7) Fair values of financial instruments

A. The evaluation methods and assumptions applied in determining the fair value

Fair value is the price that would be received to sell a financial asset or paid to transfer a financial liability in an orderly transaction between willing market participants (not under coercion or liquidation). The following methods and assumptions are used by the Company in estimating the fair values of financial assets and liabilities:

- (a) The carrying amount of cash and cash equivalents, receivables, payables and other current liabilities approximate their fair value due to their short maturity terms.
- (b) Fair value of equity instruments without market quotations (including private placement of listed equity securities, unquoted public company and private company equity securities) are estimated using the market method valuation techniques based on parameters such as prices based on market transactions of equity instruments of identical or comparable entities and other relevant information (for example, inputs such as discount for lack of marketability, P/E ratio of similar entities and Price-Book ratio of similar entities).
- (c) Fair value of debt instruments without market quotations, bank loans, bonds payable and other non-current liabilities are determined based on the counterparty prices or valuation method. The valuation method uses DCF method as a basis, and the assumptions such as the interest rate and discount rate are primarily based on relevant information of similar instrument (such as yield curves published by the Taiwan Over-The-Counter Securities Exchanges, average prices for Fixed Rate Commercial Paper published by Reuters and credit risk, etc.)

B. Fair value of financial instruments measured at amortized cost

The carrying amount of the Company's financial assets and liabilities measure at amortized cost approximates their fair value.

C. Fair value measurement hierarchy for financial instruments

Please refer to Note 12(9) for Fair value measurement hierarchy for financial instruments of the Company.

(8) Derivative financial instruments

The Company's derivative financial instruments include forward currency contracts and embedded derivatives. The related information for derivative financial instruments not qualified for hedge accounting and not yet settled as at December 31 2022 and 2021 is as follows:

Forward currency contracts

The Company entered into forward currency contracts to manage its exposure to financial risk, but these contracts are not designated as hedging instruments. The table below lists the information related to forward currency contracts:

Items (by contract)	Notional Amount	Contract Period
As of December 31 2022		
Forward currency contract	Sell foreign currency USD 5,025	2022.09.29 ~ 2023.03.31
As of December 31 2021		
Forward currency contract	Sell foreign currency USD 6,900	2021.10.26 ~ 2022.04.15

(9) Fair value measurement hierarchy

A. Fair value measurement hierarchy

All asset and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, based on the lowest level input that is significant to the fair value measurement as a whole. Level 1, 2 and 3 inputs are described as follows:

- Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities that the entity can access at the measurement date
- Level 2 Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly
- Level 3 Unobservable inputs for the asset or liability

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Company determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorization at the end of each reporting period.

B. Fair value measurement hierarchy of the Company's assets and liabilities

The Company does not have assets that are measured at fair value on a non-recurring basis. Fair value measurement hierarchy of the Company's assets and liabilities measured at fair value on a recurring basis is as follows.

As of December 31, 2022

	Level 1	Level 2	Level 3	Total
Financial assets:				
Financial assets at fair value through				
profit or loss				
Forward currency contract	\$-	\$2,361	\$-	\$2,361
Financial assets at fair value through				
other comprehensive income	\$-	\$-	\$3,858	\$3,858
Financial liabilities:				
Financial liabilities at fair value				
through profit or loss				
Forward currency contract	\$-	\$102	\$-	\$102

As of December 31, 2021

	Level 1	Level 2	Level 3	Total
Financial assets:				
Financial assets at fair value through				
profit or loss				
Forward currency contract	\$-	\$512	\$-	\$512
Financial assets at fair value through				
other comprehensive income	\$-	\$-	\$4,880	\$4,880
Financial liabilities:				
Financial liabilities at fair value				
through profit or loss				
Forward currency contract	\$-	\$28	\$-	\$28

Transfers between Level 1 and Level 2 during the period

For the year ended December 31, 2022 and 2021, there were no transfers between Level 1 and Level 2 fair value hierarchy.

Reconciliation for fair value measurements in Level 3 of the fair value hierarchy for movements during the period is as follows:

	Assets
	At fair value through other
	comprehensive income
Beginning balances as of January 1, 2022	\$4,880
Amount recognized in gains/losses (report on	(1,022)
other comprehensive income)	
Ending balances as of December 31, 2022	\$3,858
	·

<u>Information on significant unobservable inputs to valuation</u>

Description of significant unobservable inputs to valuation of recurring fair value measurements categorized within Level 3 of the fair value hierarchy are as below:
