I. Letter to Shareholders

SIMULA TECHNOLOGY INC. 2023 Operation Report

Although the COVID-19 global pandemic has ended this year and the global economy is gradually stabilizing, even returning to pre-pandemic levels, our country also lifted all epidemic prevention measures and border controls at the beginning of 2023. However, due to the previous impact of the pandemic, companies were concerned about supply chain disruptions and thus placed large orders to increase inventory, creating artificial demand. After the pandemic, market demand gradually returned to normal levels, leading to a situation where supply exceeded demand. This resulted in a significant increase in company inventories, slow inventory reduction, and severe delays or cancellations of outstanding orders. The entire industrial supply and demand chain was greatly affected, and our company was also impacted. Overall order intake was poor, with both annual shipment volume and shipment value in 2023 declining compared to 2022. The consolidated sales amount and losses for the year also showed a decline compared to the previous year.

1. Report on operating results for the year 2023

1) Results of Business Plan Implementation

The global economy has gradually recovered following the end of the pandemic. However, due to issues with inventory clearance within the industry, the Company's consolidated revenue for 2023 was NTD 2,039,055 thousand, a significant decrease of NTD 2,191,969 thousand compared to the consolidated revenue of NTD 4,231,024 thousand in 2022, marking a decline of 52%. The net loss after tax was NTD 101,050 thousand, a decrease of NTD 462,367 thousand compared to the net profit after tax of NTD 361,317 thousand in 2022. The earnings per share (EPS) for 2023 was a loss of NTD 1.04.

2) Analysis of Financial Income and Expenditure and Profitability

Please refer to the attached financial statements for the Company's financial results for 2023.

3) R&D Development

In 2023, the company invested NTD 78,987 thousand in research and development, a decrease of NTD 25,925 thousand compared to the NTD 104,912 thousand invested in 2022. This reduction was primarily due to the slowdown in market demand. However, the Company has continued to drive R&D efforts, focusing on the development of high-frequency connectors, cables, connectors and cables for automotive, medical, and industrial products, Docking Stations for 3C products, and lights for police (military) vehicles. At the same time, the Company has continuously enhanced the quality of the existing R&D team and expanded the team as needed to meet future products development demands.

2. Summary of Business Plan for 2024

1) Business Policy

Under the basic policy of customer-oriented and design-oriented, the company is committed to developing niche products, mastering key technologies, developing new technologies and applications, enhancing the added value of products and the integrity and competitive advantages of product lines, satisfying customer needs, and continuously generating maximum profits.

2) Sales Quantity and Its Basis Expectation

Based on product market development trends, customer business growth, and considering the revenue performance in 2023, along with the operational targets for 2024, the company anticipates a positive development. The COVID-19 pandemic, which disrupted global economic activities for several years, is now under effective control and no longer hinders global economic activities. With the global economy recovering and industrial development and demand returning to pre-pandemic levels, we expect a positive impact on our company. Overall order and sales volumes are expected to gradually stabilize. It is estimated that the consolidated sales volume and amount for 2024 will be approximately the same as in 2023.

3) Significant Production and Marketing Policies

In addition to strengthening our existing industries, the Company will continue to aggressively target high value-added sectors such as automotive, medical, and industrial industries. The Company will leverage the expertise in front-end design-in and the integration advantages within the parent group to jointly pursue customer opportunities. Simultaneously, the Company will actively develop 3C docking stations and lights for police (military) vehicles through thorough collaboration with upstream and downstream partners, the group, and related subsidiaries, aiming to boost revenue and profitability.

3. The External Competitive Environment, the Regulatory Environment, and the Overall Business Environment will Affect the Company's Future Development Strategy.

To respond to the fast-changing products market and the trend of short product life cycles, the Company maintains a close and proactive partnership with our customers. The Company continues to provide stable production and supply of existing products while actively participating in the joint development of new products to capture new business opportunities in the industry. This approach aims to ensure sustained and stable growth in our operations. Additionally, in facing regulatory changes, the Company will comply with relevant regulations and appropriately adjust the internal operational mechanisms to adapt to these changes as needed.

Looking ahead, the Company will continue to work with its existing customers to develop new products further. It will continue to innovate its product development and design strengths and effectively utilize its current production capacity to reduce production costs and increase profitability to achieve its proposed operating plans and goals.

The Company would like to thank the shareholders for their support and guidance in the past, and ask for the continued support and guidance.

Thank you!

Chairman: Huang, Han-Chou

President: Hu, Jo-Yao

Chief Accountant: Huang, Tuo-wen

II. Company Profile

I. Date of Incorporation: December 15, 2003

II. Company History:

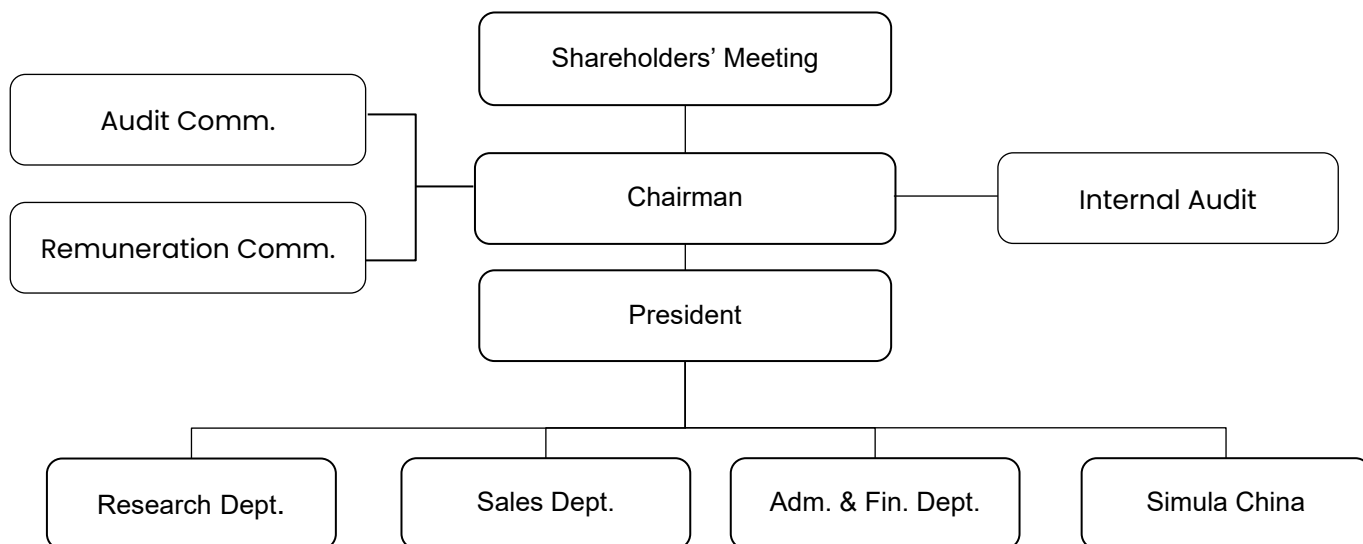

Month/Year	Milestones
December 2003	Obtained the certificate of incorporation issued by the Ministry of Economic Affairs and established a capital of NT\$55,000,000.
January, 2004	Received ISO: 9001 2000 certification.

2.The Board of Director Diversity and Independence.

(1) Diversity of the Board

The "Corporate Governance Principles" formulated by the Company clearly stipulates the diversity policy of the board of directors and the overall configuration of the Board of Directors. The nomination and selection of Board Members comply with articles of incorporation that the Company adopts the candidate nomination system. Aside from evaluating each candidate's qualifications including education and experience, the Company also refers to stakeholders' opinions as well as comply with "Rules for Director and Supervisor Elections" and "Corporate Governance Principles" in order to ensure the diversity and independency of Board Members.

According to the company's "Corporate Governance Principles", the composition of Board Members shall be determined by taking diversity into consideration and formulating an appropriate approach on diversity based on the company's business operations, operating dynamics, and development needs. It is advisable that the policy include, without being limited to, the following two general standards:

A. Basic requirements and values: Age, identity, etc.

B. Professional knowledge and skills: Professional background, professional skills, industry experience.

The company's current board of directors is composed of 7 directors, including 3 independent directors. The members have rich experience and expertise in the fields of finance, business and management. Seven directors are aged 52-61, and one female director, with a ratio of 14.29 %. The status of implementing diversification of the company's Board Members in 2023 is as follows:

Job Title	Name	Gender	Diverse Industry and Professional Skills							Term of Office of Independent Directors
			Business Management	Technology Industry	Venture Capital Investment	Sustainable Development	Finance and Accounting	Information Technology	Academic Research	
Chairman	Huang, Han-Chou	Male	V	V		V	V	V		
Director	Hu, Jo-Yao	Male	V	V	V	V				
Director	Cheng, Yin-Shiang	Male	V	V		V				
Director	Lin, Yu-Chin	Male	V	V		V	V			
Independent Director	Yeh, Hui-Hsin	Female			V					3 terms or less
Independent Director	Tan, Tang-O	Male	V	V						3 terms or less
Independent Director	Chen, Jin-ji	Male							V	3 terms or less

(2) Independence of the Board

The company currently has a total of 7 directors, including 3 independent directors (accounting for 42.86% of the directors), and the number of independent directors exceeds one-third. By the end of 2023, all independent directors meet the regulations of the Securities and Futures Bureau of the Financial Supervisory Commission for independent directors, and there is no relationship between the directors of a spouse or within the second degree of kinship. Therefore, there is no requirement of Article 26-3 of the Securities and Exchange Act. and the matter of item 4. In conclusion, the Board of Directors of the Company is independent.

 7. Legal compliance.
 - (2) 2023 operations: Proposals of the Audit Committee meetings have all been reviewed or approved by members of the Audit Committee with no dissent from any of the Independent Directors.

(III) Corporate Governance – Implementation Status and Deviations from the Corporate Governance Best-Practice Principles for TWSE/TPEX Listed Companies and the Reasons

Evaluation Item	Implementation Status (Note 1)		Summary Description	Deviations from the Corporate Governance Best Practice Principles for TWSE/TPEX Listed Companies and the Reasons
	Yes	No		
1. Has the Company established and disclosed its Corporate Governance Best-Practice Principles based on the Corporate Governance Best-Practice Principles for TWSE/TPEX Listed Companies?	V		The Company has established "Corporate Governance Principles" and announced on the company website.	None.
2. Shareholding Structure and Shareholders' Rights				
(1) Does the Company have Internal Operation Procedures for handling shareholders' suggestions, concerns, disputes and litigation matters. If yes, have these procedures been implemented accordingly?	V		(1) In order to ensure the rights and interests of shareholders, the company has established a spokesperson system and has a special person in the general management office to handle shareholders' suggestions, doubts or disputes. However, the relationship between the company and shareholders is harmonious and no disputes have occurred.	(1) None.
(2) Does the Company know the identity of its major shareholders and the parties with ultimate control of the major shareholders?	V		(2) In accordance with Article 25 of the Securities and Exchange Law, the company reports changes in equity held by insiders, including directors, managers, and shareholders with more than 10% of the shares, at the public information observation station designated by the Securities and Futures Bureau on a monthly basis; and According to the list of shareholders provided by the stock agency company, master the list of major shareholders.	(2) None.
(3) Has the Company built and implemented a risk management system and a firewall between the Company and its affiliates?	V		(3) The company has formulated the "Regulations for Transactions of Related Parties, Specified Companies, and Group Enterprises" and "Subsidiary Supervision Measures", and special personnel are responsible for the precautions of related companies.	(3) None.
(4) Has the Company established internal rules prohibiting insider trading of securities based on undisclosed information?	V		(4) The company has established the "Operating Procedures for Handling Material Information and Preventing Insider Trading", which covers the relevant regulations on prevention of insider trading. Please refer to the Company's official website.	(4) None.
3. Composition and responsibilities of the board of directors				
(1) Have a diversity policy and specific management objectives been adopted for the board and have they been fully implemented?	V		(1) For the formulation and implementation of the Company's policy on diversity of board members, please refer to the chapter on diversity and independence of the board of directors (P12-P14). The Board of Directors' policy on diversification of members is disclosed on the company's website.	(1) None.

Evaluation Item	Implementation Status (Note 1)			Deviations from the Corporate Governance Best Practice Principles for TWSE/TPEX Listed Companies and the Reasons
	Yes	No	Summary Description	
(2) Has the Company voluntarily established other functional committees in addition to the remuneration committee and the audit committee?	V		(2) On February 21, 2023, the board of directors of the company has approved the "Risk Management Policy and Procedure" as the highest guiding principle of the company's risk management. And reported to the board of directors on February 23, 2024, the annual company-level major risks formulated by the Risk Management Committee, risk identification and implementation results	(2) None.
(3) Has the Company established rules and methodology for evaluating the performance of its Board of Directors, implemented the performance evaluations on an annual basis, and submitted the results of performance evaluations to the board of directors and used them as reference in determining salary/compensation for individual directors and their nomination and additional office terms?	V		(3) On October 29, 2020, the Board of Directors of the Company has passed the "Rules for Board Performance Evaluation". Please refer the chapter of Implementation of Corporate Governance. (P22-P23) According to the provisions in Article 24 specified in the Articles of Incorporation, the Company's director compensation shall not exceed the 1% of annual profit.	(3) None.
(4) Does the Company regularly evaluate its external auditors' independence?	V		(4) The Company's Audit Committee and Board of Directors evaluate the independence and suitability of its certified public accountants on an annual basis. In addition to requesting the certified public accountants to provide a "Statement of Transcendent Independence" and "Audit Quality Indicators ("AQIs")", the Company evaluates the certified public accountants in accordance with the Criteria for Assessing the Independence of Certified Public Accountants and the 13 AQIs. After confirming that the CPA and the Company have no other financial interests or business relationships except for the fees for visa and tax cases, and that the CPA firm (the certified public accountant and its audit team members) does not violate the independence requirements, the firm was evaluated on the basis of the five components (professionalism, quality control, independence, supervision, and innovation) with reference to the information of the AQIs. We recognize that our accountants and firms' audit experience and training hours are better than the industry average, and we will continue to introduce digital audit tools in the past three years to improve our audit quality The results of the most recent annual evaluation were discussed by the Audit Committee on October 27, 2023 and presented to the Board of Directors on October 27, 2023 for resolution to approve an evaluation of the independence and suitability of the accountants.	(4) None.

In the recent two years, not providing commercial, legal, financial, accounting or related services to the company or any affiliate of the company. 	2

2. Operation of Remuneration Committee:

(1) The Company has a Remuneration Committee composed of three members.

(2) Term of the current Committee: From June 9, 2023 to June 8, 2026, the most recent year (2023~February 2024) Salary and Compensation Committee will meet 3 times (A). The qualifications and attendance of the members are as follows:

Job Title	Name	Attendance in Person (B)	By Proxy	Attendance Rate (%) (B/A)	Remark
Convener	Yeh, Hui-Hsin	3	0	100%	
Member	Tan, Tang-O	3	0	100%	
Member	Chen, Jin-ji	3	0	100%	

Other information required to be disclosed:

1. If the Board of Directors does not adopt or amend the Remuneration Committee's suggestions, please specify the meeting date, term, contents of motion, resolution of the Board of Directors, and the company's handling of the remuneration committee's opinions (if the remuneration approved by the Board of Directors is superior than that suggested by the remuneration committee, please specify the deviation and reason): None.

2. If a member has a dissenting or qualified opinion, if a member has a dissenting or qualified opinion, that a member has a record or reservation that is recorded or stated in a written statement, the date and session of the Remuneration Committee, the content of the proposal, all members' opinions, and the handling of the opinions of the member of the Remuneration Committee shall be stated: None.

(V) Promotion of Sustainable Development – Implementation Status and Deviations from the Sustainable Development Best Practice Principles for TWSE/TPEX Listed Companies and the Reasons

Promotion Item	Implementation Status (Note 1)			Deviations from the Sustainable Development Best Practice Principles for TWSE/TPEX Listed Companies and the Reasons
	Yes	No	Summary Description	
1. Has the Company established a governance framework for promoting sustainable development, and established an exclusively (or concurrently) dedicated unit to be in charge of promoting sustainable development? Has the board of directors authorized senior management to handle related matters under the supervision of the board?	V		At present, the Quality Assurance Department of the Company is responsible to the business concurrently.	If there are legal or practical considerations, it will be handled with reference to the Code of Practice for Sustainable Development of Listed OTC Companies and relevant laws and regulations.
2. Does the company conduct risk assessments of environmental, social and corporate governance (ESG) issues related to the company's operations in accordance with the materiality principle, and formulate relevant risk management policies or strategies?	V		The board of directors of the company approved the "Risk Management Policy and Procedure" as the highest guiding principle of the company's risk management on February 21, 2023. And the Risk Management Committee (RMC) organization was formally established, with the President as the chairman and the Chief of the Management Department as the supervisor on February 21, 2023. The meetings were held periodically, the board of directors reported the risk management operating conditions of year 2023 on February 23, 2024.	No significant difference.
3. Environmental Issues (1) Has the Company set an environmental management system designed to industry characteristics?	V		The company has passed the ISO 14001 environmental management system certification, and incorporates energy saving and carbon reduction, greenhouse gas reduction, water resources and waste reduction into company policies. In order to reduce the impact on the natural environment, the company entrusts qualified professional manufacturers to clean up the waste water, general and industrial waste generated in accordance with the requirements of the ISO 14001 environmental management system. At the same time, in accordance with the requirements of laws and regulations, annual inspections of the operating environment are carried out to grasp the actual state of the labor operating environment and evaluate the status of labor exposure.	No significant difference.
(2) Does the Company endeavor to use energy more efficiently and to use renewable materials with low environmental impact?	V		The company continues to promote energy saving and carbon reduction and the recycling and reuse of packaging materials, and reduces the impact on the environmental load through power saving, water saving and green design. Sustainable development of the environment The Company introduces the thinking of green design in the early stage of product development to evaluate the possible impact and risk of the designed product/part on the environment in each stage of the life cycle. Parts that meet environmental protection requirements are selected from the design source to reduce the impact on the environment. The company has obtained QC080001 hazardous substance process management system certification, in addition to continuing to pay attention to and solve various operational	No significant difference.

Promotion Item	Implementation Status (Note 1)			Deviations from the Sustainable Development Best Practice Principles for TWSE/TPEX Listed Companies and the Reasons
	Yes	No	Summary Description	
			<p>2. The company uses E-mail as much as possible to reduce paper waste. In addition, it promotes energy-saving policies such as turning off the power at hand, and using air compressors for hot water to save power and water. Warehouse lighting is changed to LED tubes to achieve the purpose of energy saving, carbon reduction and greenhouse gas reduction.</p> <p>3. The company is committed to environmental protection, and has set KPIs for waste reduction. It conducts internal and external audits every year in accordance with the ISO14001 environmental management system certification. The waste ratio has been decreasing year by year in line with the sustainable promotion of resources.</p>	
<p>4. Social Issues</p> <p>(1) Has the company formulated relevant management policies and procedures in accordance with relevant laws and regulations and international human rights conventions?</p>	V		<p>The company declares to protect the rights and interests of employees, and also complies with local regulations and the needs of stakeholders in terms of human rights management. In addition to not employing child labor and treating them equally, the company has absolutely no forced labor, especially emphasizing the prohibition of slavery and human trafficking.</p> <p>In addition, there are multiple communication channels, and a "communication management procedure" has been established for internal employee complaints. If employees encounter any sexual harassment or mistreatment incidents, they can directly report to the company's human resources department in accordance with the "Reporting and Complaint Handling Measures". Identity confidentiality is guaranteed. In 2023, regarding labor rights and human rights issues, the company did not receive any relevant complaints or complaints.</p>	No significant difference.
<p>(2) Has the Company established and implemented reasonable employee welfare measures (include salary/compensation, leave, and other benefits), and are business performance or results appropriately reflected in employee salary/compensation?</p>	V		<p>1. Employee benefits are based on laws and regulations, including wages, vacations and legally prescribed benefits, etc. Please refer to "V. Labor Relations" on page 74 of this annual report.</p> <p>2. Employee remuneration is stipulated in Article 24 of the company's articles of association: if there is a profit in the year, 5% to 20% of the employee remuneration should be appropriated, and the board of directors will issue a resolution; the remuneration strategy is based on the company's operating performance and provides a competitive overall Remuneration, including basic salary, bonus and bonus.</p> <p>3. The company regularly conducts year-end assessments every year. The assessment procedures are based on work target performance, work ability and work attitude, etc., and are assessed fairly and reasonably in accordance with the standards of the assessment table.</p> <p>4. Workplace Diversity Policy:</p> <p>5. The company is committed to providing employees with a dignified and safe working environment. We implement diversity in employment, fairness in salary and promotion</p>	No significant difference.

(3) Does the Company provide employees with a safe and healthy working environment, and implement regular safety and health education for employees?	V		<p>1. In order to prevent the occurrence of occupational disasters, the Company spares no effort to improve the working environment to ensure the safety of employees (including all partners), including education and training, improvement of the working environment, prevention and management of hazards, auditing, contractor management and health promotion, etc., in order to provide a safe working environment for employees.</p> <p>2. The company provides employees with the following safety and health related work items:</p> <ol style="list-style-type: none"> (1) Annual employee health checkups in accordance with relevant laws and regulations. (2) Annually scheduled safety and health education and training courses. (3) Annual operational environmental inspections. (4) Establishment of diversified communication channels for staff suggestions and grievances. (5) To establish the "Measures for the Prevention and Control of Sexual Harassment" to provide a channel for complaints and to maintain an orderly working environment. (6) Accident and medical insurance for employees. (7) Establishing disaster emergency response guidelines and conducting annual fire prevention drills. <p><u>Labor Environmental Monitoring</u></p> <p>Regularly, a monitoring organization is entrusted to monitor the working environment to control the status of hazard factors in the working environment, and to improve the working site based on the monitoring results to reduce the occurrence of occupational diseases. Every year, the company trains and promotes employees' occupational safety and health education and training and fire and earthquake escape related online courses, and in 2023, 100% of the employees have completed the training courses.</p>	No significant difference.								

Promotion Item	Implementation Status (Note 1)			Deviations from the Sustainable Development Best Practice Principles for TWSE/TPEX Listed Companies and the Reasons
	Yes	No	Summary Description	
(4) Has the Company established effective career development training programs for employees?	V		The company attaches great importance to the cultivation and development of colleagues, and believes that only by continuously cultivating outstanding talents can it strengthen the basis of competition and create high-quality human resources. The company has invested a considerable amount of resources to match the human resources required for the company's development and the majors required for the business promotion of each functional unit, provide comprehensive training courses, and effectively develop human resource training to improve the work quality of colleagues and achieve business goals. The company's training content for on-the-job and newcomers includes newcomer training and professional/functional training. In 2023, there were a total of 25 shifts of on-the-job and newcomer training, with a total training time of 834 hours and a total of 513 participants. The average number of hours of education and training each employee received in 2023 was 16.26 hours.	No significant difference.
(5) Does the company comply with the relevant laws and international standards with regards to customer health and safety, customer privacy, and marketing and labeling of products and services, and implement consumer protection and grievance policies?	V		The marketing and labeling of the company's related products have been handled in accordance with the group's GDPR Team's advocacy of national laws and regulations and ISO-related regulations.	No significant difference.
(6) Has the company formulated supplier management policies requiring suppliers to comply with relevant regulations on issues such as environmental protection, occupational safety and health, or labor rights, and what is the status of their implementation?	V		The company has a set of evaluation and inquiry procedures for suppliers, and will carefully evaluate suppliers with poor social perception or bad reputation. If the supplier has a significant impact on environmental protection, occupational safety and health, or labor human rights, the terms of the contract may be terminated or revoked at any time.	No significant difference.
5. Does the company refer to international reporting standards or guidelines when preparing its sustainability report and other reports disclosing non-financial information? Does the company obtain third party assurance or certification for the reports above?		V	The company currently does not prepare reports such as sustainability reports that disclose non-financial information of the company.	If there are legal or practical considerations, it will be handled with reference to the Code of Practice for Sustainable Development of Listed OTC Companies and relevant laws and regulations.

	Yes	No		
6. If the Company has adopted its own sustainable development best practice principles based on the Sustainable Development Best Practice Principles for TWSE/TPEX Listed Companies, please describe any deviation from the principles in the Company's operations: No differences.				
7. Other important information to facilitate better understanding of the company's promotion of sustainable development: None.				

Implementation of Climate-related Information

Item	Implementation status
<p>1. Describe the board of directors' and management's oversight and governance of climate-related risks and opportunities.</p> <p>2. Describe how the identified climate risks and opportunities affect the business, strategy, and finances of the business (short, medium, and long term).</p> <p>3. Describe the financial impact of extreme weather events and transformative actions.</p> <p>4. Describe how climate risk identification, assessment, and management processes are integrated into the overall risk management system.</p> <p>5. If scenario analysis is used to assess resilience to climate change risks, the scenarios, parameters, assumptions, analysis factors and major financial impacts used should be described.</p> <p>6. If there is a transition plan for managing climate-related risks, describe the content of the plan, and the indicators and targets used to identify and manage physical risks and transition risks.</p> <p>7. If internal carbon pricing is used as a planning tool, the basis for setting the price should be stated.</p> <p>8. If climate-related targets have been set, the activities covered, the scope of greenhouse gas emissions, the planning horizon, and the progress achieved each year should be specified. If carbon credits or renewable energy certificates (RECs) are used to achieve relevant targets, the source and quantity of carbon credits or RECs to be offset should be specified.</p> <p>9. Greenhouse gas inventory and assurance status and reduction targets, strategy, and concrete action plan (separately fill out in points 1-1 and 1-2 below).</p>	<p>➤ According to the "Roadmap for the Sustainable Development of Listed Companies" issued by the Financial Supervisory Commission in March 2022, the Company, as a company with a paid-in capital of less than NT\$5 billion, should be subject to the third phase of the GHG inventory and verification (i.e., completion of the inventory in fiscal year 2026 and verification in fiscal year 2028). However, since the parent company of the Company is a publicly listed company with a paid-in capital of more than NT\$10 billion, the group and subsidiaries should complete the inventory in 2025 and verification in 2027, therefore, the Company will advance the planning schedule for GHG inventory and follow the reference guidelines and relevant regulations issued by the competent authorities to continuously control the greenhouse gas.</p> <p>➤ The Quality Assurance Department of the Company is designated as a concurrent unit to conduct greenhouse gas inventories related to climate change, and submits quarterly reports to the Board of Directors on the progress of implementation of each greenhouse gas inventory project, including detailed implementation schedules, complete inventory procedures, and board of directors' supervision and control milestones.</p> <p>➤ In the face of climate change, which is bound to affect and change the supply chain of the industry and the conditions of sales in the market to a considerable extent, the Company will not only implement its internal design and planning for resource conservation and reduction of carbon emissions in the short term, but also observe in the medium to long term that the market as a whole may move towards the trend of carbon pricing and carbon taxation, which will result in the possibility of cost increases for the research and development, production, and sales of its products. Therefore, the restructuring or adjustment of products and industries that may be brought about by climate change will be a topic that the Company must consider and plan for in its financial planning in the future, and it is also one of the business targets to be introduced into systematic management and risk assessment.</p>

(VI) Ethical Corporate Management – Implementation Status and Deviations from the Ethical Corporate Management Best Practice Principles for TWSE/TPEX Listed Companies and the Reasons

Evaluation Item	Implementation Status			Deviations from the Ethical Corporate Management Best Practice Principles for TWSE/TPEX Listed Companies and the Reasons
	Yes	No	Summary Description	
1. Establishment of ethical corporate management policies and programs				
(1) Does the company have an ethical corporate management policy approved by its Board of Directors, and bylaws and publicly available documents addressing its corporate conduct and ethics policy and measures, and commitment regarding implementation of such policy from the Board of Directors and the top management team?	✓		(1) The company has formulated the "Code of Integrity Management", and will actively implement the commitments of the management policy based on its principles, and publicize the company's integrity management policy to all employees.	No significant difference.
(2) Whether the company has established an assessment mechanism for the risk of unethical conduct; regularly analyzes and evaluates, within a business context, the business activities with a higher risk of unethical conduct; has formulated a program to prevent unethical conduct with a scope no less than the activities prescribed in Article 7, paragraph 2 of the Ethical Corporate Management Best Practice Principles for TWSE/TPE Listed Companies?	✓		(2) The company has established an "Integrity Manual", and regularly publicizes that employee must not use their powers to seek illegal benefits, accept entertainment, gifts, accept kickbacks, embezzle public funds, or other illegal benefits. Every donation and sponsorship must be reported to the authorized level for approval, in compliance with relevant laws and internal operating procedures.	No significant difference.
(3) Does the company clearly set out the operating procedures, behavior guidelines, and punishment and appeal system for violations in the unethical conduct prevention program, implement it, and regularly review and revise the plan?	✓		(3) The company has established the "Integrity Manual", which has clear codes of conduct for "conflicts of interest", "compliance with laws and regulations", "business secrets and company assets", and uses publicity, education and training methods to require employees not to use their powers to seek illegal interests, and acceptance of entertainment, gifts, kickbacks, embezzlement of public funds, or other illegal interests, hoping to prevent dishonest behavior from affecting business relationships or transaction behavior, and clearly stipulate the reporting and complaint system in the integrity manual,	No significant difference.

Evaluation Item	Implementation Status			Deviations from the Ethical Corporate Management Best Practice Principles for TWSE/TPEX Listed Companies and the Reasons
	Yes	No	Summary Description	
2. Ethical Management Practice				
(1) Does the company assess the ethics records of those it has business relationships with and include ethical conduct related clauses in the business contracts?	✓		(1) The company will conduct a preliminary credit investigation before starting to establish a transaction relationship with customers or suppliers, and try to avoid transactions with customers or suppliers with records of dishonest behavior.	No significant difference.
(2) Has the company set up a dedicated unit to promote ethical corporate management under the board of directors, and does it regularly (at least once a year) report to the board of directors on its ethical corporate management policy and program to prevent unethical conduct and monitor their implementation?	✓		(2) The company has set up a concurrent unit affiliated with the board of directors to promote corporate integrity management, which is the General Administration Office. And regularly report to the board of directors every year. The implementation situation in 2023 was reported to the board of directors on February 23, 2024.	No significant difference.
(3) Has the company established policies to prevent conflict of interests, provided appropriate communication and complaint channels, and properly implemented such policies?	✓		(3) At present, if there is a conflict of interest in the company, the internal employees of the company can report directly to the supervisor of the department directly under the company.	No significant difference.
(4) Does the company have effective accounting and internal control systems in place to enforce ethical corporate management? Does the internal audit unit follow the results of unethical conduct risk assessments and devise audit plans to audit compliance with the systems to prevent unethical conduct or hire outside accountants to perform the audits?	✓		(4) The company has a complete accounting system and internal control system, and the relevant personnel implement it in accordance with the prescribed system. If any abnormality occurs, it will be reported to the supervisor or the board of directors immediately.	No significant difference.
(5) Does the company provide internal and external ethical corporate management training programs on a regular basis?	✓		(5) The company annually provides an online training session regarding overview of Integrity Handbook to all employees. In 2023, 100% of employees have completed the training course.	No significant difference.
3. Implementation of Complaint Procedures				
(1) Has the company established specific whistle-blowing and reward procedures, set up conveniently accessible whistle-blowing	✓		(1) The company has clearly stipulated the disciplinary system in the "Integrity Manual", and has set up an independent reporting mailbox according to the operating procedures for reporting violations of the integrity code.	No significant difference.

Evaluation Item	Implementation Status			Deviations from the Ethical Corporate Management Best Practice Principles for TWSE/TPEX Listed Companies and the Reasons
	Yes	No	Summary Description	
channels, and appointed appropriate personnel specifically responsible for handling complaints received from whistleblowers?				
(2) Has the company established standard operation procedures for investigating the complaints received, follow-up measures taken after investigation, and mechanisms ensuring such complaints are handled in a confidential manner?	✓		(2) The company has formulated the "Whistleblowing System" and "Code of Integrity Management". If a whistleblowing case is accepted, the investigation process and results will be kept, and the identity and content of the whistleblower will be kept confidential.	No significant difference.
(3) Has the company adopted proper measures to protect whistleblowers from retaliation for filing complaints?	✓		(3) The whistleblower can choose to be anonymous, and the unit that accepts the whistleblower is also obliged to keep it confidential if it is not anonymous.	No significant difference.
4. Strengthening Information Disclosure Does the company disclose its ethical corporate management policies and the results of their implementation on its website and the Market Observation Post System (MOPS)?	✓		Both the company's website and annual report disclose the relevant content of the Code of Integrity Management and the performance of integrity management for the knowledge of interested parties. Please refer to the company website for the promotion situation.	No significant difference.
5. If the company has adopted its own ethical corporate management best practice principles based on the Ethical Corporate Management Best Practice Principles for TWSE/TPEX Listed Companies, please describe any deviations between the principles and their implementation: No differences.				
6. Other important information to facilitate a better understanding of the status of operation of the company's ethical corporate management policies (e.g., the Company's reviewing and amending of its ethical corporate management best practice principles):				
(1) The Company has set up a supplier anti-corruption channel for suppliers. Suppliers can respond to any violation of the code of ethics and conduct of Integrity by any of the Company's colleagues through the Integrity Mailbox: ethics@simulatetechnology.com, and the Company will deal with it immediately. The Company will keep the contents and results of the investigation strictly confidential and ensure that the interests of the relevant persons will not be jeopardized.				
(2) Every year, the company-wide "integrity and anti-corruption" online training course is regularly carried out. The course content includes: introduction to the contents of the integrity manual, key summaries, practical example explanations, and after-school tests to check the learning results of colleagues. In order to implement the publicity of the Integrity Manual, in addition to the original Chinese version, the company also completes the English version of the Integrity Manual for overseas operating bases, and publicizes it and conducts relevant education for colleagues.				

(VII) If the company has established a corporate governance code and related regulations, it should disclose its inquiry method:

Please refer to the company website (<http://www.simulatetechnology.com>).

(VIII) Other important information that can promote understanding of the company's corporate governance operations:

1. The company passed the "Guidelines for Process of Internal Major Information and Insider Trading Prevention Management" by the board of directors on October 28, 2016 and revised it on April 29, 2022. The main contents include the following items

(1) Scope of application

These Procedures shall apply to all directors, managerial officers, and employees of this Corporation. This Corporation shall ensure that any other person who acquires knowledge of this Corporation's material inside information due to their position, profession, or relationship of control shall comply with the applicable provisions of these Procedures.

(2) Internal important information confidentiality operating procedures.

(3) Procedures for handling internal material information disclosure.

(4) Handling of abnormal situations.

(5) Internal control operations and internal education and publicity.

2. This year, before April 30, 2023, relevant education publicity for employees and current directors and managers has been completed. The course content includes the basic concepts of insider trading, regulations prohibiting insider trading, elements of insider trading (person, event, time, object, behavior), legal effects of insider trading, and how to initiate an investigation of insider trading. A total of 75 people have 1-hour education Propaganda, send the publicity files to current directors and managers during the course, and place the publicity files on the company intranet for reference by employees.

3. On October 29, 2021, the Board of Directors made the resolution of appointing corporate governance personnel to protect shareholders' rights and enhance the functions of the Board of Directors.

4. Managers attend training related to corporate governance

		Taipei Exchange	Revision of Insider Regulations and Updates of Laws	3
		Independent Directors Association Taiwan	Tax governance in the new tax environment	3

(IX) Status of Implementation of Internal Control System

1. Statement on internal controls

SIMULA TECHNOLOGY INC.
Statement on internal controls

Date: FEB 23, 2024

The Company inspected the 2023 internal control system autonomously with the following results:

1. The Company is fully aware that the Board of Directors and the management are responsible for the establishment, implementation, and maintenance of the internal control system and it has been established accordingly. The purpose of its establishment was to reasonably ensure the fulfillment of effective operation and efficiency (including profit, performance, and protection of assets safety), and the reliability, timeliness, transparency and regulatory compliance of financial reports.
2. The internal control system design has inherent limitations. No matter how perfect such control is, it can only provide reasonable assurance of the fulfillment of the three objectives referred to above. The effectiveness of such an internal control system could be influenced by changes of the environment and other circumstances. Therefore, the Company internal control system has been designed with a self-monitoring mechanism so that corrective action will be activated immediately upon the identification of any nonconformity.
3. The Company has assessed the effectiveness of the design and implementation of the internal control system in accordance with criteria provided in the "Regulations Governing the Establishment of Internal Control Systems by Public Companies" (hereinafter referred to as "the Regulations"). The criteria defined in "the Regulations" include five elements that depend on the management control process: (1) environment controls, (2) risk assessment, (3) control processes, (4) information and communications, and (5) supervision. Each of the five elements is then divided into sub-categories. Please refer to "the Regulations" for details.
4. The Company has implemented criteria for inspection of the internal control system referred to above to ascertain its effectiveness, design and implementation.
5. The Company, based on the inspection results referred to above, declared (on December 31, 2023) that the internal control system, including the supervision and management of subsidiaries, is reasonably effective and achieves the objectives of operation and efficiency, the financial report is of reliability, timeliness, transparency and regulatory compliance.

200,001 ~ 400,000	6	1,416,081	1.77%
400,001 ~ 600,000	0	0	0.00%
600,001 ~ 800,000	0	0	0.00%
800,001 ~ 1,000,000	0	0	0.00%
1,000,001 or more	4	42,156,000	52.71%
Total	9,963	79,972,945	100.00%

(IV) List of Major Shareholders: (Top 10 shareholders or with Shareholdings greater than 5%)

As of April 09, 2024; Unit: share; %

Quantity of shares	Number of shares held	Shareholding Percentage (%)
Names of Major Shareholders		
Qisda Corp.	30,000,000	37.51
Darly2 Venture Inc.	5,500,000	6.88
Darly Venture Inc.	5,390,000	6.74

(V) Stock Price, Net Value, Earnings, Dividends and Related Information for the Past Two Years:

Unit: NT\$ 1,000; thousand shares

Item \ Fiscal Year		2022	2023	As of March 31, 2024	
Share Price	Highest	46.40	39.50	28.30	
	Lowest	26.50	27.10	24.55	
	Average	38.32	32.39	26.48	
Net Value per Share	Before Distribution	22.00	18.49	17.97	
	After Distribution	19.50	18.49	N/A	
Earnings Per Share	Weighted Average Shares Number	79,973	79,973	79,973	
	EPS	3.12	(1.04)	(0.59)	
Dividends Per Share (Note 1)	Cash dividends		2.5	-	N/A
	Stock Dividends	Dividend from Retained Earnings	-	-	N/A
		Dividend from Capital Reserve	-	-	N/A
	Cumulative Unpaid Dividend		-	-	N/A
Return on Investment (ROI) Analysis	Price-to-Earning Ratio (Note 2)		11.57	(31.14)	N/A
	Price-Dividend Ratio (Note 3)		14.44	N/A	N/A
	Cash Dividend Yield (Note 4)		6.92	N/A	N/A

Note 1: Calculate the amount of distribution based on the amount resolved by the resolved in the next year's shareholders meeting.

Note 2: Price/Earnings ratio = Average closing price per share for the year / Earnings per share.

Note 3: Price/Dividend ratio = Average closing price per share for the year / Cash dividend per share.

Note 4: Cash dividend yield = Cash dividend per share / Average closing price per share for the year.

(VI) Dividend Policy and Implementation Status

(1) Dividends Policy Specified in the Company's Articles of Incorporation

Where the Company has a profit at the end of each fiscal year, the Company shall first allocate the profit to pay taxes and recover accumulated losses, and then 10% of the remaining net earnings shall be allocated as the Company's legal reserve unless and until the accumulated legal reserve reaches the paid-in capital. If there is still a balance, together with the accumulated undistributed surplus, a surplus distribution proposal is drawn up. If the profit distribution plan and special stock dividends mentioned in the preceding paragraph are cash dividends, the board of directors shall be authorized to make a resolution and report at the shareholders' meeting.

The company's dividend policy is based on the characteristics of the growth of the technology industry and the overall environment, while taking into account a stable and balanced dividend policy, and considering factors such as profitability, financial structure, and future development. When the amount is 2%, the dividend distribution shall not be less than 10% of the distributable earnings for the current year. The distribution of surplus may be carried out in accordance with the company's overall capital budget planning, but the proportion of cash dividend distribution shall not be lower than 10% of the total dividends distributed in the current year.

The company may issue new shares or cash from the statutory surplus reserve or capital reserve in accordance with Article 241 of the Company Act. If the payment in the preceding paragraph is made in cash, the board of directors shall be authorized to make a resolution and report to the

shareholders' meeting.

(2) Dividends Distribution to be proposed to the Shareholders' Meeting

The Company has accumulated losses for the year ended December 31, 2023, and therefore has not proposed any appropriation of earnings by the Board of Directors.

(3) Explanation regarding expected major changes to dividend policy: None

(VII) Effect of the proposed stock dividends (to be adopted by the Shareholders' Meeting) on the operating performance and earnings per share:

Not applicable.

(VIII) Compensation for employees and directors:

(i) The Company's Articles of Incorporation includes the amount and coverage of compensation for employees and directors

Where the Company has a profit before tax for each fiscal year, the Company shall first reserve certain amount of the profit to recover losses for preceding years, and then set aside no less than 5~20% of the remaining profit for distribution to employees as remuneration and no more than 1% of the remaining profit for distribution to directors as remuneration. The Company may allocate employees' remuneration prescribed in the preceding paragraph in the form of stock or cash to employees of an affiliated company meeting certain conditions.

(2) The accounting procedure used to handle differences between estimated column of employee dividend and forecast basis of director's and supervisor's compensation, basis for calculating shares for the purpose of paying out share dividends and actual payout figure for this period:

Based on the current year's profit (that is, the profit before tax deducting the profit before the distribution of employee remuneration and director's remuneration) and deducting accumulated losses, the company estimates employee remuneration at a certain percentage, and the director's remuneration is estimated and recorded based on the expected payment amount, and listed as operating costs or operating expenses. If employee remuneration is issued in stock, the number of allotted shares is calculated based on the closing price of common stock on the day before the board of directors' resolution. If there is a change after the release of the financial report in the next year, it will be treated as a change in accounting estimate, and the impact of the change will be recognized as profit or loss for the next year.

(3) Circumstances in which the board of directors approves the distribution of remuneration

(1) Basis for estimates of remuneration for employees and directors for this term, basis for calculating employee stock compensation and accounting procedures for when there is a discrepancy between the estimated and actual amount: The Company was in a loss position in 2023, therefore, no estimates were made for employees' and directors' compensation.

(2) The amount of employee remuneration distributed by stock and its proportion to the total after-tax net profit and total employee remuneration of individual or individual financial reports in the current period: None.

(4) Actual distribution of employees, Directors' and supervisor's compensation in the previous year:

(1) The actual allocation of employee and director remuneration in the previous year:

Cash distribution of employee remuneration NT\$17,253 thousand and director remuneration NT\$2,157 thousand

(2) The difference between the proposed distribution approved by the original board of directors and the actual amount:

The actual distribution is the same as the distribution proposed by the board of directors.

(IX) Share Repurchases: None

II. Issuance of Corporate Bonds: None

III. Issuance of Preferred Shares: None.

IV. Issuance of Global Depositary Receipts (GDRs)

V. Exercise of Employee Stock Option Plan (ESOP) and Restricted Stock:

(1) Handling of employee stock option certificates: N/A.

(2) Names, acquisition and subscription status of the managers who have obtained the employee stock option certificates and the top ten employees who have obtained the certificates and the number of shares that can be subscribed by the date of publication of the annual report and whose subscription amount is more than NT\$30 million: N/A

VI. Mergers, acquisitions or issuance of new shares for acquisition of shares of other companies: None.

VII. Implementation of capital allocation plan:

(i) Plan details:

(1) As of the quarter before the date of this Annual Report, the previous issuance or private placement of securities had not been completed or completed within the last three years and the planned benefits have not yet been shown:

As of the quarter before the publication date of the annual report, the company has completed all previous issuances of securities and the benefits of the plan have emerged, so it is not applicable.

(2) Implementation: N/A.

V. Operation Overview

I. Business Activities

(I) Business Scope

1. Main business contents

The Company's main business is to develop, manufacture and sell electronic connectors, cables and electronic modules. Our main function is to provide power, audio and video signals, and electronic signals for various devices. The main application products are various consumer electronics, automotive electronics, network communications, and industrial and medical equipment.

2. Operating Ratio

Unit : NTD thousand ; %

Year	2022		2023		Q1, 2024	
	Revenue	%	Revenue	%	Revenue	%
Wearable products	287,443	6.79%	163,527	8.02%	29,697	8.43%
Consumer products	382,362	9.04%	233,734	11.46%	36,991	10.49%
Automotive, medical and industrial products	3,548,477	83.87%	1,634,337	80.15%	284,246	80.64%
Others	12,742	0.30%	7,457	0.37%	1,539	0.44%
Total:	4,231,024	100.00%	2,039,055	100.00%	352,473	100.00%

3. Current products (services) of the company

The Company operates in the following five major markets:

- (1) Design and manufacture of connectors, extension cords, and modules for consumer-related products.
- (2) Design and manufacture of connectors, extension cords, and modules for wearable products.
- (3) Design and manufacture of connectors, extension cords, and modules for automotive products.
- (4) Design and manufacture of connectors, extension cords, and modules for medical products.
- (5) Connector, extension cords, and module design and manufacturing for industrial products...

4. New Product (Service) Development Plan

(1) Consumer Products:

- a. Mainly engaged in terminal products and display-related industries.
- b. Developing High Current USB-C Connectors

(2) Automotive Industry

- a. Transferred 100% of MIC automotive products to Taiwan.
- b. Continuous development of automotive connectors to increase the proportion of in-house production.

(3) Wearable industry

- a. Increase the ratio of automated production.
- b. Continuing to develop medical and industrial wearable markets.

(4) Medical industry

- a. Continuous MIT design, manufacturing, capabilities
- b. Continuous development of round self-locking connector types.

(5) Industrial Industry

Continuing to build MIT design, manufacturing, capabilities for M series products

(6) Others

Continuing to build strategic alliances and conduct mergers and acquisitions.

(II) Industry Overview

1. Current status and development of the industry

The company was established on December 15, 2003, as a professional manufacturer and designer of electronic connectors and cables in Taiwan. Our main products are used in various fields such as wearable devices, smartphones, laptops, automotive electronics, medical devices, and industrial applications.

The connector industry is facing various challenges. These include the increasing precision of terminal devices, high-speed network communication, miniaturization, and hole-less designs of terminal devices. These trends have driven the development of connectors towards smaller and micro-sized solutions. Additionally, fast charging technology imposes higher requirements on the current and power-carrying capacity of connectors. Furthermore, with the rapid development of applications such as AI (Artificial Intelligence), gaming, smart manufacturing, IoT (Internet of Things), fiber optics, smart wearables, autonomous vehicles, and drones, it is estimated that more opportunities for connector development will arise. These opportunities include the continuous evolution of high-frequency transmission interface technologies, the integration of connectors/sensors as a new trend, and the shift of connectors towards flexible electronics and other emerging technologies. We believe that these advancements will bring new opportunities and prosperity to the connector industry.

2. The relationships of upstream, midstream, and downstream in the industry

Connector products refer to all connecting components and related accessories used for signal and power transmission in electronic devices. This includes cables, sockets, plugs, and other related components. Connectors are detachable or replaceable plug-in devices that link circuits, modules, and systems within electronic products. They serve as bridges for signal transmission. The relationships and changes in the industry's upstream, midstream, and downstream sectors are described as follows:

Upstream:

In the upstream sector of the connector industry, the main products include copper alloy metals, plating solutions, plastics, and other materials. These materials account for approximately 60% of the manufacturing cost, with metal materials being the largest component, followed by plastic materials, and then plating materials. Metal materials are used to make connector terminals, and to ensure that electronic signals are not impeded or attenuated during transmission, connector terminals are often made of brass or phosphor bronze. The plastic parts are formed through injection molding, while the metal parts undergo stamping and are then processed through plating.

Currently, Taiwanese connector manufacturers have gained significant expertise in the midstream processes. However, the upstream raw materials and equipment are still primarily controlled by Japanese companies. There is a lack of domestic investment in research and development in related fields, placing Taiwanese manufacturers at a disadvantage in terms of bargaining power with upstream suppliers.

Midstream:

In the midstream sector of the connector industry, the main products are connectors and cables. The production process includes product design, mold development, metal stamping, plastic

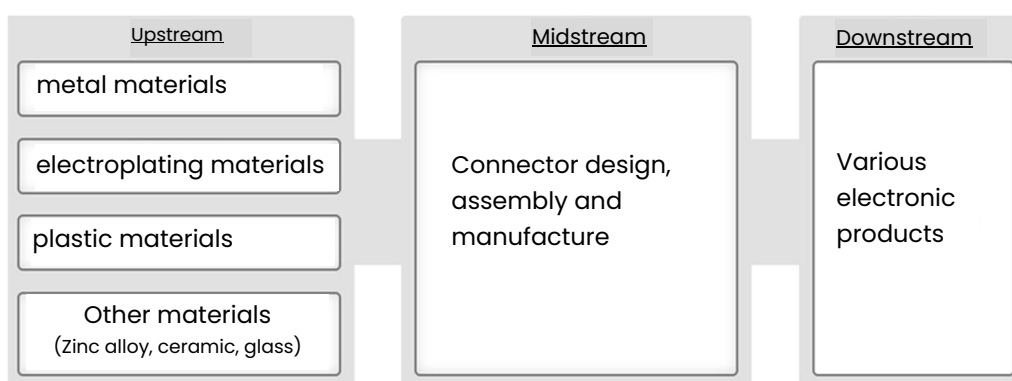

injection or plating, intermediate assembly processes, and final assembly and testing. As electronic products are moving towards higher frequencies, the design of connectors is becoming increasingly complex, as mitigating electromagnetic interference becomes more challenging.

Taiwanese manufacturers primarily focus on PCB connectors, I/O connectors, card connectors, IC sockets, and other similar types of connectors. In the 3C (Computers, Communications, and Consumer Electronics) applications, domestic manufacturers have become major participants, supplying products for computer peripherals, network communication devices, consumer electronics, and other related fields. As the growth in these markets has slowed down, manufacturers are gradually diversifying their applications to include green energy, automotive, medical, industrial, 5G, high-speed telecommunications, and other products.

Downstream:

The application of connectors is very extensive, covering industries such as automotive, computer, telecommunications, industrial, military aerospace, transportation, and healthcare. In terms of industry applications, the current distribution is as follows: automotive-related applications account for the highest share at 22%, followed by telecommunications at 21%, consumer-related applications at 15%, industrial-related applications at 11%, and other applications at 31%.

The future development trend for connectors (including cables) is towards lightweight and high-speed solutions.

3.Product Development Trends

The current global situation is characterized by numerous uncertainties, including geopolitical factors, pandemics, supply chain bottlenecks, inflation, and weak consumer market demand. The industry faces the following trends:

(1) Accelerated Automation Applications

Under the influence of inflation and economic downturn, global businesses are facing severe talent and technological gaps, along with increased operational costs. The application and expansion of automation in enterprises have the potential to help overcome current development challenges and obstacles.

(2) Supply Chain Restructuring and New Competitive Landscape

In the past three years, the global supply chain has experienced unprecedented disruptions, driven by new geopolitical dynamics, raw material supplies, product structures, and consumer patterns. Supply chains have started to shift from long chains to shorter ones, accelerating the development of multi-chain models. The establishment of multi-chain ecosystems is expected to lead to new industry deployments, including manufacturing relocation.

(3) Geopolitics Accelerating Low Earth Orbit (LEO) Satellite Development

The development of low Earth orbit satellites has gained attention due to SpaceX's advancements, while the developments in the Russia-Ukraine conflict have catalyzed the deployment of LEO satellites by various countries. More regions recognize the indispensability of

satellite communications under sensitive geopolitical circumstances. With numerous satellite operators continuously launching LEO satellites into orbit and governments gradually opening up related frequency bands, it is expected that more companies will invest in and develop products related to LEO satellites.

(4) Metaverse Trend of "Big Players Getting Bigger"

Despite the impact of the pandemic in recent years, the application of the metaverse has continued to evolve. The future focus of metaverse development lies in interoperability between different platforms, with leading companies connecting diverse and decentralized metaverse services, particularly in the fields of gaming, social communities, and marketing.

(5) Shaping Future Consumer Trends

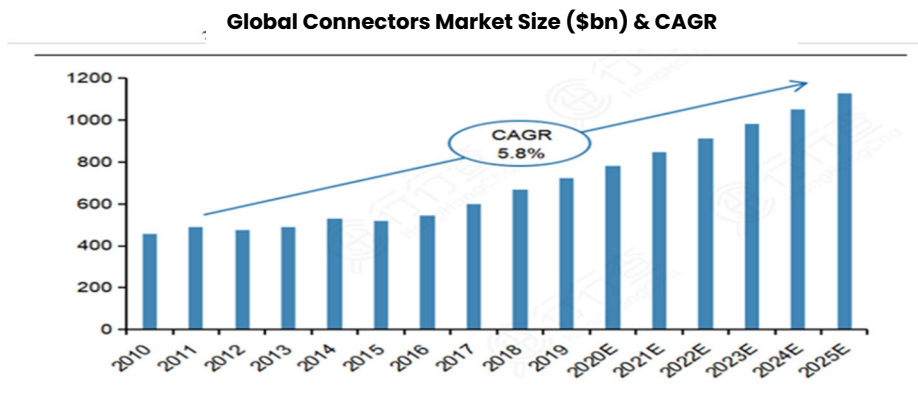

In the post-pandemic era, factors such as geopolitics, supply-demand imbalances, and monetary policies have led to inflationary pressures in many countries. Consumers are continuously paying relatively high prices for energy and food, and it is expected that they will need to readjust their consumption patterns due to reduced disposable income. In addition to digital considerations, future consumers will prioritize products and services that offer intuitive usage, enhanced efficiency, easy management, high integration, and cost-effectiveness. To meet the demands of future consumers, voice shopping platforms, comprehensive smart devices, and subscription services for consumer electronics products will be key focus areas in the post-pandemic era of the electronic consumer market.

4.Competitive Landscape of Products

According to Bishop's forecast, the global connector value is expected to exceed USD 90 billion by 2023. Furthermore, with the increasing demand for consumer electronics devices due to rapid urbanization and the high demand for connectors in various fields such as industry, defense, and automotive, the global connectors market is expected to exceed US\$110 billion by 2025, with a compound annual growth rate (CAGR) of 5.8%.

Due to the downward price trend of connector application products and the price competition among the industry, the profit margins of connector manufacturers have been compressed. In view of this, the Company will continue to focus on:

- 1. Enhance the ability of rapid product development and customization.
- 2. Enhance the depth, breadth and strength of customer service.

Source : Bishop&Associate

(III) Technological and R&D Overview

1. Research and development expenses from 2022 through to the publication date of the annual report

Unit: Thousands of NTD

Item \ Year	2022	2023	As of March 31, 2024
R&D expense	104,912	78,987	17,825
Net Operating Revenue	4,231,024	2,039,055	352,473
R&D Expenses as a Percentage of Net Operating Revenue (%)	2.48%	3.87%	5.06%

Note: The company plans to allocate approximately 4% to 5% of its operating revenue to R&D expenses for the year 2024.

2. Recent Successful Technological or Product Developments

A. Product Developments:

- (a) Development of customized internal and external wires (Cable & Wire Harness of Automotive / Industrial / Medical)
- (b) Development of new generation standard active cables (USB4.0 Active / DP2.1 Active Cable)
- (c) Development of Industrial Standard Connectors (IEC Standard M5/M8/M12/M32 Series)
- (d) Development of customized connectors for automobiles (D-Sub / OBD / DT Series / Waterproof)
- (e) Development of Customized Pogo Pin Connectors (Consumer / Medical / High Frequency)
- (f) Development of Customized Magnetic Connectors (Consumer / Medical)
- (g) Development of Customized Cables for Wearable Devices (Consumer / Medical)

B. Technological Developments:

- (a) DP2.1 Re-Driver Active PCBA Module Solution
- (b) DP2.1 Re-Timer Active PCBA Module Solution
- (c) USB4.0 Cable Twist Structure Solution
- (d) LPM PCBA Molding Solution
- (e) Development of Visual Recognition Automation Line Equipment
- (f) Development of automated test history uploading system.

(VI) Long-Term and Short-Term Business Development Plans

Our company is primarily engaged in the research, development, manufacturing, and sales of electronic connectors and components. We have transitioned from previously focusing on consumer and information technology electronic products with high substitutability to highly customized products for automotive, medical, industrial, and wearable devices. Since joining the J.S.T. Daitron Group in Q2 of 2020, our service scope and development have received unlimited support.

To adapt to industry trends and the changing domestic and international business environment, our company has formulated short-term and long-term plans to enhance overall competitiveness. The summary of these plans is as follows:

1. Short-Term Plan

A. Market Strategy

- (a) Increase the proportion of self-developed general-purpose products.
- (b) Achieve 100% automated production of general-purpose products to make them price-competitive.

B. Research and Development Strategy

- (a) Enhance modular design, automated design technology and resource integration.
- (b) Strengthen the development of high-frequency, power, and signal conversion electronic technologies.
- (c) Enhance high-frequency, static magnetic, and dynamic magnetic analysis technologies.
- (d) Improve high-frequency transmission cable assembly and testing technologies.
- (e) Actively collaborate with academic research institutions and high-tech enterprises to introduce technical support.
- (f) Actively participate in connector-related associations and collaborate with mainstream companies in the electronics industry for product integration and standard development.

C. Production Strategy

- (a) Continuously improve production processes, enhance process automation.
- (b) Ensure the implementation of pre- and post-employment education and training.
- (c) Reduce losses, and increase product gross margin.

D. Financial Strategy

- (a) Establish relationships with financial institutions, monitor financial and foreign exchange market trends, and improve financial utilization performance.
- (b) Strengthen accounts receivable collection and improve the quality of accounts to ensure sufficient working capital to meet the expanding operational needs.

E. Management Strategy

The Company actively implement Enterprise Resource Planning (ERP) system and TipTop system to promote the overall information and efficiency of operations in 2014.

2. Long-Term Plan

A. Market Strategy

- (a) Develop niche products and markets through resources of Qisda's large fleet.
- (b) Maintain a continuous presence in the electric vehicle, smart healthcare, and heavy-duty industrial industries.
- (c) Replicate experience in automated processes.

B. Research and Development Strategy

- (a) Establish the development of application products and modular technology for connectors and cables targeting automotive, industrial, consumer and medical markets, while providing high-quality and technical support services.
- (b) Enhance manufacturing automation capabilities and product quality capabilities.
- (c) To master key technologies and establish technology integration to become a total solution provider.

- (d) Implementation of the spirit of ESG into the design of the design used/shared to increase the value-added.

C. Production Strategy

- (a) Optimize manufacturing processes and move towards fully automated production.
- (b) Shorten the production cycle and develop the production mode of small quantity and variety to reduce the risk of inventory and cost pressure.
- (c) Establish a real-time monitoring system to control inventory and flexibly adjust production.

D. Financial Strategy

- (a) Strengthen long-term and sound financial planning to align with the company's long-term business development, reduce operational risks, and enhance market competitiveness.
- (b) Carry out cash capital increases at appropriate times to raise medium- and long-term funds, provide ample financial support, and stabilize the company's financial structure.
- (c) Make full use of diversified fundraising channels and financial instruments in the capital market to establish a robust financial structure.

E. Management Strategy

Actively develop and implement an effective global design service chain management system.

II. Market and Production Overview

(I) Market Analysis

1. Main product (service) sales (provide) area

Unit : NTD thousand ; %

Area \ Year	2022		2023	
	Amount	%	Amount	%
Domestic sales	145,186	3.43%	282,649	13.86%
External sales	4,085,838	96.57%	1,756,406	86.14%
Total	4,231,024	100.00%	2,039,055	100.00%

2. Market share

According to the statistics of Bishop & Associates (please refer to P.64), the following table shows:

- (1) In 2022, the global sales of connectors will be approximately US\$84 billion and the company will have a turnover of US\$140 million, representing a market share of 0.16%.
- (2) In 2023, the global sales of connectors will be approximately US\$90 billion, and the Company's turnover will be US\$68 million, representing a market share of approximately 0.08%.

3. Future market supply and demand and growth

- (1) The Continuing Development of Contactless Connectivity Solutions
- (2) Continuing Development of Telematics Communications
- (3) Continuous development of low orbit satellites
- (4) Continuous Development of Artificial Intelligence and Machine Learning

(5) Continuous development of large-scale data centers

(6) Continuous Development of Industrial Automation

4. Competitive Niche

(1) Ability to quickly provide design analysis and integrate key technologies

The company has mastered the core key process and design technologies for major development industries, and can effectively integrate the required resources to quickly respond and meet customer needs. In addition to the factory in Shenzhen, China, we have also established a second or even a third production location to maximize flexibility and efficiency and to expand our competitive advantage.

(2) Continuous investment in R&D team

We are continuously upgrading and strengthening our engineering manpower and team, and adopting the JDM (Joint Design Manufacture) model in our R&D strategy to provide complete solutions by co-developing core products with international manufacturers and major customers.

(3) Complete quality assurance system to ensure product quality

Based on quality insistence and customer relationship maintenance, our company passed ISO 9000 certification in 2004, ISO 14000 certification in 2005, OHSAS18001 certification in 2010, TSI6949 (Global Quality Management System for Automotive Industry) in 2014 and ISO13485 (Quality Management System for Medical Devices) in 2016. In order to build a complete quality assurance system, improve credit and quality management, and move toward the goal of TQM (Total Quality Management), we continue to strive to improve product yields and establish an important foothold for our company.

(4) Expand international marketing channels and provide local technical and business services

In order to establish long-term development goals and provide more comprehensive services to customers, the establishment of international marketing channels (e.g., agents) and locations is an inevitable means to effectively grasp market dynamics and provide real-time local services in the future.

(5) Combine the resources of parent company Qisda's large fleet to develop services for key components.

5. Favorable and unfavorable factors of development prospect and countermeasures

(1) Favorable factors for future development

a. Innovative application of electronic products

Electronic products are spreading their technology to network communications, automotive electronics, digital home and medical electronics applications, and more new application markets will emerge in the future. From the launch of the Apple iPad, which led the global development and continuous improvement of tablet computers, to the launch of practical applications of wearable devices, and in recent years, the concept of the Internet of Things (IOT) has led to the key connector product technology required for the Internet of Things application system, and this year gradually revealed the futuristic artificial intelligence (AI) and other completely different market and product concepts, the future is the development of a variety of applications. The development of innovative technology is also a new opportunity for the future development of supply chain.

b. Excellent R&D capability and increasing product competitiveness

The Company is committed to process technology and product development and innovation, and in recent years we have been expanding our product applications, improving our manufacturing technology, and integrating our products across fields to enhance the added value of our products and provide better consumer experience.

The Company has improved our CAE capabilities, and have performed mechanical analysis, mold flow analysis, high-frequency electromagnetic field analysis, and mechanism design reviews, and have used a multi-faceted design review approach to improve product quality and stability, and to conduct mass production analysis and cost

analysis to effectively reduce production costs.

By introducing automated design logic and processes, the company enhances product quality and stability, reduce design risk, extend our competitive advantage to a full range of services, build more reliable customer relationships, and expand our global market share by expanding regional markets and applications with strategies such as "complementary cooperation", "technology leadership", and "complete solutions".

c. Good quality and stability, widely recognized by customers

The company has introduced advanced R&D, production and testing equipment to effectively shorten the product development time, and at the same time, enhance the testing capability to improve product reliability and quality control for customers. This has been recognized by most of our customers, which will help us to expand our customer base and product development in the future.

d. Active expansion of international marketing channels with high growth potential

In order to establish long-term development goals and provide more comprehensive services to our customers, it is inevitable that the company will establish international marketing channels and offices in the hope that we will be able to grasp market dynamics in the future effectively.

(2) Unfavorable factors for future development and its response measures

a. The global economy, market and environment are changing drastically, and the company needs to adjust the pace more quickly to cope with the changes.

In the past, the upstream, midstream and downstream of the connector industry have been affected by financial turmoil. The rise of the consumer market in China, the significant growth of basic wages, and the reduction of exchange rates in Japan and Korea to enhance the competitiveness of the country have changed the ecology of the industry. The U.S., European, and Japanese companies producing high-end or high-end technology connectors are starting to enter the market for different applications due to profit considerations; while China has nurtured new operators under the operation of Taiwanese companies for many years, and with the support of the Chinese government, threatening Chinese suppliers are joining the battle.

In response to the policy:

It is necessary to accelerate the pace of adjustment to think about new strategies and review the points and aspects that have not been studied in the past. For example, upstream materials are seldom explored for key, electrical and thermal conductivity, and price considerations. Most Taiwanese manufacturers use brass and phosphor bronze, the latter of which has always had a lower proportion. Still, in high-end products, the use of phosphor bronze may be as high as 90%, so process technology must be adjusted in response. In addition, the rise of environmental awareness has also caused materials to be emphasized, and environmentally friendly materials will often make mature technologies obsolete and re-development.

As most Taiwanese manufacturers are small and medium-sized enterprises, strategic alliances are more feasible than mergers and acquisitions. The strategic partnership can maximize resources, especially the mutual granting of patent rights and information sharing.

b. Reducing production costs has reached the limit. Taiwan manufacturers need to strengthen the special competitive advantage

In the past, Taiwan manufacturers specialize in manufacturing and cost control. Still, the experience to a certain extent limits the development momentum of Taiwanese companies, such as limiting the operating model of the IT industry and capital expenditure on equipment. In terms of manpower and advanced technology, it is limited by the organizational structure and habits, it is difficult to effectively invest, so competitiveness can not meet the changing environment. As the connectors have reached a mature stage, the price sensitivity of downstream manufacturers has been increasing. After the basic wage increase in Mainland China and the rise of China-invested enterprises, connector

manufacturers have moved to other regions in Mainland China or other countries to set up factories with lower labor costs.

In response to the policy:

Under the influence of the global economic downturn, high-end automotive and medical industry manufacturers have started to focus on reasonably priced and stable quality component suppliers.

c. High proportion of foreign sales, which are more affected by exchange rates

The company's business mainly exports and receives a large amount of foreign currency. In addition, the company's subsidiaries' primary business activities are located in mainland China. Their transactions are mainly in the local currency so that exchange rate fluctuations will affect the company's revenue and profit to a certain extent.

In response to the policy:

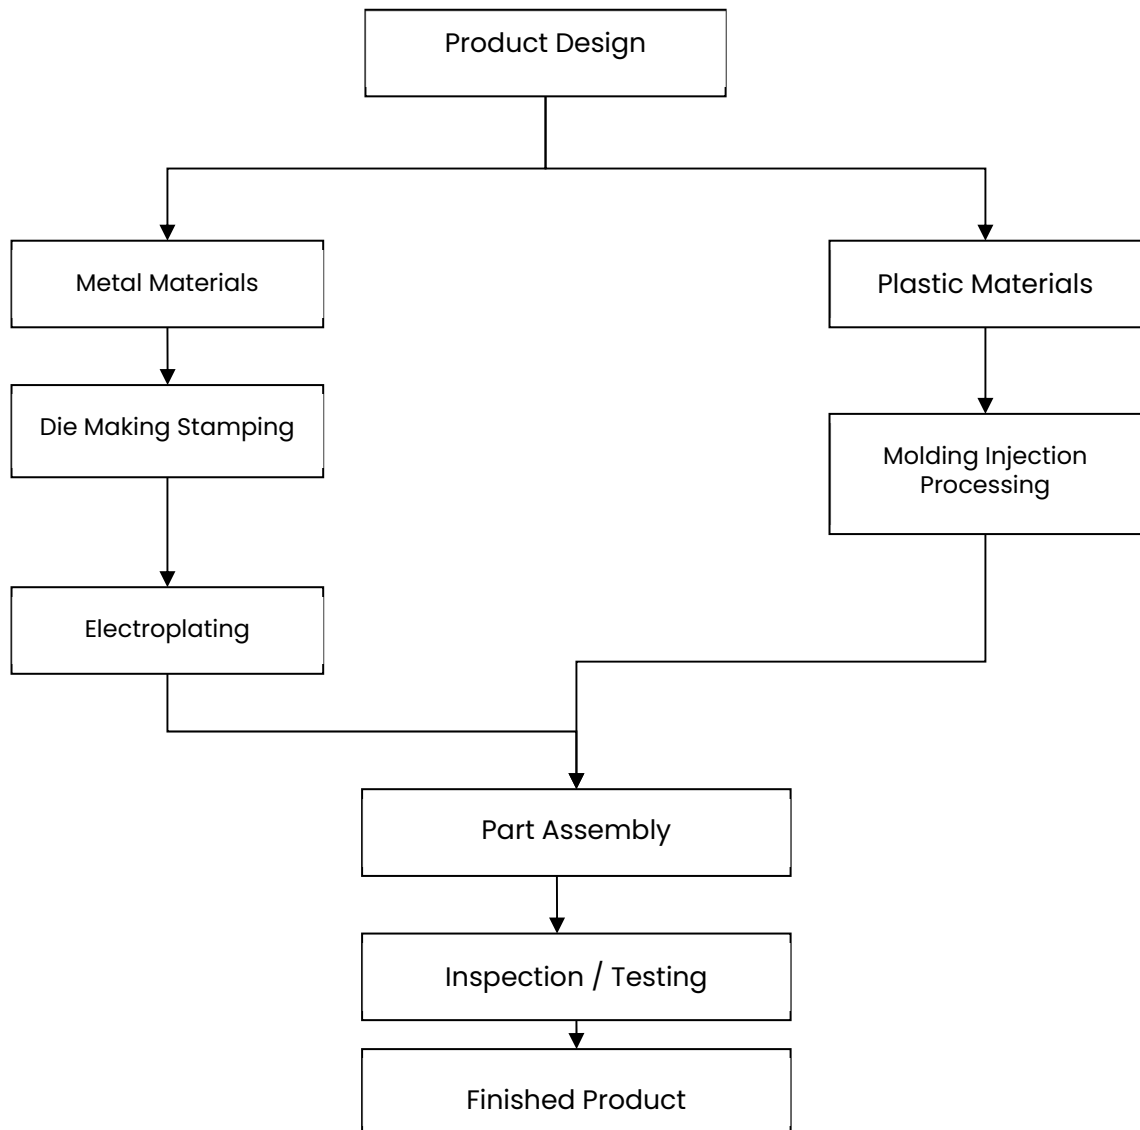

The Company and its subsidiaries' hedging strategy is to enter into forward exchange contracts (Forward) or exchange rate swap contracts (SWAP) with financial institutions to manage the exchange rate risk of the net foreign currency positions arising from sales and purchase transactions. With the expectation of effectively reducing the impact of exchange rate changes on revenue and earnings. However, although this hedging strategy effectively reduces the company's and its subsidiaries' exchange rate risk, it cannot eliminate the impact of changes in foreign currency exchange rates.

(II) Important Applications and Production Processes of Major Products

1. Important Applications of Major Products

Product	Main Applications
Connectors	<ul style="list-style-type: none"> • portable electronic devices: cell phones, PC/NB, tablet PCs, and wearable electronic products • Digital home appliances: digital TVs, DVD players, game consoles, set-top boxes, and other digital music products • Digital data storage: portable storage devices or hard drives • High-speed video and audio transmission interfaces: display applications, mobile devices, digital home appliances • Automotive, medical and industrial related devices
Cables	<ul style="list-style-type: none"> • Portable electronic devices: cell phones, PC/NB, tablet PCs, wearable electronics • Automotive, medical and industrial related devices

2. Production process of major products

1. Supply Status of Major Raw Materials

Major raw materials	Supply situation
PCBA	Good and normal
Copper	Good
Plastics	Good and normal
Electronic materials	Good and normal

2. The names of customers who have accounted for more than 10% of the total purchase (sales) in any of the last two years, the amount and proportion of their purchase (sales), and the reasons for the increase or decrease.

(1) Major Importers

Unit: NT\$ thousand

Item	2022				2023				2024 of Q1			
	Company Name	Amount	%	Relation with Issuer	Company Name	Amount	%	Relation with Issuer	Company Name	Amount	%	Relation with Issuer
1	Company A	414,555	16.62	Nil	Company A	134,836	13.64	(Note)	Company A	17,334	10.57	Nil

IV. Environmental Protection Expenditure Information

1. Description of the application, payment or establishment of a pollution permit or pollution discharge permit, or the payment of pollution prevention and control fees, or the establishment of a special unit for environmental protection, as required by law: Not applicable.
2. List the company's investment in major equipment for environmental pollution prevention and control, its use and possible benefits: None.
3. The company's environmental pollution improvement process in the last two years and up to the date of publication of the public statement, and if there are pollution disputes, the process of handling them: None.
4. The total amount of losses (including compensation) and penalties suffered by the company as a result of environmental pollution in the last two years and up to the date of publication of the public statement, as well as its future countermeasures (including improvement measures) and possible expenses (including the estimated amount of losses, penalties and compensation that may occur if no countermeasures

are taken, and if the amount cannot be reasonably estimated, the fact that it cannot be reasonably estimated): None.

5. Description of the current pollution situation and its impact on the company's earnings, competitive position and capital expenditures, as well as the estimated significant environmental capital expenditures in the next two years: Not applicable.

V. Labor relations

- i. The company's employee welfare measures, training, training and retirement systems and their implementation status, as well as the agreements between employers and employees and measures to protect the rights and interests of employees:

1. Employee welfare measures:

- (1) Labor insurance, health insurance and group insurance (life insurance, accident insurance, hospitalization medical insurance, cancer insurance).
- (2) Three festivals gifts, birthday coupons, spring festival gift coupons and year-end dinners and lottery.
- (3) Employees' bonus.
- (4) Subsidies for wedding and funeral celebrations.
- (5) Funeral and burial benefits (for oneself, parents, spouse and children).
- (6) Meal subsidies.
- (7) Overseas and domestic travel from time to time.
- (8) Regular employee medical checkups.
- (9) Provide employee education and training.
- (10) Childcare allowance: Besides the childbirth allowance, we provide a monthly childcare allowance of NT\$2,500 for each child until the child reaches the age of six.
- (11) Other welfare activities (family day, hiking and art activities, etc.).

2. Staff Training and Training Status:

In order to assist new employees to enter the working condition as soon as possible, the company will arrange training courses according to different job categories through pre-employment training, and the team group of the department will assist new employees to understand the company's industrial positioning and the future development direction of the company. The company will hold professional internal training courses from time to time, so that employees can receive new information on professional skills at any time, and through technical seminars to enhance their own process and research and development capabilities. In addition, for the on-the-job training of employees, each department may arrange appropriate education courses within the company according to the actual needs, or arrange for employees to attend training courses held by various consulting companies, training institutions, or government and industrial organizations according to the needs of the professional courses of each function, in order to enhance the professionalism of employees. In addition to the training for new recruits, the following table summarizes the results of education and training for 2023:

Organizer	Course Name	Hours
Internal Training	2023 Prohibition and prevention of insider trading.	1
Internal Training	2023 Integrity Handbook Training (Code of Conduct for Employees) Training for all staff.	1
Internal Training	Crimping Design Test Sharing	1.5
Internal Training	FMEA Potential Failure Mode and Effects Analysis Version 5 Education Training	2.5
Internal Training	The European General Data Protection Regulation ("GDPR") Education	2

Organizer	Course Name	Hours

Internal Training	Manufacturing production characteristics of magnets.	1.5
Internal Training	Institutional Design Standards & Relevance of Design and Appearance Issues (1).	1
Internal Training	The design check list of the burning test tool is shared with the design.	1.5

3. Retirement system and its implementation status:

Following the company's regulations, starting from July 1st, 2005, the company made monthly contributions of 6% of monthly wages to the individual pension accounts of the Labor Insurance Bureau for new employees and existing employees who have elected the new pension plan. The appropriate amount of retirement reserve is transferred to the Bank of Taiwan's particular account. For employees assigned by the organization to move to affiliated companies, their seniority is renewed to provide more protection for employees to achieve the purpose of talent circulation of the Group. Employees of overseas subsidiaries pay monthly pensions and medical benefits following local government regulations.

Pension System	Old System	New System
Applicable Sources	Labor Standards Act	Labor Pension Act
How to contribute	2% of the monthly salary of employees who choose the old system and deposit it in the name of the company into the special account of the Bank of Taiwan (formerly the Central Trust Bureau).	6% of the monthly salary of employees is contributed to the individual account of the Bureau of Labor Insurance according to the employee's level of insurance.
Withdrawal amount	The accumulated amount of the Labor Retirement Reserve is NT\$ 6,284 thousand.	The total amount contributed was NT\$3,975thousand in 2023.

4. Agreements between employers and employees:

To take good care of employees, the company has established a vacation, welfare, and retirement system and set up an employee welfare committee and a labor-management

meeting to coordinate employee welfare measures. Therefore, the employees have a high degree of loyalty to the company. The relationship between the employees and employers is harmonious, with no labor disputes or disputes so far.

5. Employee rights and benefits protection measures:

The company attaches importance to, cares about, and proactively maintains employees' fundamental rights and interests. In addition to handling employees' rights and interests by following relevant laws and regulations, the company also provides employee group insurance coverage. It establishes an employee welfare committee as a gatekeeper for employees' rights and interests.

6. For personnel related to the transparency of financial information, the following are the relevant licenses obtained as specified by the competent authorities

A. Professional certification for the head of finance and accounting of public companies:

1 person of the Finance Department.

B. Basic Competency Test for Corporate Internal Control held by the Securities and Futures Bureau:

1 persons of the Audit Office.

Therefore, the qualifications of the company's personnel related to the transparency of financial information comply with the regulations of the competent authorities.

C. The most recent year 2023 of continuing education for accounting and auditing supervisors:

Organizer	Course Name	Hours
Accounting Research and Development Foundation	Continuing education for accounting executives.	12
The Institute of Internal Auditors	Noticeable Matters and Practical Analysis of Shareholders' Meetings and Company Laws	6
The Institute of Internal Auditors	Internal Audit Digital Transformation and Emerging Technology Applications	6
Securities and Futures Institute	How Audit Interprets Financial Information and Insights into Financial Fraud Analysis	6
Securities and Futures Institute	What Auditors Should Know About Fraudulent Corporate Practices	6

7. Work environment and employee safety protection measures

The company regards employees as the most critical asset of the company. It attaches great importance to the working environment and the safety of employees. We hope to fulfill our social responsibility and move towards sustainability while the company grows. In addition to complying with relevant domestic laws and regulations, we have established and implemented a safety and health management plan accordingly. The company regularly implement work environment monitoring, safety and health inspections and audits, safety and health education and training, and fire education and training. The company conducts annual health checkups to help employees understand their physical condition and provide follow-up medical consultation services.

The company had no occupational safety incidents in the past three years.

8. Code of conduct or ethics for employees

To ensure harmonious labor relations, consolidate the company's excellent corporate culture and core values, and fulfill the goal of sustainable development, the company also implemented the retirement system and the provisions of labor-management negotiation meetings. Following the law, the "Work Rules" and various personnel management regulations specify that both employees and employers of the company should be committed to establishing corporate and

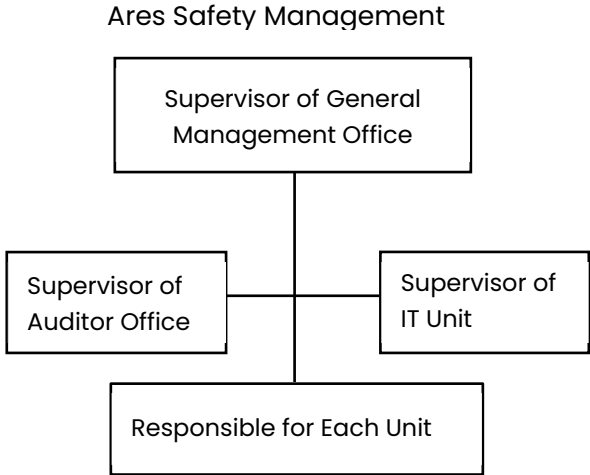

professional ethics. This allows employees to understand their behavior clearly or that ethics should follow the code of conduct to ensure the company's development. The main regulations are as follows:

- (1) Employees shall work conscientiously internally, give full play to their team spirit, take care of public property, reduce losses, provide quality, increase production, and perform their tasks faithfully; externally, they shall protect the honor of the company and keep the confidentiality of their business or duties, and shall not divulge information regarding business contents, product technology, related documents and drawings, or the status of customers' dealings with the company.
 - (2) Employees shall not use their authority to benefit themselves or others by accepting gifts, invitations to banquets, kickbacks or other unlawful benefits from others.
 - (3) Employees shall not, without the written consent of the company, operate a business related to or similar to the company for themselves or a third party, nor shall they be an unlimited liability shareholder, executive shareholder, director or manager of a similar business, or an obvious or anonymous partner of a firm.
 - (4) The company shall not use the name of the company for any purpose other than to carry on the business of the company.
- ii. Losses suffered from labor disputes in the most recent year and up to the printing date of the annual report, and disclose the estimated amount of current and future losses and measures that may be taken.
- Suppose it is not possible to make a reasonable estimate. In that case, it should state the fact that it is not possible to make a reasonable estimate:
- Since its establishment, the company has had harmonious labor relations and has not experienced any losses due to labor disputes.
- The possibility of future losses due to labor disputes is extremely low.

VI. Information security management

I. Risk management structure of information security

1. The information security management unit is subordinate to the Head Office, please refer to the figure below for the information security management structure. The top supervisor of the Head Office is the top supervisor of information security. The head of the Information Department is the main executive officer. The audit supervisor is responsible for the supervision of operation execution. The accountable personnel of each unit under the Head Office are responsible for the formulation of internal information security policies, planning and execution of information security operations, and promotion and implementation of information security

The audit Office is the supervisory unit of information and communication security monitoring and is responsible for supervising the status of internal information security implementation.

2. The information security policy follows the following instructions:

- (1) To prevent unauthorized access, use, control, leakage, destruction, tampering, destruction or other infringement of information or information systems, and to ensure their confidentiality, integrity, and availability as defined by the regulations, and to conduct semi-annual "information security inspection and control" spot checks on nine major items. Audit.
- (2) It is operated in the way of Plan→Do→Check→Action to protect the confidentiality, integrity, and availability of information assets.
- (3) In order to implement the protection of confidentiality, integrity and availability of information assets, the organization shall continuously
 - A. Enhance information security consensus and strengthen information security training.
 - B. Improve information security protection to ensure operation continuity.

3. Specific management plan

- (1) Insured Information Security Insurance
- (2) Network
 - A. Build a network firewall.
 - B. Strengthen the security of firewall and network, sign maintenance contract every year, and update the security protection on the firewall such as intrusion detection, virus, webpage, etc. immediately.

- C. Internal to internal and internal to external are separated by different policies and controls, and the server side only opens the service port and prohibits non-service port connections.
- D. External to internal VPN privilege control and server port control.
- E. Cross-plant endpoints are controlled by another firewall and protected by permission policies.
- F. Anti-virus system is built to protect computer endpoints from malware and viruses.
- G. Email filtering mechanism for viruses, advertisement letters and phishing letters.
- H. Real-time monitoring of network service operation status.

(3) Backup Storage

- A. Establish backup and redundancy system.
- B. Implement hot backup for important data.
- C. Implement offline backup of important data.
- D. Implement offline backup of important data.
- E. Backup more than three copies of important data.
- F. Check the backup status daily.
- G. Monthly backup data restoration test for important data.

(4) Personnel

- A. Each staff will be assigned a dedicated account and password.
- B. Regularly implement email social engineering exercises.
- C. Regularly implement information security education training and examinations to enhance employees' information security awareness.
- D. Regularly implement information security propaganda for e-mail and anti-virus.
- E. Regularly check the operation of anti-virus software.
- F. Endpoint protection monitor user installation of software.
- G. Regularly audit user installation of software.

4. Ancillary Security Response Operations

(1) Purpose

We have established these operation points to follow the notification and response mechanism in the event of an information security incident and to deal with the incident promptly and effectively.

(2) Scope of Application

Any information system, service, or network status of the company that is identified to violate information security concerns or protection measures failures, poses a threat to information security, shall be considered.

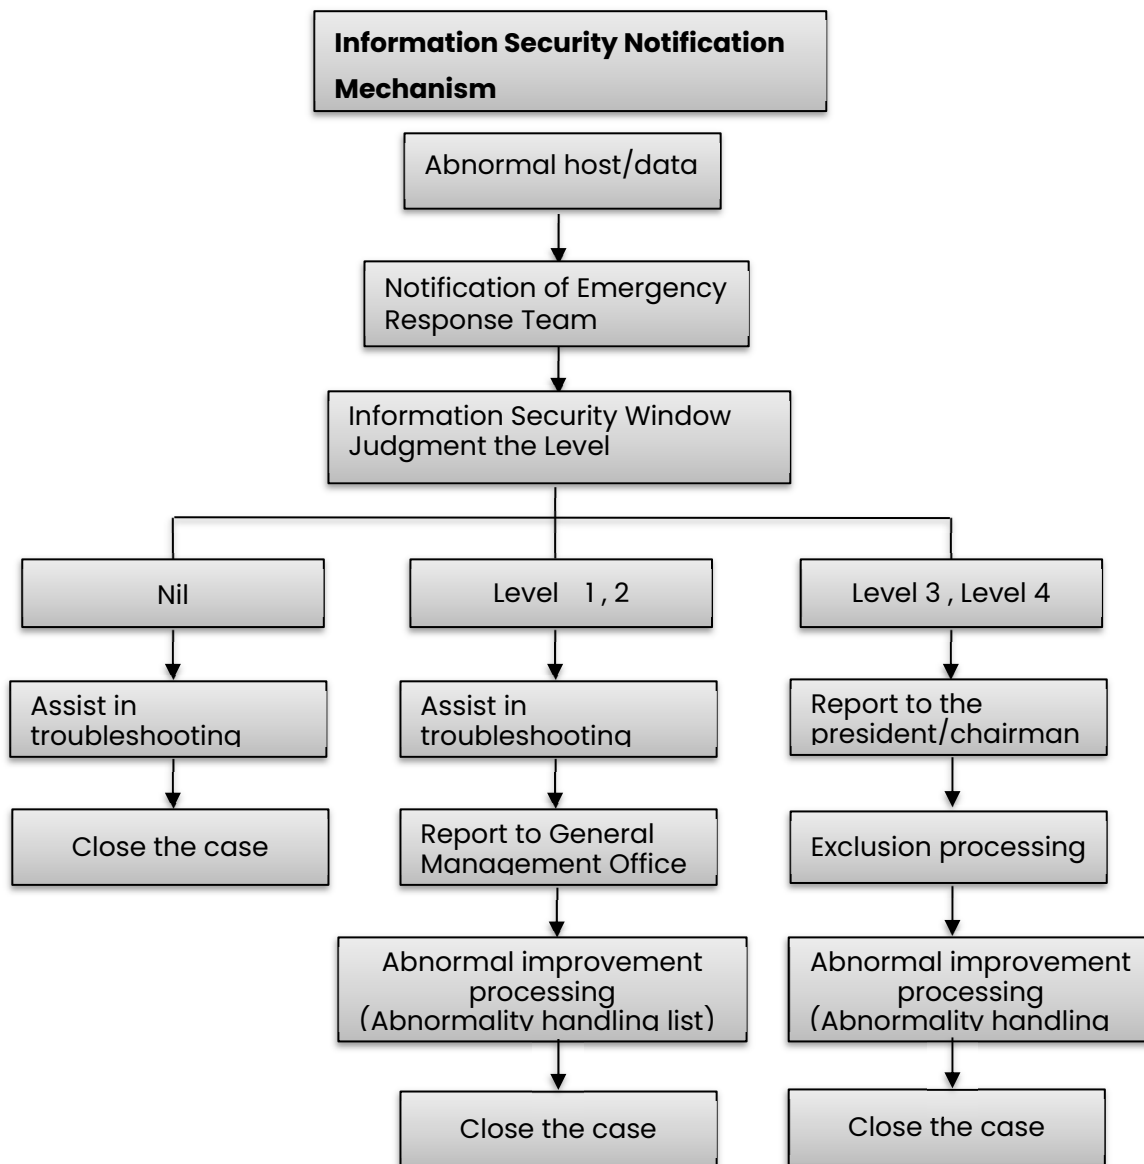

(3) Job Responsibilities

When an information security event is discovered, the information supervisor of the company shall judge the information security event notification and complete the contingency operation according to the event level.

The company's information department is the emergency response team responsible for handling and improving abnormalities during abnormal information security events.

Event Level Judgment

Valuation Category Level of Impact	Confidentiality	Integrity	Availability
Level 1	Non-core business data Leaked	Non-core business systems or data is tampered with	Disruption or temporary suspension of non-core business operations (Separate computer level)
Level 2	Non-confidential or sensitive core business information Leaked	Core business systems or data is slightly tampered with	Core business operations are disrupted or system efficiency is reduced, and normal operations are resumed within a tolerable interruption time. (Office area)
Level 3	Confidential or sensitive official information leaked	core business system or information is seriously tampered with	Core business operation is affected or system is stopped and cannot be restored to normal within tolerable interruption time. (Within the scope of Level 1)
Level 4	Company confidential information leaked	The critical information infrastructure system or data tampered with	The system has been stopped and the normal operation cannot be resumed within the tolerable interruption time. (beyond the scope of the Level 1 plant)

5. Significant information and communications security incidents:

There were no significant information security incidents for the most recent year and as of the date of the annual report.

6. Implementation

(1) Education and training implementation:

The number of people who completed the training in 2023: 69,
Completion rate: 100%.

(2) Email social engineering exercises

In 2023, 370 e-mails were sent for the exercise, and the result of the exercise was 11 opened letters (14.9%), 0 clicked links (0%), and 4 opened attachments (5.4%).

VII. Significant Contracts:

As of the printing date of the annual report, there are still good supply and sales contracts, technical cooperation contracts, engineering contracts, long-term loan contracts, and other contracts of significant importance to shareholders' equity that have expired in the most recent year.

As of the printing date of the annual report, the company had good supply and sales contracts, technical cooperation contracts, engineering contracts, long-term loan contracts, and other contracts of significance to shareholders' equity.

VI. Financial Information

I. Condensed financial statements for the most recent 5 years

I. Condensed balance sheet and comprehensive income statement

(1) Condensed Consolidated Balance Sheet

International Financial Reporting Standards (IFRS)-

Total comprehensive income	143,751	80,579	111,623	263,017	(80,888)	
Earnings per share	3.30	1.10	1.39	3.12	(1.04)	

Note: The financial information of the most recent five annual periods have been verified by CPAs.

II. Names and audit opinions of the attesting CPAs for the last five years

1. The names of CPA and their opinions for the most recent five years.

Year	CPA Firm	CPA's Name	Auditing Opinion
2019	Ernst & Young	Julia Lo 、Hong, Mao-I	Unqualified opinion
2020	Ernst & Young	Julia Lo 、Hong, Mao-I	Unqualified opinion
2021	Ernst & Young	Chen, Guo-Shuai 、Hong, Mao-I	Unqualified opinion
2022	Ernst & Young	Chen, Guo-Shuai 、Hong, Mao-I	Unqualified opinion
2023	Ernst & Young	Chen, Guo-Shuai 、Lin, Cheng-Wei	Unqualified opinion

2. If there is any change of accountant in the last five years, the company, predecessor and successor accountants should list the reasons for the change:

The replacement of the CPA in 2021 and 2022 is due to the internal adjustment of the certified accounting firm, so it is not applicable.

II. Analysis of important financial ratios for the last 5 years

(i) Consolidated financial ratio analysis - IFRS

Analysis Item		Financial analysis in the past five years (Note 1)					As of March 31, 2024 of Financial Information (Note 2)
		2019	2020	2021	2022	2023	
Financial Structure (%)	Ratio of liabilities to assets	31.26	21.98	37.62	29.76	20.88	19.95
	Ratio of long-term capital to property, plant and equipment	381.32	442.80	303.15	352.19	292.14	287.29
Solvency (%)	Current ratio	254.56	370.38	202.91	264.49	297.53	301.57
	Quick ratio	222.96	334.95	133.18	197.29	227.05	235.92
	Times interest earned ratio	55.64	76.18	47.18	82.44	Note 5	Note 5
Operating Ability	Accounts receivable turnover (turns)	4.46	3.61	5.63	5.03	3.29	3.89
	Average collection period	82	101	65	73	111	94
	Inventory turnover (turns)	4.67	3.65	5.09	4.91	3.67	3.75
	Accounts payable turnover (turns)	6.35	5.16	7.10	7.10	5.92	6.43
	Average days in sales	78	100	72	74	99	97
	Property, plant and equipment turnover (turns)	5.54	3.61	5.21	5.29	2.70	1.92
	Total assets turnover (turns)	1.24	0.65	1.11	1.19	0.66	0.55
Profitability	Return on total assets (%)	13.88	4.87	4.68	10.27	-3.17	-9.61
	Return on stockholders' equity (%)	21.41	6.46	6.73	15.30	-4.41	-12.17
	Ratio of Pre-tax income to issued capital (%)	40.87	12.16	21.83	58.26	-12.07	-7.78
	Profit ratio (%)	10.98	7.41	4.11	8.54	-4.95	-17.78
	Earnings per share (\$)	3.30	1.10	1.39	3.12	-1.04	-0.59
Cash Flow	Cash flow ratio (%)	90.46	39.97	2.64	64.94	91.91	6.53
	Cash flow adequacy ratio (%)	117.30	114.96	115.99	162.12	151.97	151.97
	Cash reinvestment ratio (%)	28.64	9.22	Note 3	13.53	5.14	1.10
Leverage	Operating leverage	3.69	4.76	4.82	3.54	Note 4	Note 4
	Financial leverage	1.02	1.01	1.02	1.01	Note 4	Note 4

Analysis of financial ratio change in the last two years. (If the difference does not exceed 20%, the analysis is not required.)

1. The decrease in the ratio of liabilities to assets compared to the previous period was mainly due to the the repayment of long-term loans.
2. The decrease in operating profitability was mainly due to a 52% decline in revenue.
3. The decrease in profitability indicators was mainly due to a 52% decline in revenue, resulting in a loss for the period.
4. The decrease in cash flow ratio was mainly due to a 44% decrease in current liabilities.
5. The decrease in cash reinvestment ratio was mainly due to the increase in cash disbursement during the period.

Note 1: The financial information of the most recent five annual periods have been verified by CPAs.

Note 2: The financial information for the year ended March 31, 2024 has been reviewed by accountants.

Note 3: If the net cash flow from operating activities is an outflow, it has no comparative significance, so the relevant ratio will not be listed.

Note 4: If the operating profit is negative, there is no comparative significance, so the relevant ratio will not be listed.

Note 5: If the net profit before income tax and interest expense is negative, there is no comparative significance, so the relevant ratio will not be listed.

(2) Financial Analysis-IFRS (Standalone Financial Statements)

Analysis Item		Year	Financial analysis in the past five years (Note 1)					As of March 31, 2024 of Financial Information
		2019	2020	2021	2022	2023		
Financial Structure (%)	Ratio of liabilities to assets	33.62	20.80	26.93	16.11	14.30	N/A	
	Ratio of long-term capital to property, plant and equipment	7,501.63	931.11	1,132.30	1,313.48	1,012.80		
Solvency (%)	Current ratio	243.39	351.41	152.91	214.21	183.94		
	Quick ratio	239.29	344.18	146.91	201.53	167.94		
	Times interest earned ratio	60.59	114.31	54.60	96.05	Note 4		
Operating Ability	Accounts receivable turnover (turns)	4.30	3.43	4.41	4.54	4.59		
	Average collection period	85	106	83	80	79		
	Inventory turnover (turns)	92.21	38.67	45.03	33.96	19.02		
	Accounts payable turnover (turns)	5.53	2.85	5.96	8.98	9.22		
	Average days in sales	4	9	8	11	19		
	Property, plant and equipment turnover (turns)	123.71	11.16	8.27	7.58	4.71		
	Total assets turnover (turns)	1.28	0.62	0.64	0.53	0.36		
Profitability	Return on total assets (%)	15.20	5.13	5.58	11.82	-4.26		
	Return on stockholders' equity (%)	22.62	6.86	7.22	14.94	-5.15		
	Ratio of Pre-tax income to issued capital (%)	34.76	12.23	16.73	33.53	-10.61		
	Profit ratio (%)	11.70	8.25	8.52	22.21	-11.97		
	Earnings per share (\$)	3.30	1.10	1.39	3.12	-1.04		
Cash Flow	Cash flow ratio (%)	71.89	30.14	12.39	99.35	72.83		
	Cash flow adequacy ratio (%)	391.27	194.06	203.03	217.28	152.14		
	Cash reinvestment ratio (%)	32.21	7.39	0.66	7.30	-4.58		
Leverage	Operating leverage	3.15	3.96	3.45	4.09	Note 3		
	Financial leverage	1.03	1.01	1.03	1.05	Note 3		

Analysis of financial ratio change in the last two years. (If the difference does not exceed 20%, the analysis is not required.)

- The decrease in the ratio of long-term capital to property, plant and equipment was mainly due to the decrease in total equity as a result of the loss for the period.
- The decline in inventory turnover and the increase in average sales days were mainly due to the decrease in cost of goods sold during the period.
- The decrease in turnover of property, plant and equipment and total asset turnover was mainly due to the 37.85% decline in revenue during the period.
- The decrease in profitability was mainly due to the loss for the current period.
- The decrease in cash flow ratio was mainly due to the fact that net cash inflow from operating activities decreased more than current liabilities.
- The decrease in cash flow adequacy ratio was mainly due to the increase in cash dividends paid during the period.
- The decrease in cash reinvestment ratio was mainly due to the decrease in net cash flow from operating activities and increased the distribution of cash dividends during the period.

Note 1: The financial information of the most recent five annual periods have been verified by CPAs.

Note 2: If the net cash flow from operating activities is an outflow, it has no comparative significance, so the relevant ratio will not be listed.

Note 3: If the operating profit is negative, there is no comparative significance, so the relevant ratio will not be listed.

Note 4: If the net profit before income tax and interest expense is negative, there is no comparative significance, so the relevant ratio will not be listed.

The calculation method of the ratio in the above table is listed as follows:

1. Financial structure

- (1) Ratio of debts to asset = $\text{Total liabilities} / \text{Total assets}$
- (2) Ratio of long-term capital to property, plant, and equipment = $(\text{Total equity} + \text{Non-current liabilities}) / \text{Net property, plant and equipment}$

2. Solvency

- (1) Current ratio = $\text{Current assets} / \text{Current liabilities}$.
- (2) Quick ratio = $(\text{Current assets} - \text{Inventories} - \text{Prepaid expenses}) / \text{Current liabilities}$
- (3) Interest coverage ratio = $\text{Net income before income tax and interest expense} / \text{Interest expenses over this period}$.

3. Operating ability

- (1) Receivable (including accounts receivable and notes receivable due to business operations) turnover rate = $\text{Net sales} / \text{Balance of average accounts receivable for various periods (including accounts receivable and notes receivable due to business operations)}$.
- (2) Average collection days for receivables = $365 / \text{Receivables turnover rate}$.
- (3) Inventory turnover rate = $\text{Cost of goods sold} / \text{Average inventory}$.
- (4) Payable (including accounts payable and notes payable due to business operations) turnover rate = $\text{Cost of goods sold} / \text{Balance of average accounts payables of various periods (including accounts payable and notes payable due to business operations)}$.
- (5) Average days for sales = $365 / \text{Inventory turnover rate}$.
- (6) Property, plant and equipment turnover rate = $\text{Net sale} / \text{Average net property, plant and equipment}$.
- (7) Total asset turnover rate = $\text{Net sales} / \text{Average total assets}$

4. Profitability

- (1) Return on assets = $[\text{Net income after taxes} + \text{interest expense} \times (1 - \text{tax rate})] / \text{Average total assets}$
- (2) Return on equity = $\text{Net income after taxes} / \text{Average total equity}$
- (3) Profit margin = $\text{Net income after taxes} / \text{Net sales}$
- (4) Earnings per share = $(\text{Net income attributable to shareholders of the parent company} - \text{preferred stock dividend}) / \text{Weighted average number of shares outstanding (Note 1)}$

5. Cash flow

- (1) Cash flow ratio = $\text{Net cash flow of operating activities} / \text{Current liabilities}$.
- (2) Cash flow adequacy ratio = $\text{Net cash flow from operating activities for the most recent five years} / (\text{Capital expenditures} + \text{inventory increase} + \text{cash dividend}) \text{ for the most recent five years}$.
- (3) Cash flow reinvestment ratio = $(\text{Net cash flow from operating activities} - \text{cash dividends}) / (\text{Gross value of property, plant, and equipment} + \text{Long-term investments} + \text{Other non-current assets} + \text{working capital})$. (Note 2)

6. Leveraging

- (1) Operating leverage = $(\text{Net operating revenue} - \text{variable operating cost and expenses}) / \text{Operating profit}$. (Note 3)
- (2) Financial leverage = $\text{Operating profit} / (\text{Operating profit} - \text{interest expenses})$.

Note1: The following factors are to be included in the consideration for the calculation of earnings per share:

1. It is based on the weighted average common stock shares instead of the outstanding stock shares at year end.
2. For capitalization with cash or treasury stock trade, the stock circulation must be included for consideration to calculate weighted average shares.
3. For capitalization with retained earnings and additional paid-in capital, the earnings per share calculated semi-annually and annually must be adjusted retroactively and proportionally to the capitalization but without considering the issuance period of the

capitalization.

4. If preferred stock shares are nonconvertible and cumulative, the dividend of the year (whether it is distributed or not) should be deducted from net income or added to the net loss. If preferred shares are not cumulative, preferred stock dividend should be deducted from net income if there is any but it needs not be added to net loss if there is any.

Note2: The following factors are to be included for consideration for the analysis of cash flow:

1. Net cash flow from operating activity meant for the net cash inflow from operating activity on the Cash Flow Statement.
2. Capital expenditure meant for the cash outflow of capital investment annually.
3. Increase of inventory is counted only when ending inventory exceeds beginning inventory. If the ending inventory is decreased, it is booked as zero value.
4. Cash dividend includes the amount for common stock and preferred stock.
5. Gross Property, land and equipment for the total Property, land and equipment before deducting the cumulative depreciation.

Note3: Issuer should classify operating cost and operating expense according to fixed and variable category. If the classification is estimated and subjective, it should correspond with rationality and consistency.

Note4: In the case of shares issued by a company with no par value or a par value other than NT\$10 per share, the calculation of ratio of the paid-in capital shall be replaced by ratio of the equity attributable to owners of the parent.

III. Audit Committee's Review Report in the Most Recent Year

Simula Technology Inc. Audit Committee's Review Report

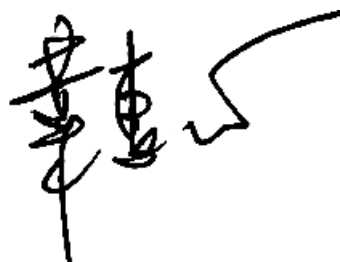

The Board of Directors has prepared the Company's Financial Statements (including consolidated financial statement) for the year of 2023. Mr. Chen, Guo-Shuai and Lin, Cheng-Wei of the Certified Public Accountants of EY-Taiwan, have audited the Financial Statements. The 2023 Financial Statements, Business Report, Independent Auditors Report and the Company's 2023 Proposal for Allocation of Profits and Losses have been reviewed and determined to be correct and accurate by the Audit Committee of the Company. I, as the Chair of the Audit Committee, hereby submit this report according to the Article 219 of the Company Act.

Sincerely,

2024 Annual Shareholders' Meeting

Simula Technology Inc.

Audit committee convener: Yeh, Hui-Hsin

February 23, 2024

IV. Consolidated Financial Statements with Independent Auditors' Report of the most recent year:

Please refer to Appendix 1 (Pages: 107-220).

V. Parent Company only Financial Statements with Independent Auditors' Report for the most recent year:

Please refer to Appendix 2 (Pages: 221-318).

VI. Any financial difficulties experienced by the Company and its affiliate businesses during the most recent year up to the publication date of this report need to be stated as well as the impact on the Company's financial position need to be outlined:

None.

VII. Review and Analysis of Financial Status, Financial Performance, and Risk Management

I. Analysis of Financial Status

(1) Financial Status - Consolidated (Based on IFRSs)

Item	Year	2023	2022	Difference		Explanation
				Amount	%	
Current Assets		1,403,652	2,227,169	(823,517)	-36.98	1
Property, Plant and Equipment		741,140	768,468	(27,328)	-3.56	
Non-current Assets		492,129	552,910	(60,781)	-10.99	
Total Assets		2,636,921	3,548,547	(911,626)	-25.69	1
Current Liabilities		471,764	842,068	(370,304)	-43.98	2
Non-current Liabilities		78,813	213,754	(134,941)	-63.13	3
Total Liabilities		550,577	1,055,822	(505,245)	-47.85	2.3
Capital Stock		799,729	799,729	-	-	
Capital Surplus		551,718	551,718	-	-	
Retained Earnings		134,664	417,903	(283,239)	-67.78	4
Other Equity		(7,462)	(9,881)	2,419	24.48	
Non-controlling Interests		607,695	733,256	(125,561)	-17.12	5
Total Equity		2,086,344	2,492,725	(406,381)	-16.30	4.5

The main reasons for significant changes exceeding 20% in the current and preceding periods, with the change amount exceeding NT\$10 million, along with their impact analysis, are as follows:

1. The decrease was mainly due to the decrease in bank deposits as a result of cash dividends and repayment of loans, and the decrease in accounts receivable and inventories, which accounted for 52% of the decrease in revenue.
2. The decrease in accounts payable was mainly due to a 52% decline in revenue, a decrease in other payables due to unrecognized bonuses to employees and remuneration to directors and a decrease in income tax liabilities due to the loss for the current period.
3. The significant change is primarily due to the repayment of borrowings amounting to NT\$139,896 thousand.
4. Mainly as a result of cash dividends of \$298,574 thousand and losses during the period.
5. Subsequent to the significant decrease in profit of Star Technology Co., Ltd., a reinvestment company.

Future plans for dealing with significant changes:

Considering the overall performance of the company, there are no significant abnormal conditions that require the formulation of specific response plans.

(2) Financial Status - Standalone (Based on IFRSs) in the last two years

Unit: NT\$ thousand

Item	Year		Difference		Explanation
	2023	2022	Amount	%	
Current Assets	317,046	480,636	(163,590)	-34.04	1
Non-current Assets	1,408,420	1,616,601	(208,181)	-12.88	
Total Assets	1,725,466	2,097,237	(371,771)	-17.73	
Current Liabilities	172,360	224,378	(52,018)	-23.18	2
Non-current Liabilities	74,457	113,390	(38,933)	-34.34	3
Total Liabilities	246,817	337,768	(90,951)	-26.93	2、3
Capital stock	799,729	799,729	-	-	
Capital surplus	551,718	551,718	-	-	
Retained Earnings	134,664	417,903	(283,239)	-67.78	4
Other Equity	(7,462)	(9,881)	2,419	-24.48	
Total Equity	1,478,649	1,759,469	(280,820)	-15.96	4
<p>The main reasons and impact analysis for significant changes exceeding 20% in the current and preceding periods, with the change amount exceeding NT\$10 million, are as follows:</p> <ol style="list-style-type: none"> 1. The decrease was mainly due to the decrease in bank deposits as a result of cash dividends and repayment of borrowings, and the decrease in accounts receivable as a result of the 37.85% decline in revenue during the period: 2. The decrease in accounts payable was mainly due to a 37.85% decline in revenue, a decrease in other payables due to unrecognized bonuses to employees and remuneration to directors, and a decrease in income tax liabilities 3. The significant change is primarily due to the repayment of long-term borrowings amounting to NT\$40,000 thousand. 4. The significant change is primarily due to cash dividends and loss in the current period. <p>Future plans for dealing with significant changes: Considering the overall performance of the company, there are no significant abnormal conditions that require the formulation of specific response plans.</p>					

II. Financial Performance

(1) Comparative Analysis of Operating Results

1. Comparative Analysis of Consolidated Financial Performance (Based on IFRSs)

Unit: NT\$ thousand

Item	Year		Difference		Explanation
	2023	2022	Amount	%	
Net Revenue	2,039,055	4,231,024	(2,191,969)	-51.81	1
Cost of Sales	1,754,673	3,317,423	(1,562,750)	-47.11	1
Gross Profit	284,382	913,601	(629,219)	-68.87	1
Operating Expenses	371,020	481,974	(110,954)	-23.02	2
Profit and loss From Operations	(86,638)	431,627	(518,265)	-120.07	1、2
Non-Operating Income (Expenses)	(9,860)	34,315	(44,175)	-128.73	3
Income Before Tax	(96,498)	465,942	(562,440)	-120.71	1、2、3
Income Tax Expense	(4,552)	(104,625)	(100,073)	-95.65	4
Net income of continuing business units for the period	(101,050)	361,317	(462,367)	-127.97	1、2、3
Other comprehensive income - after tax	3,077	13,976	(10,899)	-77.98	5
Total comprehensive income	(97,973)	375,293	(473,266)	-126.1	

The main reasons and impact analysis for significant changes exceeding 20% in the current and preceding periods, with the change amount exceeding NT\$10 million, are as follows:

1. The decrease in operating revenues was mainly attributable to the slow inventory depletion in the industrial sector, which resulted in the Company's poor overall order intake, and the consequent decrease in operating costs and operating profit and loss.
2. The decrease was mainly due to a significant decrease in loss-making employees and directors' compensation expenses, as well as a significant decrease in variable expenses due to a 52% decline in revenue during the period.
3. The decrease was mainly due to the decrease of \$35,118 thousand in net foreign currency exchange (loss) gain and \$16,382 thousand in gain on disposal of property, plant and equipment.
4. Mainly due to loss for the period.
5. The decrease was mainly due to the decrease in the remeasurement of defined benefit plans and the decrease in the exchange differences on the translation of the financial statements of foreign operators.

2. Comparative Analysis of Standalone Financial Performance (Based on IFRSs)

Unit: NT\$ thousand

Item	Year	2023	2022	Difference		Explanation
				Amount	%	
Operating revenue		697,322	1,122,031	(424,709)	-37.85	1
Cost of sales		554,904	861,165	(306,261)	-35.56	1
Gross profit		142,418	260,866	(118,448)	-45.41	1
Operating expenses		163,171	197,532	(34,361)	-17.40	
Profit and loss from operations		(20,753)	63,334	(84,087)	-132.77	1
Non-operating income(expenses)		(64,079)	204,810	(268,889)	-131.29	2
Income before tax		(84,832)	268,144	(352,976)	-131.64	1、2
Income tax expense		1,382	(18,909)	20,291	-107.31	3
Net income of continuing business units for the period		(83,450)	249,235	(332,685)	-133.48	1、2
Other comprehensive income - after tax		2,562	13,782	(11,220)	-81.41	4
Total comprehensive income		(80,888)	263,017	(343,905)	-130.75	

The main reasons and impact analysis for significant changes exceeding 20% in the current and preceding periods, with the change amount exceeding NT\$10 million, are as follows:

- 1.The significant change is primarily due to the slow clearance of inventory by the industrial sector, As a result, the Company's overall order intake was not favorable and operating income compared decreased to the same period last year, leading to a reduction in operating profit.
- 2.The significant change is attributable to the decrease of \$231,240 thousand in the share of profit or loss recognized using the equity method. Additionally, there was an ~~increase~~ decrease of \$16,205 thousand in gains from the disposal of real estate, plant, and equipment.
3. Mainly due to loss for the period.
4. The decrease was mainly due to a decrease in the remeasurement of defined benefit plans and a decrease in exchange differences on the translation of financial statements of foreign operators.

(2) Expected sales quantity and basis:

Based on the market development trend of our products, the development of our customer's business, the revenue results of 2023, and the operational target of 2024, in addition, the COVID-19 epidemic that has been disrupting the world in recent years has been effectively controlled and is no longer interfering with global economic activities, the global economic outlook is warming up, and industrial development and demand are gradually returning to the pre-epidemic normal level, which is expected to bring positive development to the Company, and the overall order sales volume is expected to stabilize gradually, and it is estimated that the total consolidated sales volume and amount for the year of 2024 should be slightly similar to that for the year of 2023.

(3) Potential impacts on the company's future financial business and response plans:

In addition to maintaining a strong presence in existing industries, the company will actively target high-value industries such as automotive, medical, and industrial sectors. Leveraging through its original expertise in Front-End Design-in and the advantages of integration between the parent group, the company aims to seize collaboration opportunities with customers. Simultaneously, through upstream and downstream integration, the company will collaborate extensively with relevant subsidiaries to develop business related to 3C expansion bases (Docking Stations) and police (military) vehicle, thereby enhancing revenue and profitability. Furthermore, with a focus on maintaining reasonable profits, the company will continue to actively develop automated production methods for important related components to reduce overall production costs and improve operational profitability.

III. Cash flow

(1) Cash flow analysis for the current year (2023):

Unit: NT\$ thousand

Cash and Cash Equivalents at the beginning of the year 2023	Net cash inflow (outflow) 2023	Cash and Cash Equivalents at the ending of the year
771,500	(224,339)	547,161

Unit: NT\$ thousand

	2023	2022	Increase (Decrease) Amount	rate of change %
Net Cash flow from Operating Activities	433,596	546,881	(113,285)	-20.71%
Net Cash flow from Investing Activities	(186,211)	(32,816)	(153,395)	-467.44%
Net Cash flow from Financing Activities	(470,424)	(297,441)	(172,983)	-58.16%

1. Decrease in Net Cash Inflows from Operating Activities: This is primarily due to the losses incurred during the period.

2. Increase in Net Cash Outflows from Investing Activities: This is mainly due to reclassifying time deposits exceeding three months as financial assets measured at amortized cost during the period.

3. Increase in Net Cash Outflows from Financing Activities: This is primarily due to the increase in dividend payments.

(2) Improvement Plan for Insufficient Liquidity:

There is no cash shortage situation.

(3) Analysis of Cash Liquidity for the Next Year

1. Operating Activities: Based on the market development trend of our products, the development of our customer's business, the revenue results of 2023, and the operational target of 2024. In addition, with the COVID-19 pandemic, which disrupted global economic activities for the past few years, now effectively controlled and no longer interfering with global economic activities, the global economy is recovering. Industrial development and demand are gradually returning to pre-pandemic levels, which is expected to bring positive development for our company. Overall order and sales volumes are anticipated to gradually stabilize, and it is estimated that the consolidated sales volume and amount for 2024 will be approximately the same as in 2023.

2. Investing Activities: The company plans to purchase production and research and development equipment, among other investments.

3. Financing Activities: The company plans to repay long-term.

IV. Effect of Major Capital Expenditure on Financial Business Operations:

None

V. Investment Policy of the most recent year, Profit/Loss Analysis, Improvement Plan and Investment Plan for the Coming Year

(1) Investment Policy:

The company focuses on its core business, and the investment policy is oriented towards targets related to the core business. The relevant departments follow internal control procedures and the "Asset Acquisition or Disposal Handling Process" to execute investment activities.

(2) Main Reasons for Profit or Loss, Improvement Plan, and Future Year Investment Plan in the Recent Year's Investments:

Unit: NT\$ thousand

Investment Company	Invested Company	Shareholding Percentage (%)	Investment gains and losses recognized in 2023	Main Reason of Profit or Loss	Improvement Plan	Investment Plan for the Coming Year
Simula Technology Inc.	ASPIRE ASIA INC.	100.00%	(30,642)	The main losses were caused by Weitong Technology (Shenzhen) Co., Ltd..	Weitong Technology (Shenzhen) Co., Ltd. Increase orders and save expenses.	Depending on actual operating conditions.
Simula Technology Inc.	Simula Technologby Corp.	100.00%	2,739	—	—	
Simula Technology Inc.	Simula Company Limited	52.31%	(24,739)	The main losses were caused by Weitong Technology (Shenzhen) Co., Ltd.	Weitong Technology (Shenzhen) Co., Ltd. Increase orders and save expenses.	
Simula Technology Inc.	Action Star Technology Co., Ltd.	59.35%	(23,172)	Significant reduction in customer demand.	Increase Order	
ASPIRE ASIA INC.	Simula Company Limited	47.69%	(22,550)	The main losses were caused by Weitong Technology (Shenzhen) Co., Ltd.	Weitong Technology (Shenzhen) Co., Ltd. Increase orders and save expenses.	
ASPIRE ASIA INC.	ASPIRE ELECTRONICS Corp.	95.10%	(8,157)	The main losses were caused by Wuxi Opti Cloud Technologies, Inc.	(Note)	
Simula Company Limited	Simula Technology (ShenZhen) Co., Ltd.	100.00%	(46,191)	Customer demand is reduced.	Increases orders and save expenses.	
ASPIRE ELECTRONICS Corp.	Opti Cloud Technologies, Inc.	53.82%	(1,448)	The main losses were caused by Wuxi Opti Cloud Technologies, Inc.	(Note)	

Note: On September 30, 2023, the Company disposed of Wuxi Opti Cloud Technologies, Inc., the liquidation process of this Company was completed on September 9, 2023.

VI. Risk Management and Assessment of the Following Items in the Most Recent Year and Up to the Date of Annual Report Publication

(1) Impact of Interest Rate, Exchange Rate Fluctuations, and Inflation on Company's Profit and Loss, and Future Measures to Address them:

The following is a summary of the company's interest income, expenses, and foreign exchange gains/losses as a percentage of the company's operating income for the fiscal year 2023 and the first quarter of 2024.

Unit: NT\$ thousands

Items	Year 2023	First Quarter of Year 2024
Interest Income	6,525	1,357
Interest Expense on Bank Borrowings	3,072	525
Net Operating Revenue	2,039,055	352,473
Interest Income/Net Operating Revenue	0.32%	0.38%
Interest Expense/Net Operating Revenue	0.15%	0.15%

Items	Year 2023	First Quarter of Year 2024
Foreign Exchange (Gain) Loss	(14,922)	11,288
Net Operating Revenue	2,039,055	352,473
Foreign Exchange Gain/Loss/Net Operating Revenue	(0.73) %	3.20%

Explanation:

1. Interest Rate Risk:

(1) Impact of Interest Rate Fluctuations on the Company's Revenue and Profit:

For the current fiscal year, the majority of the company's operating funds are sourced from internal funds. As of the printing date of the annual report, bank interest expenses accounted for only 0.15% of operating income. Additionally, due to the abundant liquidity in the banking system and the current low-interest-rate environment, the borrowing costs remain relatively low. Therefore, the impact of interest rate fluctuations on the company's profitability for the fiscal year 2023 was minimal.

(2) Future Mitigation Measures:

In managing the company's working capital, apart from strengthening accounts receivable management to ensure a smooth cash flow, the company maintains close relationships with banks and expands credit lines. The company continuously monitors interest rate fluctuations to effectively manage interest costs associated with operations.

2. Exchange Rate Risk:

(1) Impact of Exchange Rate Fluctuations on the Company's Revenue and Profit:

As the company primarily engages in export activities, fluctuations and trends in exchange rates have a significant impact on its annual earnings. To mitigate the adverse effects on the company's operations, the company employs foreign exchange hedging strategies to minimize the risk.

(2) Future Mitigation Measures:

- A. Collect relevant information on exchange rate fluctuations, closely monitor trends and changes, and maintain close communication with banks to develop timely countermeasures against potential risks.
- B. Maintain a necessary level of foreign currency on the books, and convert excess foreign currencies into New Taiwan Dollars in a timely manner to reduce exchange rate risk.
- C. Strengthen relationships with domestic suppliers and, depending on exchange rate trends, consider paying invoices in New Taiwan Dollars or foreign currencies to reduce exchange rate risk.
- D. Implement timely hedging measures, such as pre-selling forward contracts for confirmed sales orders.
- E. Consider price adjustments in quotations to account for the impact of exchange rate fluctuations and ensure appropriate profit margins.

3. Inflation:

- (1) Impact of Inflation on the Company's Revenue and Profit: The company's performance and profitability have not been significantly affected by inflation.
- (2) Future Mitigation Measures: Monitor the price changes of upstream raw materials and key components to minimize the impact of cost fluctuations on the company.

(2) Policies, Profit or Loss, and Future Measures Regarding High-Risk, High-Leverage Investments, Fund Lending, Endorsement Guarantees, and Derivative Transactions:

- 1. High-Risk Investments: The company has not engaged in high-risk investments.
- 2. High-Leverage Investments: The company has not engaged in high-leverage investments.
- 3. Fund Lending: The company has not engaged in fund lending. The company has established "Operating Procedures for Fund Lending and Endorsement Guarantees," and any future transaction requirements will be processed in accordance with relevant management regulations and legal provisions
- 4. Endorsement Guarantees: The company has not provided endorsement guarantees. The company has established "Operating Procedures for Fund Lending and Endorsement Guarantees," and any future transaction requirements will be processed in accordance with relevant management regulations and legal provisions
- 5. Derivative Transactions: With the aim of risk mitigation, most gains or losses generated from forward foreign exchange transactions can be offset against gains or losses resulting from the revaluation of foreign currency assets on the balance sheet. In the future, the company will periodically evaluate and adjust hedging strategies based on its operational status and market trends

(3) Future R&D Plans and Estimated R&D Expenditure

In response to the growing demand for data transmission and high-speed digital applications, the company's future R&D plans will focus on high-speed communication, automotive electronics, and electronic module design technology. By strengthening cooperation with domestic and international customers, as well as collaborating with academic research institutions to establish a foundation of technical expertise, the company aims to enhance its R&D capabilities and strengthen its technological competitiveness.

A. High-Speed Communication Technology and Testing Capability

With the integration of the USB Type-C connector interface and the increasing need for high-speed data transmission and high-speed digital applications, the quality and stability of ultra-high-speed transmission become crucial. Traditional connector and cable industries have primarily focused on mechanical design and process automation, relying on experience or third-party laboratories for high-frequency phenomena simulation and testing. As frequencies continue to rise and high-frequency phenomena become more complex, relying solely on experience and third-party laboratories is no longer sufficient. It requires the implementation of comprehensive high-frequency testing capabilities and deep expertise to interpret results,

thereby truly improving products and enhancing test reliability and accuracy. Customers will rely heavily on such professional and reliable suppliers. The company's existing focus on high-frequency connector design, automated production, and CAE analysis simulation allows it to expand into a broader high-speed communication field.

B. Automotive Electronics Technology

With the widespread adoption of advanced driver-assistance systems and the development of electric vehicles, various applications are rapidly incorporated into in-vehicle devices, such as Type-C, Circular Conn., and Fakra connectors. Achieving these requirements is closely related to high-speed technology and customization capabilities. The company possesses sufficient capabilities and customization experience in high-frequency, electronic, mechanical, and system integration to meet the demands of automotive electronics.

C. Electronic Module Design Technology

Electronic module design is typically a highly experiential technology. Connector and cable manufacturers usually do not establish complete electronic product design processes or modularize their electronic designs. In response to the current risks of increased electronic component costs and material shortages, the company incorporates material selection as an important design criterion in the early stages of product development. It utilizes modular design to avoid unnecessary risks and waste caused by "increased costs and lead times." Through cooperation with research institutions and academic units, the company gradually establishes a foundation of electronic module analysis capabilities to strengthen its grasp of material characteristics and improve quality stability.

D. Reliability Testing and Verification Capability

With the company's product diversification and wide range of application areas, there is a need for a certain level of testing and verification capabilities. In addition to the existing complete reliability laboratory, the company actively cultivates cooperation and synergy with third-party laboratories to expand the breadth and depth of testing and verification. It also actively plans for laboratory equipment and capability upgrades to ensure product reliability and stability.

Estimated R&D Expenditure

The estimated R&D expenditure for the year 2024 is approximately 45 million, including relevant R&D instruments and equipment.

(4) Impact of Important Domestic and International Policies and Legal Changes on the Company's Financial Operations and Response Measures

The company has always operated conservatively, respecting the rule of law, promoting integrity and transparency, and protecting shareholders' rights and interests. It actively implements corporate governance and approaches recent significant domestic and international policy and legal changes with cautious optimism. It coordinates with policy and legal changes, evaluates the strategic conditions of the company's operations, and formulates appropriate financial and business policies. In the past year, there have been no significant impacts on the company's financial operations due to important domestic and international policy and legal changes.

(5) Impact of Technological Changes and Industry Transformations on the Company's Financial Operations and Response Measures

The company constantly monitors technological changes relevant to its industry and assigns personnel to assess and study the impact of these changes on the company's future development and financial operations, as well as the necessary response measures. In the past year, there have been no significant technological changes that have had a major impact on the company's financial operations.

(6) Impact of Corporate Image Changes on Crisis Management and Response Measures

Since its establishment, the company has focused on its core business, committed to enhancing its overall competitiveness, and pursuing sustainable operation. It does not tolerate any behavior that violates the principles of integrity or the core values of the company. As of now, there have been no incidents that have significantly affected the corporate image.

(7) Expected Benefits, Potential Risks, and Response Measures for Mergers and Acquisitions : The company has no plans for any mergers or acquisitions.

(8) Expected Benefits, Potential Risks, and Response Measures for Factory Expansion: There are no such circumstances.

(9) Risks Faced and Response Measures for Concentration of Procurement or Sales:

The company adjusts its product sales based on the operational status of its customers. Considering the company's and the industry's growth trends, it will timely adjust its sales targets to maintain balanced and stable operational results.

(10) Impact and Risk Response Measures of Significant Transfer or Replacement of Directors, Supervisors, or Shareholders with Ownership Exceeding 10%

There have been no significant transfers or replacements of share ownership among the directors, supervisors, or major shareholders of the company

(11) Impact and measures for changes in the company's management

There has been no significant change in the company's board of directors or management team.

(12) Litigation or non-litigation events

1. The company has no pending or settled litigation, non-litigation, or administrative disputes within the past two years and up to the date of the annual report that may have a significant impact on shareholder equity or security prices
2. The company's directors, supervisors, general manager, substantial shareholders holding more than 10% of the shares, and subsidiaries have no pending or settled litigation, non-litigation, or administrative disputes within the past two years and up to the date of the annual report that may have a significant impact on shareholder equity or security prices.

(13) Organizational structure for risk management

The company's risk management focuses on the risk management system of corporate governance and risk transfer planning, including strategic, financial, operational, and hazard risks, which are managed by the Risk Management Committee. The company clearly defines its risk management vision and policies, effectively manages risks beyond its risk tolerance, and uses risk management tools to optimize the total cost of risk management

1. Risk management vision

- A. Commitment to providing products and services to create long-term value for customers, shareholders, employees, and society.
- B. Risk management requires a systematic organizational and risk management operational procedure, timely and effective identification, evaluation, processing, reporting, and monitoring of significant risks that may affect the company's survival, and strengthening all employees' risk awareness.
- C. Risk management does not pursue "zero" risk but seeks to maximize benefits within acceptable risk levels to optimize the cost of risk management.

2. Risk management policy

- A. To ensure the company's sustainable operation, the Risk Management Committee should regularly identify, evaluate, process, report, and monitor risks that may have a negative impact on the company's operational objectives
- B. Risks should be identified and controlled before accidents occur, losses should be reduced when accidents occur, and the provision of products and services should be quickly restored after accidents. For significant risk situations recognized by the Risk Management Committee, operational continuity plans should be established
- C. For risks that do not exceed the risk tolerance level, the cost of risk management may be considered, and different management tools may be used to process risks. However, the following situations are not limited to this

- Negative impact on employees' safety.
- Violation of legal regulations.
- Having a negative impact on the company's reputation.

3. Organization and Structure of the Risk Management Committee

The Audit Committee and the Board of Directors oversee risk management. A Risk Management Committee has been established, chaired by the General Manager, with the head of the Management Department serving as the Chief Secretary. The committee includes the heads of all primary units within the company. Regular meetings are held, and an annual report on the execution of risk management operations is presented to the Audit Committee and the Board of Directors.

(14) Other significant risks and corresponding measures.

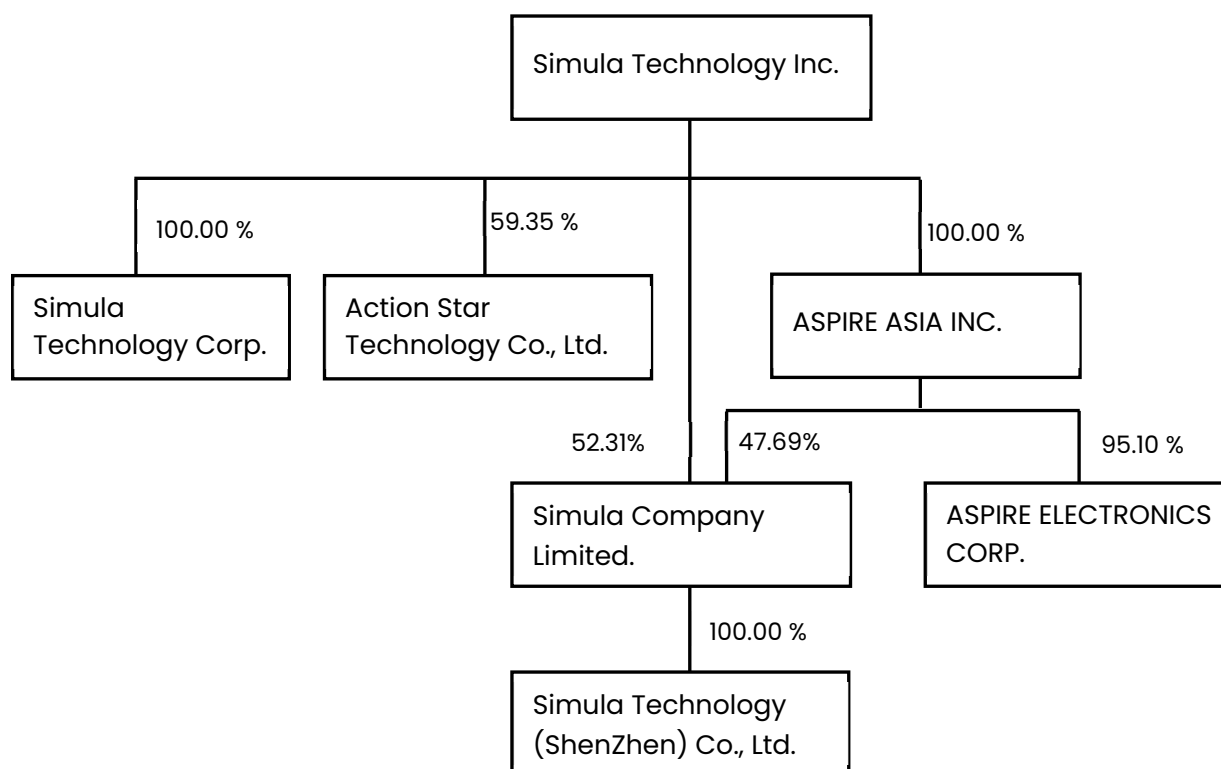

VII. Other significant matters: None.

Consolidated Financial Statements with Independent Auditors' Report of the most recent year

English Translation of Consolidated Financial Statements and a Report Originally Issued in Chinese

MANAGEMENT REPRESENTATION LETTER

The entities that are required to be included in the combined financial statements of Simula Technology Inc. as of December 31, 2023 and for the year then ended under the Criteria Governing the Preparation of Affiliation Reports, Consolidated Business Reports and Consolidated Financial Statements of Affiliated Enterprises are the same as those included in the consolidated financial statements prepared in conformity with the International Financial Reporting Standard No. 10, "Consolidated Financial Statements." In addition, the information required to be disclosed in the combined financial statements is included in the consolidated financial statements. Consequently, Simula Technology Inc. and Subsidiaries do not prepare a separate set of combined financial statements.

Very truly yours,

Simula Technology Inc.

By

Huang, Han-Zhou

Chairman

February 23, 2024

English Translation of Consolidated Financial Statements and a Report Originally Issued in Chinese

INDEPENDENT AUDITORS' REPORT

To: The Board of Directors and Shareholders of
Simula Technology Inc.

Opinion

We have audited the accompanying consolidated balance sheets of Simula Technology Inc. (the “Company”) and its subsidiaries as of December 31, 2023 and 2022, the related consolidated statements of comprehensive income, changes in equity and cash flows for the years then ended, and notes to the consolidated financial statements, including the summary of significant accounting policies (together referred as “the consolidated financial statements”).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of the Company and its subsidiaries as of December 31, 2023 and 2022, and its consolidated financial performance and cash flows for the years then ended, in conformity with the requirements of the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Financial Reporting Standards, International Accounting Standards, Interpretations developed by the International Financial Reporting Interpretations Committee or the former Standing Interpretations Committee as endorsed by Financial Supervisory Commission of the Republic of China.

Basis for Opinion

We conducted our audits in accordance with the Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants and the Standards on Auditing of the Republic of China. Our responsibilities under those standards are further described in the Auditors’ Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Company and its subsidiaries in accordance with the Norm of Professional Ethics for Certified Public Accountant of the Republic of China (the “Norm”), and we have fulfilled our other ethical responsibilities in accordance with the Norm. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of 2023 consolidated financial statements. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Revenue recognition

We determine that revenue recognition is one of the key audit matters. The Company's consolidated revenue amounting to NT\$2,039,055 thousand for the year ended December 31, 2023 is a significant account to the Company's consolidated financial statements. The Company has conducted these sale activities in multi-marketplace, including Taiwan, China, USA, etc. Furthermore, the timing of fulfilling performance obligation needs to be determined based on varieties of sale terms and conditions enacted in the main sale contracts or sale orders. Our audit procedures therefore include, but not limit to, evaluating the properness of accounting policy for revenue recognition, assessing and testing the effectiveness of relevant internal controls related to revenue recognition, sampling-test of details, including obtaining major sale orders or agreements to inspect the terms and conditions, checking the consistency of the fulfillment timing, performing analytical review procedures on monthly sale revenues, executing sale cut-off tests, etc. We have also evaluated the appropriateness of the related disclosure in Note 6 to the consolidated financial statements.

Market valuation on inventory

We determined the market valuation on inventory is one of the key audit matters in considering that the amount of inventory was significant and the assessment of sufficiency of inventory loss requires significant management judgement. The Group's net inventory amounted to NT\$317,831 thousand as of December 31, 2023. The Group's main products are characterized by rapid development in technology and the trend of consumers' preference. Management, in timely considering the status of new products development and the demand from clients, has to evaluate the loss due to market value decline as well as write-down on slow-moving inventories to their net realizable value. Our audit procedures therefore include, but not limit to, evaluating the Company's policy with respect to the assessment of the loss from slow-moving inventory and phased-out items, testing the accuracy of inventory aging schedule, analyzing inventory movement, performing observation on the Company's inventory physical-taking, and inspecting the current status of inventory usage, etc. We also assessed the adequacy of the inventory-related disclosures shown in the Notes 5 and 6 to the consolidated financial statements.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the requirements of the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Financial Reporting Standards, International Accounting Standards, Interpretations developed by the International Financial Reporting Interpretations Committee or the former Standing Interpretations Committee as endorsed by Financial Supervisory Commission of the Republic of China and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the ability to continue as a going concern of the Company, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, including audit committee or supervisors, are responsible for overseeing the financial reporting process of the Company.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Standards on Auditing of the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with the Standards on Auditing of the Republic of China, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

1. Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the internal control of the Company.
3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability to continue as a going concern of the Company. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
5. Evaluate the overall presentation, structure and content of the consolidated financial statements, including the accompanying notes, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
6. Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Company to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of 2023 consolidated financial statements and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

We have audited and expressed an unqualified opinion on the parent-company-only financial statements of the Company as of and for the years then ended December 31, 2023 and 2022.

(The accompanying notes are an integral part of the consolidated financial statements.)

1. HISTORY AND ORGANIZATION

Simula Technology Inc. (referred to “the Company”) was established on December 15, 2003. Its main business activities include the manufacture of electronic products, the whole-sale and product designing, and international trading. The Company’s common shares were publicly listed on the Taiwan Over-The-Counter Securities Exchanges on September 16, 2008. The registered business premise and main operation address is at 14F., No. 1351, Zhongzheng Rd., Taoyuan Dist., Taoyuan City, Taiwan.

Qisda Corporation is the ultimate controller of the Group to which the Company belongs.

2. DATE AND PROCEDURE OF AUTHORIZATION FOR FINANCIAL STATEMENTS ISSUANCE

The consolidated financial statements of the Company and its subsidiaries (“the Group”) were authorized to be issued in accordance with a resolution of the Board of Directors’ meeting held on February 23, 2024.

3. NEWLY ISSUED OR REVISED STANDARDS AND INTERPRETATIONS

(1) Changes in accounting policies resulting from applying for the first time certain standards and amendments

The Group applied for the first time International Financial Reporting Standards, International Accounting Standards, and Interpretations issued, revised or amended which are recognized by Financial Supervisory Commission (“FSC”) and become effective for annual periods beginning on or after January 1, 2023. The new standards and amendments had no material impact on the Group.

- (2) Standards or interpretations issued, revised or amended, by International Accounting Standards Board (“IASB”) which are endorsed by FSC, but not yet adopted by the Group as at the end of the reporting period are listed below.

Items	New, Revised or Amended Standards and Interpretations	Effective Date issued by IASB
a	Classification of Liabilities as Current or Non-current – Amendments to IAS 1	January 1, 2024
b	Lease Liability in a Sale and Leaseback – Amendments to IFRS 16	January 1, 2024
c	Non-current Liabilities with Covenants – Amendments to IAS 1	January 1, 2024
d	Supplier Finance Arrangements – Amendments to IAS 7 and IFRS 7	January 1, 2024

(A) Classification of Liabilities as Current or Non-current – Amendments to IAS 1

These are the amendments to paragraphs 69-76 of IAS 1 Presentation of Financial statements and the amended paragraphs related to the classification of liabilities as current or non-current.

(B) Lease Liability in a Sale and Leaseback – Amendments to IFRS 16

The amendments add seller-lessees additional requirements for the sale and leaseback transactions in IFRS 16, thereby supporting the consistent application of the standard.

(C) Non-current Liabilities with Covenants – Amendments to IAS 1

The amendments improved the information companies provide about long-term debt with covenants. The amendments specify that covenants to be complied within twelve months after the reporting period do not affect the classification of debt as current or non-current at the end of the reporting period.

(D) Supplier Finance Arrangements – Amendments to IAS 7 and IFRS 7

The amendments introduced additional information of supplier finance arrangements and added disclosure requirements for such arrangements.

The abovementioned standards and interpretations were issued by IASB and endorsed by FSC so that they are applicable for annual periods beginning on or after January 1, 2024. The new or amended standards and interpretations have no material impact on the Group.

- (3) Standards or interpretations issued, revised or amended, by IASB which are not endorsed by FSC, and not yet adopted by the Group as at the end of the reporting period are listed below.

Items	New, Revised or Amended Standards and Interpretations	Effective Date issued by IASB
a	IFRS 10 “Consolidated Financial Statements” and IAS 28 “Investments in Associates and Joint Ventures” — Sale or Contribution of Assets between an Investor and its Associate or Joint Ventures	To be determined by IASB
b	IFRS 17 “Insurance Contracts”	January 1, 2023
c	Lack of Exchangeability – Amendments to IAS 21	January 1, 2025

- (A) IFRS 10“Consolidated Financial Statements” and IAS 28“Investments in Associates and Joint Ventures” — Sale or Contribution of Assets between an Investor and its Associate or Joint Ventures

The amendments address the inconsistency between the requirements in IFRS 10 Consolidated Financial Statements and IAS 28 Investments in Associates and Joint Ventures, in dealing with the loss of control of a subsidiary that is contributed to an associate or a joint venture. IAS 28 restricts gains and losses arising from contributions of non-monetary assets to an associate or a joint venture to the extent of the interest attributable to the other equity holders in the associate or joint ventures. IFRS 10 requires full profit or loss recognition on the loss of control of the subsidiary. IAS 28 was amended so that the gain or loss resulting from the sale or contribution of assets that constitute a business as defined in IFRS 3 between an investor and its associate or joint venture is recognized in full.

IFRS 10 was also amended so that the gains or loss resulting from the sale or contribution of a subsidiary that does not constitute a business as defined in IFRS 3 between an investor and its associate or joint venture is recognized only to the extent of the unrelated investors' interests in the associate or joint venture.

(B) IFRS 17 “Insurance Contracts”

IFRS 17 provides a comprehensive model for insurance contracts, covering all relevant accounting aspects (including recognition, measurement, presentation and disclosure requirements). The core of IFRS 17 is the General (building block) Model, under this model, on initial recognition, an entity shall measure a group of insurance contracts at the total of the fulfilment cash flows and the contractual service margin. The carrying amount of a group of insurance contracts at the end of each reporting period shall be the sum of the liability for remaining coverage and the liability for incurred claims.

Other than the General Model, the standard also provides a specific adaptation for contracts with direct participation features (the Variable Fee Approach) and a simplified approach (Premium Allocation Approach) mainly for short-duration contracts.

IFRS 17 was issued in May 2017 and it was amended in 2020 and 2021. The amendments include deferral of the date of initial application of IFRS 17 by two years to annual beginning on or after 1 January 2023 (from the original effective date of 1 January 2021); provide additional transition reliefs; simplify some requirements to reduce the costs of applying IFRS 17 and revise some requirements to make the results easier to explain. IFRS 17 replaces an interim Standard – IFRS 4 Insurance Contracts – from annual reporting periods beginning on or after January 1, 2023.

(C) Lack of Exchangeability – Amendments to IAS 21

These amendments specify whether a currency is exchangeable into another currency and, when it is not, to determining the exchange rate to use and the disclosures to provide. The amendments apply for annual reporting periods beginning on or after January 1, 2025.

The abovementioned standards and interpretations issued by IASB have not yet endorsed by FSC at the date when the Group's financial statements were authorized for issue, the local effective dates are to be determined by FSC. The new or amended standards and interpretations have no material impact on the Group.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(1) Statement of compliance

The consolidated financial statements of the Group for the years ended December 31, 2023 and 2022 were prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers ("the Regulations") and International Financial Reporting Standards, International Accounting Standards, and Interpretations developed by the International Financial Reporting Interpretations Committee or the former Standing Interpretations Committee as endorsed by the FSC.

(2) Basis of preparation

The consolidated financial statements have been prepared on a historical cost basis, except for financial instruments that have been measured at fair value. The consolidated financial statements are presented in thousands of New Taiwan Dollars ("NT\$") unless otherwise specified.

(3) Basis of consolidation

Preparation principle of consolidated financial statements

Control is achieved when the Company is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Company controls an investee if and only if the Company has:

- (a) Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee)
- (b) Exposure, or rights, to variable returns from its involvement with the investee, and
- (c) The ability to use its power over the investee to affect its returns

When the Company has less than a majority of the voting or similar rights of an investee, the Company considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- (a) The contractual arrangement with the other vote holders of the investee
- (b) Rights arising from other contractual arrangements
- (c) The Company's voting rights and potential voting rights

The Company re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control.

Subsidiaries are fully consolidated from the acquisition date, being the date on which the Company obtains control, and continue to be consolidated until the date that such control ceases. The financial statements of the subsidiaries are prepared for the same reporting period as the parent company, using uniform accounting policies. All intra-group balances, income and expenses, unrealized gains and losses and dividends resulting from intra-group transactions are eliminated in full.

A change in the ownership interest of a subsidiary, without a change of control, is accounted for as an equity transaction.

Total comprehensive income of the subsidiaries is attributed to the owners of the parent and to the NCIs even if this results in a deficit balance of the NCIs.

If the Company loses control of a subsidiary, it:

- (a) Derecognizes the assets (including goodwill) and liabilities of the subsidiary;
- (b) Derecognizes the carrying amount of any non-controlling interest;
- (c) Recognizes the fair value of the consideration received;
- (d) Recognizes the fair value of any investment retained;
- (e) Reclassifies the parent's share of components previously recognized in other comprehensive income to profit or loss, or transfers directly to retained earnings; and
- (f) Recognizes differences in profit or loss.

The consolidated entities are listed as follows:

Investor	Subsidiary	Main business	Percentage of Ownership (%), As of December 31,	
			2023	2022
The Company	ASPIRE ASIA INC.	Investing activities	100.00%	100.00%
The Company	Simula Technology CORP.	Sells in Northern America	100.00%	100.00%
The Company	Simula Company Limited	Investing activities	52.31%	52.31%
The Company	Action Star Technology Co., Ltd.	R&D & development manufacture and sale of USB docking station product	59.35%	59.35%
ASPIRE ASIA INC.	Simula Company Limited	Investing activities	47.69%	47.69%
ASPIRE ASIA INC.	ASPIRE ELECTRONICS CORP.	Investing activities	95.10%	95.10%
ASPIRE ELECTRONICS CORP.	Opti Cloud Technologies, Inc.	Development of High- speed optical transmission cable and module product technology	-% (Note)	53.82%
Simula Company Limited	Simula Technology (ShenZhen) Co., LTD	Manufacture of electronic connector, socket and plastic hardware	100.00%	100.00%

Note : Opti Cloud Technologies, Inc. completed the liquidation process on November 9, 2023.

(4) Foreign currency transactions

The Group's consolidated financial statements are presented in NT\$, which is the parent company's functional currency. Each entity in the Group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency.

Transactions in foreign currencies are initially recorded by the Group entities at their respective functional currency rates prevailing at the date of the transaction. At the reporting date, monetary items denominated in foreign currencies are retranslated at the prevailing functional currency closing rate of exchange; non-monetary items measured at fair value in a foreign currency are retranslated using the exchange rates at the date when the fair value is determined; and non-monetary items measured at historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions.

All exchange differences arising from the settlement or translation of monetary items are taken to profit or loss in the period in which they arise, except for the following:

- (a) Exchange differences arising from foreign currency borrowings for an acquisition of a qualifying asset to the extent that they are regarded as an adjustment to interest costs are included in the borrowing costs that are eligible for capitalization.
- (b) Foreign currency items within the scope of IFRS 9 Financial Instruments are accounted for based on the accounting policy for financial instruments.
- (c) Exchange differences arising on a monetary item that forms part of a reporting entity's net investment in a foreign operation is recognized initially in other comprehensive income and reclassified from equity to profit or loss on disposal of the net investment.

When a gain or loss on a non-monetary item is recognized in other comprehensive income, any exchange component of that gain or loss is recognized in other comprehensive income. When a gain or loss on a non-monetary item is recognized in profit or loss, any exchange component of that gain or loss is recognized in profit or loss.

(5) Foreign currency transactions and translation of financial statements in foreign currency

The assets and liabilities of foreign operations are translated into NT\$ at the closing rate of exchange prevailing at the balance sheet date and their income and expenses are translated at an average rate for the period. The exchange differences arising on the translation are recognized in other comprehensive income under exchange differences on translation of foreign operations. On disposal of the foreign operation, cumulative amount of the exchange differences recognized in other comprehensive income under separate component of equity is reclassified from equity to profit or loss when recognizing the disposal gain/loss.

On the partial disposal of a subsidiary that includes a foreign operation that does not result in a loss of control, the proportionate share of the cumulative amount of the exchange differences recognized in other comprehensive income is re-attributed to the NCIs in that foreign operation, instead of recognized in profit or loss. In partial disposal of an associate or jointly controlled entity that includes a foreign operation that does not result in a loss of significant influence or joint control, only the proportionate share of the cumulative amount of the exchange differences recognized in other comprehensive income is reclassified to profit or loss.

Any goodwill and fair value adjustments to the carrying amounts of assets and liabilities arising on the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and expressed in its functional currency.

(6) Current and non-current distinction for assets and liabilities

An asset is classified as current when:

- (a) The Group expects to realize the asset, or intends to sell or consume it, in its normal operating cycle
- (b) The Group holds the asset primarily for the purpose of trading
- (c) The Group expects to realize the asset within twelve months after the reporting period
- (d) The asset is cash or cash equivalent, unless the asset is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is classified as current when:

- (a) The Group expects to settle the liability in its normal operating cycle
- (b) The Group holds the liability primarily for the purpose of trading
- (c) The liability is due to be settled within twelve months after the reporting period
- (d) The Group does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting period. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

All other liabilities are classified as non-current.

(7) Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, demand deposits and short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value (including fixed-term deposits that have maturities equal to or less than three months from the date of acquisition).

(8) Financial instruments

Financial assets and financial liabilities are recognized when the Group becomes a party to the contractual provisions of the instrument.

The Group determines the classification of its financial assets at initial recognition. In accordance with IFRS 9 and the Regulations, financial assets of the Company are classified as financial assets at fair value through profit or loss, financial assets at fair value through other comprehensive income, financial assets measured at amortized cost and notes, accounts and other receivables. All financial assets are recognized initially at fair value plus, in the case of investments not at fair value through profit or loss, directly attributable costs. Financial assets carried at fair value through profit or loss are initially recognized at fair value, and transaction costs are expensed in the income statement.

(A) Financial assets: Recognition and Measurement

The Group accounts for regular way purchase or sales of financial assets on the trade date.

The Group classified financial assets as subsequently measured at amortized cost, fair value through other comprehensive income or fair value through profit or loss considering both factors below:

- (a) The Group's business model for managing the financial assets and
- (b) The contractual cash flow characteristics of the financial asset.

Financial assets measured at amortized cost

A financial asset is measured at amortized cost if both of the following conditions are met and presented as note receivables, trade receivables financial assets measured at amortized cost and other receivables etc., on balance sheet as at the reporting date:

- (a) The financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and
- (b) The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Such financial assets are subsequently measured at amortized cost (the amount at which the financial asset is measured at initial recognition minus the principal repayments, plus or minus the cumulative amortization using the effective interest method of any difference between the initial amount and the maturity amount and adjusted for any loss allowance) and is not part of a hedging relationship. A gain or loss is recognized in profit or loss when the financial asset is derecognized, through the amortization process or in order to recognize the impairment gains or losses.

Interest revenue is calculated by using the effective interest method. This is calculated by applying the effective interest rate to the gross carrying amount of a financial asset except for:

- (a) Purchased or originated credit-impaired financial assets. For those financial assets, the Group applies the credit-adjusted effective interest rate to the amortized cost of the financial asset from initial recognition.
- (b) Financial assets that are not purchased or originated credit-impaired financial assets but subsequently have become credit-impaired financial assets. For those financial assets, the Group applies the effective interest rate to the amortized cost of the financial asset in subsequent reporting periods.

Financial asset measured at fair value through other comprehensive income

A financial asset is measured at fair value through other comprehensive income if both of the following conditions are met:

- (a) The financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and
- (b) The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Recognition of gain or loss on a financial asset measured at fair value through other comprehensive income are described as below:

- (a) A gain or loss on a financial asset measured at fair value through other comprehensive income recognized in other comprehensive income, except for impairment gains or losses and foreign exchange gains and losses, until the financial asset is derecognized or reclassified.
- (b) When the financial asset is derecognized the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss as a reclassification adjustment.

(c) Interest revenue is calculated by using the effective interest method. This is calculated by applying the effective interest rate to the gross carrying amount of a financial asset except for:

- (i) Purchased or originated credit-impaired financial assets. For those financial assets, the Group applies the credit-adjusted effective interest rate to the amortized cost of the financial asset from initial recognition.
- (ii) Financial assets that are not purchased or originated credit-impaired financial assets but subsequently have become credit-impaired financial assets. For those financial assets, the Group applies the effective interest rate to the amortized cost of the financial asset in subsequent reporting periods.

Besides, at initial recognition, the Group make an irrevocable election to present in other comprehensive income subsequent changes in the fair value of an investment in an equity instrument within the scope of IFRS 9 that is neither held for trading nor contingent consideration recognized by an acquirer in a business combination to which IFRS 3 applies. Amounts presented in other comprehensive income are not be subsequently transferred to profit or loss (when disposal of such equity instrument, its cumulated amount included in other components of equity is transferred directly to the retained earnings) and should recorded as financial assets measured at fair value through other comprehensive income on balance sheet. Dividends on such investment are recognized in profit or loss unless the dividends clearly represents a recovery of part of the cost of investment.

Financial asset measured at fair value through profit or loss

Financial assets were measured at amortized cost or measured at fair value through other comprehensive income only if they met particular conditions. All other financial assets were measured at fair value through profit or loss and presented on the balance sheet as financial assets measured at fair value through profit or loss and trade receivable.

Such financial assets are measured at fair value, the gains or losses resulting from remeasurement is recognized in profit or loss which includes any dividend or interest received on such financial assets.

(B) Impairment of financial assets

The Group is recognized a loss allowance for expected credit losses on debt instrument investments measured at fair value through other comprehensive income and financial asset measured at amortized cost. The loss allowance on debt instrument investments measured at fair value through other comprehensive income is recognized in other comprehensive income and not reduce the carrying amount in the statement of financial position.

The Group measures expected credit losses of a financial instrument in a way that reflects:

- (a) An unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- (b) The time value of money; and
- (c) Reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

The loss allowance is measures as follows:

- (a) At an amount equal to 12-month expected credit losses: the credit risk on a financial asset has not increased significantly since initial recognition or the financial asset is determined to have low credit risk at the reporting date. In addition, the Group measures the loss allowance for a financial asset at an amount equal to lifetime expected credit losses in the previous reporting period, but determines at the current reporting date that condition is no longer met.
- (b) At an amount equal to the lifetime expected credit losses: the credit risk on a financial asset has increased significantly since initial recognition or financial asset that is purchased or originated credit-impaired financial asset.
- (c) For trade receivables or contract assets arising from transactions within the scope of IFRS 15, the Group measures the loss allowance at an amount equal to lifetime expected credit losses.

- (d) For lease receivables arising from transactions within the scope of IFRS 16, the Group measures the loss allowance at an amount equal to lifetime expected credit losses.

At each reporting date, the Group needs to assess whether the credit risk on a financial asset has been increased significantly since initial recognition by comparing the risk of a default occurring at the reporting date and the risk of default occurring at initial recognition. Please refer to Note 12 for further details on credit risk.

(C) Derecognition of financial assets

A financial asset is derecognized when:

- (a) The rights to receive cash flows from the asset have expired
- (b) The Group has transferred the asset and substantially all the risks and rewards of the asset have been transferred
- (c) The Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the consideration received or receivable including any cumulative gain or loss that had been recognized in other comprehensive income, is recognized in profit or loss.

(D) Financial liabilities and equity

Classification between liabilities or equity

The Group classifies the instrument issued as a financial liability or an equity instrument in accordance with the substance of the contractual arrangement and the definitions of a financial liability, and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. The transaction costs of an equity transaction are accounted for as a deduction from equity (net of any related income tax benefit) to the extent they are incremental costs directly attributable to the equity transaction that otherwise would have been avoided.

Financial liabilities

Financial liabilities within the scope of IFRS 9 Financial Instruments are classified as financial liabilities at fair value through profit or loss or financial liabilities measured at amortized cost upon initial recognition.

Financial liabilities at amortized cost

Financial liabilities measured at amortized cost include interest bearing loans and borrowings that are subsequently measured using the effective interest rate method after initial recognition. Gains and losses are recognized in profit or loss when the liabilities are derecognized as well as through the effective interest rate method amortization process.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or transaction costs.

Derecognition of financial liabilities

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified (whether or not attributable to the financial difficulty of the debtor), such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss.

(E) Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the balance sheet if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously.

(9) Derivative instrument

The Group uses derivative instruments to hedge its foreign currency risks and interest rate risks. A derivative is classified in the balance sheet as financial assets or liabilities at fair value through profit or loss except for derivatives that are designated as and effective hedging instruments which are classified as financial assets or liabilities for hedging.

Derivative instruments are initially recognized at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative. The changes in fair value of derivatives are taken directly to profit or loss, except for the effective portion of hedges, which is recognized in either profit or loss or equity according to types of hedges used.

When the host contracts are either non-financial assets or liabilities, derivatives embedded in host contracts are accounted for as separate derivatives and recorded at fair value if their economic characteristics and risks are not closely related to those of the host contracts and the host contracts are not designated at fair value through profit or loss.

(10) Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- (a) In the principal market for the asset or liability, or
- (b) In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible to by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

(11) Inventories

Inventories are valued at lower of cost or net realizable value item by item.

Costs incurred in bringing each inventory to its present location and conditions are accounted for as follows:

Raw materials - At actual purchase cost, using weighted average method

Finished goods and work in progress - Including cost of direct materials and labor and a proportion of manufacturing overheads based on normal operating capacity, using weighted average method.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

Rendering of services is accounted in accordance with IFRS 15 but not within the scoping of inventories.

(12) Investments accounted for using the equity method

The Group's investment in its associate is accounted for using the equity method other than those that meet the criteria to be classified as held for sale. An associate is an entity over which the Group has significant influence. A joint venture is a type of joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint venture.

Under the equity method, the investment in the associate or an investment in a joint venture is carried in the balance sheet at cost and adjusted thereafter for the post-acquisition change in the Group's share of net assets of the associate or joint venture. After the interest in the associate or joint venture is reduced to zero, additional losses are provided for, and a liability is recognized, only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate or joint venture. Unrealized gains and losses resulting from transactions between the Group and the associate or joint venture are eliminated to the extent of the Group's related interest in the associate or joint venture.

When changes in the net assets of an associate or a joint venture occur and not those that are recognized in profit or loss or other comprehensive income and do not affect the Group's percentage of ownership interests in the associate or joint venture, the Group recognizes such changes in equity based on its percentage of ownership interests. The resulting capital surplus recognized will be reclassified to profit or loss at the time of disposing the associate or joint venture on a pro rata basis.

When the associate or joint venture issues new stock, and the Group's interest in an associate or a joint venture is reduced or increased as the Group fails to acquire shares newly issued in the associate or joint venture proportionately to its original ownership interest, the increase or decrease in the interest in the associate or joint venture is recognized in Additional Paid in Capital and Investment accounted for using the equity method. When the interest in the associate or joint venture is reduced, the cumulative amounts previously recognized in other comprehensive income are reclassified to profit or loss or other appropriate items. The aforementioned capital surplus recognized is reclassified to profit or loss on a pro rata basis when the Group disposes the associate or joint venture.

The financial statements of the associate or joint venture are prepared for the same reporting period as the Group. Where necessary, adjustments are made to bring the accounting policies in line with those of the Group.

The Group determines at each reporting date whether there is any objective evidence that the investment in the associate or an investment in a joint venture is impaired in accordance with IAS 28 Investments in Associates and Joint Ventures. If this is the case the Group calculates the amount of impairment as the difference between the recoverable amount of the associate or joint venture and its carrying value and recognizes the amount in the 'share of profit or loss of an associate' in the statement of comprehensive income in accordance with IAS 36 Impairment of Assets. In determining the value in use of the investment, the Group estimates:

- (a) Its share of the present value of the estimated future cash flows expected to be generated by the associate or joint venture, including the cash flows from the operations of the associate and the proceeds on the ultimate disposal of the investment; or
- (b) The present value of the estimated future cash flows expected to arise from dividends to be received from the investment and from its ultimate disposal.

Because goodwill that forms part of the carrying amount of an investment in an associate or an investment in a joint venture is not separately recognized, it is not tested for impairment separately by applying the requirements for impairment testing goodwill in IAS 36 Impairment of Assets.

Upon loss of significant influence over the associate or joint venture, the Group measures and recognizes any retaining investment at its fair value. Any difference between the carrying amount of the associate or joint venture upon loss of significant influence and the fair value of the retaining investment and proceeds from disposal is recognized in profit or loss. Furthermore, if an investment in an associate becomes an investment in a joint venture or an investment in a joint venture becomes an investment in an associate, the entity continues to apply the equity method and does not remeasure the retained interest.

(13) Property, plant and equipment

Property, plant and equipment are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of dismantling and removing the item and restoring the site on which it is located and borrowing costs for construction in progress if the recognition criteria are met. Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately. When significant parts of property, plant and equipment are required to be replaced in intervals, the Company recognized such parts as individual assets with specific useful lives and depreciation, respectively. The carrying amount of those parts that are replaced is derecognized in accordance with the derecognition provisions of IAS 16 “Property, plant and equipment”. When a major inspection is performed, its cost is recognized in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognized in profit or loss as incurred.

Depreciation is calculated on a straight-line basis over the estimated economic lives of the following assets:

Buildings	3 to 50 years
Machinery	2 to 10 years
Office equipment	3 to 10 years
Transportation	5 to 8 years
Other equipment	2 to 5 years
Leasehold improvements	The shorter of lease terms or economic useful lives

An item of property, plant and equipment or any significant part initially recognized is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset is recognized in profit or loss.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

(14) Leases

The Group assesses whether the contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset for a period of time, the Group assesses whether, throughout the period of use, has both of the following:

- (a) the right to obtain substantially all of the economic benefits from use of the identified asset; and
- (b) the right to direct the use of the identified asset.

For a contract that is, or contains, a lease, the Group accounts for each lease component within the contract as a lease separately from non-lease components of the contract. For a contract that contains a lease component and one or more additional lease or non-lease components, the Group allocates the consideration in the contract to each lease component on the basis of the relative stand-alone price of the lease component and the aggregate stand-alone price of the non-lease components. The relative stand-alone price of lease and non-lease components shall be determined on the basis of the price the lessor, or a similar supplier, would charge the Group for that component, or a similar component, separately. If an observable stand-alone price is not readily available, the Group estimates the stand-alone price, maximising the use of observable information.

Group as a lessee

Except for leases that meet and elect short-term leases or leases of low-value assets, the Group recognizes right-of-use asset and lease liability for all leases which the Group is the lessee of those lease contracts.

At the commencement date, the Group measures the lease liability at the present value of the lease payments that are not paid at that date. The lease payments discount using the interest rate implicit in the lease, if that rate can be readily determined. If that rate cannot be readily determined, the Group uses its incremental borrowing rate. At the commencement date, the lease payments included in the measurement of the lease liability comprise the following payments for the right to use the underlying asset during the lease term that are not paid at the commencement date:

- (a) fixed payments (including in-substance fixed payments), less any lease incentives receivable;
- (b) variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- (c) amounts expected to be payable by the lessee under residual value guarantees;
- (d) the exercise price of a purchase option if the Group is reasonably certain to exercise that option; and
- (e) payments of penalties for terminating the lease, if the lease term reflects the lessee exercising an option to terminate the lease.

After the commencement date, the Group measures the lease liability on an amortised cost basis, which is increasing the carrying amount to reflect interest on the lease liability by using an effective interest method; and reducing the carrying amount to reflect the lease payments made.

At the commencement date, the Group measures the right-of-use asset at cost. The cost of the right-of-use asset comprises:

- (a) the amount of the initial measurement of the lease liability;
- (b) any lease payments made at or before the commencement date, less any lease incentives received;
- (c) any initial direct costs incurred by the lessee; and
- (d) an estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease.

For subsequent measurement of the right-of-use asset, the Group measures the right-of-use asset at cost less any accumulated depreciation and any accumulated impairment losses. That is, the Group measures the right-of-use applying a cost model.

If the lease transfers ownership of the underlying asset to the Group by the end of the lease term or if the cost of the right-of-use asset reflects that the Group will exercise a purchase option, the Group depreciates the right-of-use asset from the commencement date to the end of the useful life of the underlying asset. Otherwise, the Group depreciates the right-of-use asset from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term.

The Group applies IAS 36 “Impairment of Assets” to determine whether the right-of-use asset is impaired and to account for any impairment loss identified.

Except for leases that meet and elect short-term leases or leases of low-value assets, the Group presents right-of-use assets and lease liabilities in the balance sheet and separately presents lease-related interest expense and depreciation charge in the statements’ comprehensive income.

For short-term leases or leases of low-value assets, the Group elects to recognize the lease payments associated with those leases as an expense on either a straight-line basis over the lease term or another systematic basis.

Group as a lessor

At inception of a contract, the Group classifies each of its leases as either an operating lease or a finance lease. A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership of an underlying asset. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership of an underlying asset. At the commencement date, the Group recognizes assets held under a finance lease in its balance sheet and present them as a receivable at an amount equal to the net investment in the lease.

For a contract that contains lease components and non-lease components, the Group allocates the consideration in the contract applying IFRS 15.

The Group recognizes lease payments from operating leases as rental income on either a straight-line basis or another systematic basis. Variable lease payments for operating leases that do not depend on an index or a rate are recognized as rental income when incurred.

(15) Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is its fair value as at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses, if any. Internally generated intangible assets, not meeting the recognition criteria, are not capitalized and expenditure is reflected in profit or loss for the year in which the expenditure is incurred.

The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired.

The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least at the end of each financial year. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are accounted for by changing the amortization period or method, as appropriate, and are treated as changes in accounting estimates.

Intangible assets with indefinite useful lives are not amortized, but are tested for impairment annually, either individually or at the cash-generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in profit or loss when the asset is derecognized.

A summary of the policies information applied to the Group's intangible assets is as follows:

	Patents	Cost of Computer Software	Technology Expertise	Customer Relationship
Useful economic life	5 years	3 to 5 years	10 years	18.72 years
Amortization method	Straight-line method during the period of the patent	Amortized on a straight-line basis over the estimated useful life	Amortized on a straight-line basis over the estimated useful life	Amortized on a straight-line basis over the estimated useful life
Internally generated or acquired externally	Acquired externally	Acquired externally	Acquired externally	Internally generated

(16) Impairment of non-financial assets

The Group assesses at the end of each reporting period whether there is any indication that an asset in the scope of IAS 36 "Impairment of Assets" may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Group would conduct impairment tests at individual or CGU level. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired. An asset's recoverable amount is the higher of an asset's net fair value or its value in use.

For assets excluding goodwill, an assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the Group estimates the recoverable amount of the asset or CGU. A previously recognized impairment loss is reversed only if there has been an increase in the estimated service potential of an asset which in turn increases the recoverable amount. However, the reversal is limited so that the carrying amount of the asset does not exceed the carrying amount that would have been determined, net of depreciation or amortization, had no impairment loss been recognized for the asset in prior years.

Impairment loss or reversals of continuing operations are recognized in profit or loss.

(17) Revenue recognition

The Group's revenue arising from contracts with customers mainly includes sale of goods. The accounting policies for the Group's types of revenue are explained as follow:

Sale of goods

The Group mainly manufactures and sells of its products. Sales are recognized when control of the goods is transferred to the customer and the goods are delivered to the customers. The main product of the Group is substrate and revenue is recognized based on the consideration stated in the contract. The remaining sales transactions are usually accompanied by volume discounts (based on the accumulated total sales amount for a specified period). Therefore, revenue from these sales is recognized based on the price specified in the contract, net of the estimated volume discounts. Accumulated experience is used to estimate and provide for the discounts, using the expected value method. Revenue is only recognized to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognized will not occur when the uncertainty associated with the variable consideration is subsequently resolved. During the period specified in the contract, refund liability is recognized for the products expected to be returned.

The credit period of the Group's sale of goods is from 30 to 120 days. For most of the contracts, when the Group transfers the goods to customers and has a right to an amount of consideration that is unconditional, these contracts are recognized as trade receivables. The period between the time when the Group transfers the goods to customers and when the customers pay for that goods is usually short and have no significant financing component to the contract. In the case that the Group has the right to transfer the goods to customers but does not has a right to an amount of consideration that is unconditional, these contacts should be presented as contract assets. Besides, in accordance with IFRS 9, the Group measures the loss allowance for a contract asset at an amount equal to the lifetime expected credit losses.

(18) Post-employment benefits

All regular employees of Company are entitled to pension plans that are managed by an independently administered pension fund committee. Fund assets are deposited under the committee's name in the specific bank account and hence, not associated with Company. Therefore, fund assets are not included in the Group's consolidated financial statements. Pension benefits for employees of the overseas subsidiaries and the branches are provided in accordance with the respective local regulations.

For the defined contribution plan, Company will make a monthly contribution of no less than 6% of the monthly wages of the employees subject to the plan. The Company recognizes expenses for the defined contribution plan in the period in which the contribution becomes due. Overseas subsidiaries and branches make contribution to the plan based on the requirements of local regulations and the contribution is expensed as incurred.

Post-employment benefit plan that is classified as a defined benefit plan uses the Projected Unit Credit Method to measure its obligations and costs based on actuarial assumptions. Remeasurements, comprising of the effect of the actuarial gains and losses, the effect of the asset ceiling (excluding net interest) and the return on plan assets, excluding net interest, are recognized as other comprehensive income with a corresponding debit or credit to retained earnings in the period in which they occur. Past service costs are recognized in profit or loss on the earlier of:

- (a) the date of the plan amendment or curtailment, and
- (b) the date that the Company recognizes restructuring-related costs

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset, both as determined at the start of the annual reporting period, taking account of any changes in the net defined benefit liability (asset) during the period as a result of contribution and benefit payment.

(19) Income tax

Income tax expense (benefit) is the aggregate amount included in the determination of profit or loss for the period in respect of current tax and deferred tax.

Current income tax

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities, using the tax rates and tax laws that have been enacted or substantively enacted by the end of reporting period. Current income tax relating to items recognized in other comprehensive income or directly in equity is recognized in other comprehensive income or equity and not in profit or loss.

The income tax for undistributed earnings of the Company and its subsidiaries is recognized as income tax expense in the subsequent year when the distribution proposal is approved by the Shareholders' meeting.

Deferred income tax

Deferred income tax is a temporary difference between the tax bases of assets and liabilities and their carrying amounts in balance sheet at the reporting date.

Deferred tax liabilities are recognized for all taxable temporary differences, except:

- (a) Where the deferred tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination; at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and at the time of the transaction, does not give rise to equal taxable and deductible temporary differences.
- (b) In respect of taxable temporary differences associated with investments in subsidiaries, and associates and interests in joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognized for all deductible temporary differences, any unused tax losses and carry forward of unused tax credits to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilized, except:

- (a) Where the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination; at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and at the time of the transaction, does not give rise to equal taxable and deductible temporary differences.
- (b) In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will be reversed in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted at the reporting date. The measurement of deferred tax assets and liabilities reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities. Deferred tax relating to items recognized outside profit or loss is recognized outside profit or loss. Deferred tax items are recognized in correlation to the underlying transaction either in other comprehensive income or directly in equity. Deferred tax assets are reassessed and recognized at each reporting date.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current income tax assets against current income tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

(20) Business combinations and goodwill

Business combinations are accounted for using the acquisition method. The consideration transferred, the identifiable assets acquired and liabilities assumed are measured at acquisition date fair value. For each business combination, the acquirer measures any non-controlling interest in the acquiree either at fair value or at the non-controlling interest's proportionate share of the acquiree's identifiable net assets. Acquisition-related costs are accounted for as expenses in the periods in which the costs are incurred and are classified under administrative expenses.

When the Group acquires a business, it assesses the assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.

If the business combination is achieved in stages, the acquisition date fair value of the acquirer's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date through profit or loss.

Any contingent consideration to be transferred by the acquirer will be recognized at the acquisition-date fair value. Subsequent changes to the fair value of the contingent consideration which is deemed to be an asset or liability, will be recognized in accordance with IFRS 9 Financial Instruments either in profit or loss or as a change to other comprehensive income. However, if the contingent consideration is classified as equity, it should not be remeasured until it is finally settled within equity.

Goodwill is initially measured as the amount of the excess of the aggregate of the consideration transferred and the non-controlling interest over the net fair value of the identifiable assets acquired and the liabilities assumed. If this aggregate is lower than the fair value of the net assets acquired, the difference is recognized in profit or loss.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. Goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units. Each unit or group of units to which the goodwill is so allocated represents the lowest level within the Group at which the goodwill is monitored for internal management purpose and is not larger than an operating segment before aggregation.

Where goodwill forms part of a cash-generating unit and part of the operation within that unit is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation. Goodwill disposed of in this circumstance is measured based on the relative recoverable amounts of the operation disposed of and the portion of the cash-generating unit retained.

5. SIGNIFICANT ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of the Group's consolidated financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. However, uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date that would have a significant risk for a material adjustment to the carrying amounts of assets and liabilities within the next fiscal year are discussed below.

A. Fair value of financial instruments

Where the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be derived from active markets, they are determined using valuation techniques including income approach (for example, the discounted cash flows model) or the market approach. Changes in assumptions about these factors could affect the reported fair value of the financial instruments. Please refer to Note 12 for more detail.

B. Post-employment benefits

The cost of post-employment benefit pension plan and the present value of the defined benefit obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions, including the change in the discount rate and expected salary level. The assumptions used for measuring pension cost and defined benefit obligation are disclosed in Note 6(14).

C. Income tax

Uncertainties exist with respect to the interpretation of complex tax regulations and the amount and timing of future taxable income. Given the wide range of international business relationships and the long-term nature and complexity of existing contractual agreements, differences arising between the actual results and the assumptions made, or future changes to such assumptions, could necessitate future adjustments to tax income and expense already recorded. The Group establishes provisions, based on reasonable estimates, for possible consequences of audits by the tax authorities of the respective countries in which it operates. The amount of such provisions is based on various factors, such as experience of previous tax audits and differing interpretations of tax regulations by the taxable entity and the responsible tax authority. Such differences of interpretation may arise on a wide variety of issues depending on the conditions prevailing in the respective Group company's domicile.

Deferred tax assets are recognized for all carryforward of unused tax losses and unused tax credits and deductible temporary differences to the extent that it is probable that taxable profit will be available or there are sufficient taxable temporary differences against which the unused tax losses, unused tax credits or deductible temporary differences can be utilized. The amount of deferred tax assets determined to be recognized is based upon the likely timing and the level of future taxable profits and taxable temporary differences together with future tax planning strategies. Please refer to Note 6(22) for more details.

D. Accounts receivable - estimation of impairment loss

The Group estimates the impairment loss of accounts receivable at an amount equal to lifetime expected credit losses. The credit loss is the present value of the difference between the contractual cash flows that are due under the contract (carrying amount) and the cash flows that expects to receive (evaluate forward looking information). However, as the impact from the discounting of short-term receivables is not material, the credit loss is measured by the undiscounted cash flows. Where the actual future cash flows are lower than expected, a material impairment loss may arise. Please refer to Note 6(17) for more details.

E. Inventory

Estimates of net realizable value of inventories take into consideration that inventories may be damaged, become wholly or partially obsolete, or their selling prices have declined. The estimates are based on the most reliable evidence available at the time the estimates are made. Please refer to Note 6(5) for more details.

6. CONTENTS OF SIGNIFICANT ACCOUNTS

(1) Cash and cash equivalents

	As of December 31,	
	2023	2022
Cash and petty cash	\$508	\$654
Checking and savings	256,813	742,233
Time deposit	289,840	28,613
Total	<u>\$547,161</u>	<u>\$771,500</u>

(2) Financial assets at fair value through profit or loss

	As of December 31,	
	2023	2022
Mandatorily measured at fair value through profit or loss:		
Derivatives not designated as hedging instruments		
Forward currency contract	\$-	\$-
Valuation adjustment of financial assets as measured by fair value through profit or loss	6,114	4,591
Total	<u>\$6,114</u>	<u>\$4,591</u>
Current	<u>\$6,114</u>	<u>\$4,591</u>
Non-current	<u>\$-</u>	<u>\$-</u>

No financial asset measured at fair value through profit or loss was pledged as collateral.

(3) Financial assets measured at amortized cost

	As of December 31,	
	2023	2022
Time deposit (More than three months)	\$119,960	\$-
Certificate of deposit - restricted	4,811	4,877
Total	<u>\$124,771</u>	<u>\$4,877</u>
Current	<u>\$124,771</u>	<u>\$4,877</u>
Non-current	<u>\$-</u>	<u>\$-</u>

Please refer to Note 8 for more details on financial assets measured at amortized cost pledged as collaterals.

(4) Accounts receivable and accounts receivable - related parties, net

	As of December 31,	
	2023	2022
Accounts receivable, gross	\$352,095	\$851,331
Less: loss allowance	(1,964)	(1,690)
Net	350,131	849,641
Accounts receivable - related parties, gross	25,722	11,321
Less: loss allowance	-	-
Net	25,722	11,321
Total accounts receivable, net	\$375,853	\$860,962

Account receivables were not pledged.

Accounts receivable are generally on 30-120 day terms. The total carrying amount for the year ended December 31, 2023 and 2022, are NT\$377,817 thousand and NT\$862,652 thousand, respectively. Please refer to Note 6 (17) for more details on loss allowance of accounts receivable for the year ended December 31, 2023 and 2022. Please refer to Note 12 for more details on credit risk management.

(5) Inventory

	As of December 31, 2023		
		Allowance for Inventory Valuation and Obsolescence	
	Inventories, gross	Losses	Inventories, net
Raw material	\$151,458	\$(30,990)	\$120,468
Supplies	3,356	(841)	2,515
Work in process	121,815	(6,320)	115,495
Finished goods	90,094	(10,741)	79,353
Total	\$366,723	\$(48,892)	\$317,831

As of December 31, 2022			
	Inventories, gross	Allowance for Inventory Valuation and Obsolescence Losses	Inventories, net
Raw material	\$192,454	\$(19,755)	\$172,699
Supplies	4,968	(913)	4,055
Work in process	240,488	(7,237)	233,251
Finished goods	151,938	(10,255)	141,683
Total	\$589,848	\$(38,160)	\$551,688

- A. For the year ended December 31, 2023 and 2022, the Group recognized NT\$1,754,673 thousand and NT\$3,317,423 thousand under the caption of costs of sale, respectively. The following items were also included in cost:

Item	For the year ended December 31,	
	2023	2022
Loss (gain) from inventory market decline	\$11,190	\$(15,510)
Loss from physical	(1,234)	(2,153)
Loss from inventory write-off obsolescence	17,419	38,612
Total	\$27,375	\$20,949

The Group recognized gains on recovery of inventory market decline for the year ended December 31, 2022 because some of the inventories previously provided with market loss or obsolescence were disposed.

- B. The inventories were not pledged.

(6) Financial assets at fair value through OCI

	As of December 31,	
	2023	2022
Unlisted companies stocks	<u>\$3,858</u>	<u>\$3,858</u>

Financial assets at fair value through OCI were not pledged.

In consideration of the Group's investment strategy, the Group disposed and derecognized partial equity instrument investments measured at fair value through other comprehensive income. Details on derecognition of such investments for the year ended December 31, 2022 as follow:

	For the year ended December 31,
	<u>2022</u>
The fair value of the investments at the date of derecognition	\$-
The cumulative gain or loss on disposal reclassified from other equity to retained earnings	(10,858)

(7) Investments accounted for under the equity method

Investee companies	As of December 31,			
	2023	Percentage of Ownership		2022
Amount	Amount	Percentage of Ownership		Amount
Investments in subsidiaries:				
Meurich Inc.	Not applicable	\$6,322	23.33%	
Accumulated impairment		<u>(6,322)</u>		
Total		<u>\$-</u>		

A. Investments in associates:

The Group's investments in Mcurich Inc. was not individually material. The aggregate carrying amount of the Group's interests in Mcurich Inc. was NT\$0 as of December 31, 2022. The aggregate financial information based on the Group's share of other companies was as follows:

	For the year ended December 31, 2022
Accounting profit before tax from continuing operations	\$(947)
Total other comprehensive income, net of tax	-
Total comprehensive income	<u>\$(947)</u>

B. There were no contingent liabilities or capital commitments with the investment in the associate as of December 31, 2022. Nor any of the Group's investments accounted for under the equity method was pledged as collateral.

C. The group's investments in associates was transferred into financial assets at fair value through OCI because the shareholding decreased.

(8) Property, plant and equipment

	Land	Buildings	Machinery	Office Equipment	Transportation	Lease Improvement	Other Equipment	Total

The Group recognized an impairment loss amounting to NT\$6,322 thousand on certain real estate to an extent of the recoverable value in 2022. This impairment loss has been recorded in the Group's statements of comprehensive incomes. The recoverable value is measured at fair value less cost to sell.

Please refer to Note 8 for details on property, plant and equipment pledged as collaterals.

	<u>For the year ended December 31,</u>	
	<u>2023</u>	<u>2022</u>
Operating costs	\$523	\$364
Operating expense	44,337	43,773
Total	<u>\$44,860</u>	<u>\$44,137</u>

(10) Impairment testing of goodwill and intangible assets with indefinite lives

Goodwill acquired through business combinations and licences with indefinite lives have been allocated to two cash-generating units, which are also reportable operating segments, for impairment testing as follows:

	<u>112.12.31</u>	<u>111.12.31</u>
Action Star Technology Co., Ltd.	<u>\$75,095</u>	<u>\$75,095</u>

The recoverable amount of the electronic cash-generating unit is NT\$2,214,076 thousand for the period ended December 31, 2023. This recoverable amount has been determined based on a value in use calculation using cash flow projections from financial budgets approved by management covering a five-year period. The projected cash flows have been updated to reflect the change in demand for products and services. The pre-tax discount rate applied to cash flow projections are 12.90% and 13.37% as of December 31, 2023 and 2022, and cash flows beyond the five-year period are extrapolated using 15%~20% and 8%~10% growth rate as of December 31, 2023 and 2022 that is the same as the long-term average growth rate for the electronics industry. As a result of the updated analysis, management did not identify an impairment for goodwill of NT\$75,095 thousand which is allocated to this cash-generating unit.

Key assumptions used in value-in-use calculations

The calculation of value-in-use for both electronics and fire prevention equipment units are most sensitive to the following assumptions:

- (a) Gross margin
- (b) Discount rates
- (c) Growth rate used to extrapolate cash flows beyond the budget period.

Gross margins – Gross margins are based on average values achieved in recent years preceding the start of the budget period.

Discount rates – Discount rates reflect the current market assessment of the risks specific to each cash generating unit (including the time value of money and the risks specific to the asset for which the future cash flow estimates have not been adjusted). The discount rate was estimated based on the weighted average cost of capital (WACC) for the Group, taking into account the particular situations of the Group and its operating segments. The WACC includes both the cost of liabilities and cost of equities. The cost of equities is derived from the expected returns of the Group's investors on capital, where the cost of liabilities is measured by the interest-bearing loans that the Group has obligation to settle. Specific risk relating to the operating segments is accounted for by considering the individual beta factor which is evaluated annually and based on publicly available market information.

Growth rate estimates – Rates are based on published industry research. For the reasons explained above, the long-term average growth rate used to extrapolate the budget for the fire prevention equipment unit has been adjusted because of the acquisition of a significant industry patent.

Sensitivity to changes in assumptions

With regard to the assessment of value-in-use of the fire prevention equipment unit, management believes that no reasonably possible change in any of the above key assumptions would cause the carrying value of the unit to materially exceed its recoverable amount.

(11) Financial liabilities at fair value through profit or loss

	As of December 31,	
	2023	2022
Mandatorily measured at fair value through profit or loss:		
Derivatives not designated as hedging instruments		
Forward currency contract	\$-	\$-
Valuation adjustment of financial liabilities as measured by fair value through profit or loss	51	1,110
Total	<u>\$51</u>	<u>\$1,110</u>
Current	<u>\$51</u>	<u>\$1,110</u>
Non-current	<u>\$-</u>	<u>\$-</u>

(12) Other payables

	As of December 31,	
	2023	2022
Employee benefit payable	\$72,329	\$134,644
Equipment payable	7,670	4,713
Other payable	97,337	107,409
Total	<u>\$177,336</u>	<u>\$ 246,766</u>

(13) Long-term loans

Details of long-term loans as of December 31, 2023 were as follows:

<u>Debtor</u>	<u>2023.12.31</u>	<u>Interest rate</u>	<u>Repayment</u>
Taiwan Business Bank Credit loan	\$110,000	Variable interest rate +0.41%	Effective July 5, 2021 to July 5, 2026. Repayable quarterly NT\$10,000 thousand.
Less: current portion	<u>(40,000)</u>		
Total	<u>\$70,000</u>		

Details of long-term loans as of December 31, 2022 were as follows:

<u>Debtor</u>	<u>2022.12.31</u>	<u>Interest rate</u>	<u>Repayment</u>
Taiwan Business Bank Credit loan	\$150,000	Variable interest rate +0.41%	Effective July 5, 2021 to July 5, 2026. Repayable quarterly NT\$10,000 thousand.
CTBC Bank Secured bank loan	99,896	Variable interest rate +0.7%	Effective October 26, 2016 to October 26, 2031. Repayable monthly NT\$945 thousand.
Subtotal	<u>249,896</u>		
Less: current portion	<u>(51,340)</u>		
Total	<u>\$198,556</u>		

There is no pledge or collateral for long-term loans of the Group as of December 31, 2023, Certain land and buildings are pledged as first priority security for secured bank loans with CTBC Bank. Please refer to Note 8 for more details as of December 31, 2022.

(14) Post-employment benefits

Defined contribution plan

The Company adopted a defined contribution plan in accordance with the Labor Pension Act of the R.O.C. Under the Labor Pension Act, the Company will make monthly contributions of no less than 6% of the employees' monthly wages to the employees' individual pension accounts. The Company has made monthly contributions of 6% of each individual employee's salaries or wages to employees' pension accounts.

Subsidiaries located in the People's Republic of China will contribute social welfare benefits based on a certain percentage of employees' salaries or wages to the employees' individual pension accounts.

Pension benefits for employees of overseas subsidiaries and branches are provided in accordance with the local regulations.

Expenses under the defined contribution plan for the years ended December 31, 2023 and 2022 amounted to NT\$12,677 thousand and NT\$13,217 thousand, respectively.

Defined benefits plan

The Company adopts a defined benefit plan in accordance with the Labor Standards Act of the R.O.C. The pension benefits are disbursed based on the units of service years and the average salaries in the last month of the service year. Two units per year are awarded for the first 15 years of services while one unit per year is awarded after the completion of the 15th year. The total units shall not exceed 45 units. Under the Labor Standards Act, the Company contributes an amount equivalent to 2% of the employees' total salaries and wages on a monthly basis to the pension fund deposited at the Bank of Taiwan in the name of the administered pension fund committee.

The Ministry of Labor is in charge of establishing and implementing the fund utilization plan in accordance with the Regulations for Revenues, Expenditures, Safeguard and Utilization of the Labor Retirement Fund. The pension fund is invested in-house or under mandate, based on a passive-aggressive investment strategy for long-term profitability. The Ministry of Labor establishes checks and risk management mechanism based on the assessment of risk factors including market risk, credit risk and liquidity risk, in order to maintain adequate manager flexibility to achieve targeted return without over-exposure of risk. With regard to utilization of the pension fund, the minimum earnings in the annual distributions on the final financial statement shall not be less than the earnings attainable from the amounts accrued from two-year time deposits with the interest rates offered by local banks. Treasury Funds can be used to cover the deficits after the approval of the competent authority. As the Company does not participate in the operation and management of the pension fund, no disclosure on the fair value of the plan assets categorized in different classes could be made in accordance with paragraph 142 of IAS 19. The Group expects to contribute NT\$144 thousand to its defined benefit plan during the 12 months beginning after December 31, 2023.

As of December 31, 2023 and 2022, the maturities of the Company defined benefit plan are in 2033 and 2032.

Pension costs recognized in profit or loss are as follows:

	For the year ended December 31,	
	2023	2022
Current service costs	\$-	\$102
Net interest of defined benefit liability (asset)	39	66
Total	<u>\$39</u>	<u>\$168</u>

Reconciliation in the defined benefit obligation and fair value are as follows:

	As of December 31,	
	2023	2022
Defined benefit obligation	\$9,033	\$8,989
Plan assets at fair value	(6,353)	(6,051)
Other non-current liabilities – net defined benefit liability	<u>\$2,680</u>	<u>\$2,938</u>

Reconciliation of liability (asset) of the defined benefit liability is as follows:

	Present value of defined benefit obligation	Fair value of plan assets	Net defined benefit liability(asset)
1/1/2022	\$17,996	\$(7,976)	\$10,020
Current service cost	102	-	102
Interest cost (income)	117	(51)	66
Total	<u>219</u>	<u>(51)</u>	<u>168</u>
Re-measurement on defined benefit liability/assets:			
Actuarial gain/loss due to change in financial assumptions	(721)	-	(721)
Experience gain/loss	(5,763)	-	(5,763)
Re-measurement on defined benefit assets	-	(612)	(612)
Total	<u>(6,484)</u>	<u>(612)</u>	<u>(7,096)</u>
Benefits paid	(2,742)	2,742	-
Contributions by employer	-	(154)	(154)
12/31/2022	8,989	(6,051)	2,938
Current service cost	-	-	-
Interest cost (income)	120	(81)	39
Total	<u>120</u>	<u>(81)</u>	<u>39</u>
Re-measurement on defined benefit liability/assets:			
Actuarial gain/loss due to change in financial assumptions	123	-	123
Experience gain/loss	(199)	-	(199)
Re-measurement on defined benefit assets	-	(67)	(67)
Total	<u>(76)</u>	<u>(67)</u>	<u>(143)</u>
Benefits paid	-	-	-
Contributions by employer	-	(154)	(154)
12/31/2023	<u>\$9,033</u>	<u>\$(6,353)</u>	<u>\$2,680</u>

The actuarial assumptions used for the Company's defined benefit plan are shown below.

	As of December 31,	
	2023	2022
Discount rate	1.23%	1.35%
Expected rate of salary increases	2.00%	2.00%

Sensitivity analysis

	For the year ended December 31,			
	2023		2022	
	Increase in defined benefit obligation	Decrease in defined benefit obligation	Increase in defined benefit obligation	Decrease in defined benefit obligation
Discount rate increased by 0.25%	\$-	\$(253)	\$-	\$(260)
Discount rate decreased by 0.25%	262	-	270	-
Expected salary level increased by 0.5%	515	-	539	-
Expected salary level decreased by 0.5%	-	(479)	-	(503)

For the purpose of sensitivity analysis above, the Company calculated the impact on defined benefit obligation due to a reasonable and feasible change of one single assumption (i.e. discount rate or expected salary level) with other assumptions remaining equal. Please note that the sensitivity analysis has its limitation due to the co-relation between different actuarial assumptions and the rarity that only one assumption changes at a time.

The method used in the analysis is consistent for both current and prior years.

(15) Equity

A. Common stock

As of December 31, 2023 and 2022, the Company's authorized capital were NT\$1,200,000 thousand, the Company's paid-in capital were NT\$799,729 thousand, each share at par value of NT\$10, divided into 79,972,945 shares.

B. Capital surplus

	As of December 31,	
	2023	2022
Additional paid-in capital	\$545,978	\$545,978
All changes in interests in subsidiaries	1,172	1,172
Changes in equity of investment accounted for using equity method	1,350	1,350
Other	3,218	3,218
Total	<u>\$551,718</u>	<u>\$551,718</u>

According to Company Act, the capital surplus shall not be used except for making good the deficit of the Company. When a company incurs no loss, it may distribute the capital surplus related to the income derived from the issuance of new shares at a premium or income from endowments received by the company up to a certain percentage of paid-in capital. The said capital surplus could be distributed in cash to its shareholders in proportion to the number of shares being held by each of them. Capital surplus related to long-term equity investments cannot be used for any purpose.

C. Appropriation of earnings and dividend policies

(a) Legal reserve

According to the Company Act, legal reserve shall be set aside until such amount equal total authorized capital. Legal reserve can be used to offset deficits. If the Company does not incur any loss, the portion of legal reserve exceeding 25% of the paid-in capital may be distributed to shareholders by issuing new shares or by cash in proportion to the number of shares held by each shareholder.

(b) Special reserve

The FSC issued Order No. Financial-Supervisory-Securities-Corporate-1090150022 on March 31, 2021, which sets out the following provisions for compliance:

On a public company's first-time adoption of the IFRS, for any unrealized revaluation gains and cumulative translation adjustments (gains) recorded to shareholders' equity that the company elects to transfer to retained earnings by application of the exemption under IFRS 1, the company shall set aside special reserve. For any subsequent use, disposal or reclassification of related assets, the company can reverse the special reserve by proportion and transfer to retained earnings.

As of December 31, 2023 and 2022, the Company first-time adoption of T-IFRS NT\$26,375 thousand, respectively.

(c) Earning distribution and dividend policies

(1) Earning distribution

According to the Company's Articles of Incorporations, current year's earnings, if any, shall be distributed in the following order:

- a. Payment of all taxes and dues;
- b. Offsetting prior years' operation losses;
- c. Set aside 10% of the remaining amount after deducting items (a) and (b) as legal reserve;
- d. Set aside or reverse special reserve in accordance with law and regulations; and
- e. The distribution of the remaining portion, if any, will be recommended by the Board of Directors and resolved in the shareholders' meeting. If the preceding paragraph is done in cash, it should authorize the board of directors to resolve and report to the shareholders' meeting.

(2)Dividend policies

The company's dividend policy is in line with the growth characteristics of the technology industry and the overall environment, while taking into account a stable and balanced dividend policy, and taking into account factors such as profitability, financial structure, and future development. If there is a surplus in the final annual accounts and the distributable surplus for the current year reaches 2% of the capital, the dividend distribution should not be less than 10% of the distributable surplus for the year. The distribution of surplus may be made in accordance with the company's overall capital budget planning. Accordingly, at least 10% of the dividends must be paid in the form of cash.

The Company may issue new shares or cash in accordance with the Company Act 241 in the form of statutory surplus reserve or capital reserve, and if the preceding paragraph is done in cash, it should authorize the board of directors to resolve and report to the shareholders' meeting.

As of December 31, 2023, the Company incurred accumulated losses and therefore had no proposal from the board of directors regarding the distribution of earnings.

The appropriations of earnings for the year 2022 were approved through the Board of Directors' meetings and held on June 9, 2023. The details of the distributions are as follows:

	<u>Appropriation of earnings</u>	<u>Dividend per share</u>
	2022	2022
Legal reserve	\$24,547	
Special reserve	(1,050)	
Cash dividend (Note)	199,932	\$2.5
Total	<u>\$223,429</u>	

Note: According to the Company's Articles of Incorporations, the appropriations of cash dividend for the year 2022 were approved through the Board of Directors' meeting held on February 21, 2023.

Please refer to Note 6(19) for details on employees' compensation and remuneration to directors and supervisors.

(d) Non-controlling interests

	<u>For the year ended December 31,</u>	
	<u>2023</u>	<u>2022</u>
Beginning balance	\$733,256	\$653,860
Profit (loss) attributable to non-controlling interests	(17,600)	112,082
Other comprehensive income, attributable to non-controlling interests, net of tax:		
Exchange differences resulting from translating the financial statements of a foreign operation	515	194
Decrease in non-controlling interests	(9,834)	-
Receive cash dividends	<u>(98,642)</u>	<u>(32,880)</u>
Ending balance	<u>\$607,695</u>	<u>\$733,256</u>

(16) Sales

	<u>For the year ended December 31,</u>	
	<u>2023</u>	<u>2022</u>
Revenue from customer contracts		
Sales of goods	<u>\$2,039,055</u>	<u>\$4,231,024</u>

Analysis of revenue from contracts with customers during the year ended December 31, 2023 and 2022 are as follows:

A. Disaggregation of revenue

For the year ended December 31, 2023

	<u>Single department</u>
Sales of goods	<u>\$2,039,055</u>
The timing for revenue recognition:	
At a point in time	<u>\$2,039,055</u>

For the year ended December 31, 2022

	<u>Single department</u>
Sales of goods	<u>4,231,024</u>
The timing for revenue recognition:	
At a point in time	<u>4,231,024</u>

B. Contract balances

(a) Contract liabilities – current

	<u>As of December 31,</u>	
	<u>2023</u>	<u>2022</u>
Sales of goods	<u>\$11,946</u>	<u>\$8,875</u>

The significant changes in the Group's balances of contract liabilities for the year periods ended December 31, 2023 and 2022 are as follows:

	<u>For the year ended December 31,</u>	
	<u>2023</u>	<u>2022</u>
The opening balance transferred to revenue	\$(3,915)	\$(16,300)
Increase in receipts in advance during the period (excluding the amount incurred and transferred to revenue during the period)	6,986	5,467

C. Assets recognized from costs to fulfil a contract

None.

(17) Expected credit losses (gains)

	<u>For the year ended December 31,</u>	
	<u>2023</u>	<u>2022</u>
Operating expenses – Expected credit losses / (gains)		
Accounts receivable	<u>\$504</u>	<u>\$573</u>

Please refer to Note 12 for more details on credit risk.

The Group measures the loss allowance of its contract assets and accounts receivable (including notes receivable and accounts receivable) at an amount equal to lifetime expected credit losses. The assessment of the Group's loss allowance as of December 31, 2023 and 2022 are as follows:

The Group considers the grouping of accounts receivable by counter-parties' credit rating, by geographical region and by industry sector and its loss allowance is measured by using a provision matrix. Details are as follows:

December 31, 2023	Not past due	Past due					Total
		<=30 days	31-90 days	91-120 days	121-270 days	>=271 days	
Gross carrying amount	\$325,529	\$24,323	\$27,965	\$-	\$-	\$-	\$377,817
Loss ratio	-%	0.5%	6.6%	-%	-%	-%	
Lifetime expected credit losses	-	(132)	(1,832)	-	-	-	(1,964)
Carrying amount of accounts receivable	\$325,529	\$24,191	\$26,133	\$-	\$-	\$-	\$375,853

(18) Leases

Group as a lessee

The Group leases various properties, including real estate such as buildings, office equipment and transportation equipment. The lease terms range from 2 to 18 years.

The Group's leases effect on the financial position, financial performance and cash flows are as follows:

A. Amounts recognized in the balance sheet

a. Right-of-use assets

	<u>As of December 31,</u>	
	<u>2023</u>	<u>2022</u>
Buildings	\$11,999	\$30,225
Transportation equipment	480	218
Office equipment	168	-
Total	<u><u>\$12,647</u></u>	<u><u>\$30,443</u></u>

b. Lease liabilities

	As of December 31,	
	2023	2022
Lease liabilities	\$13,423	\$31,528
Current	\$9,206	\$20,580
Non-current	\$4,217	\$10,948

Please refer to Note 6 (20)(4) for the interest on lease liabilities recognized during the year ended December 31, 2023 and 2022 and refer to Note 12 (5) Liquidity Risk Management for the maturity analysis for lease liabilities as at December 31, 2023 and 2022.

B. Amounts recognized in the income statement

Right-of-use assets

	For the year ended December 31,	
	2023	2022
Buildings	\$20,932	\$24,238
Transportation equipment	211	160
Office equipment	50	34
Total	\$21,193	\$24,432

C. Income and costs relating to leasing activities

	For the year ended December 31,	
	2023	2022
The expenses relating to short-term leases	\$4,968	\$2,628
The expenses relating to leases of low-value assets-non-current	-	464

The portfolio of short-term leases of the Group to which it is committed at the end of the reporting period is dissimilar to the portfolio of short-term leases to which the short-term lease expenses disclosed above, and the amount of its lease commitments is NT\$0.

D. Cash outflow relating to leasing activities

During the year ended December 31, 2023 and 2022, the Group's total cash outflow for leases amounting to NT\$27,088 thousand and NT\$28,537 thousand, respectively.

(19) Summary statement of employee benefits, depreciation and amortization by function is as follows:

Nature \ Function	2023			2022		
	Cost of goods sold	Operating expense	Total	Cost of goods sold	Operating expense	Total
Employee benefit						
Salaries & wages	\$229,252	\$143,519	\$372,771	\$281,899	\$158,871	\$440,770
Labor and health insurance	22,640	14,059	36,699	23,678	14,348	38,026
Pension	5,725	6,991	12,716	6,020	7,365	13,385
Other employee benefit	41,575	31,706	73,281	48,699	89,041	137,740
Depreciation	71,091	33,374	104,465	81,668	40,668	122,336
Amortization	523	44,337	44,860	364	43,773	44,137

According to the resolution, 5%~20% of profit of the current year is distributable as employees' compensation and no higher than 1% of profit of the current year is distributable as remuneration to directors and supervisors. However, the Company's accumulated losses shall have been covered. The Company may have the profit distributable as employees' compensation in the form of shares or in cash; and in addition, thereto a report of such distribution is submitted to the shareholders' meeting. Information on the Board of Directors' resolution regarding the employees' compensation and remuneration to directors and supervisors can be obtained from the "Market Observation Post System" on the website of the TWSE.

The Company estimated the amounts of the employees' compensation and remuneration to directors and supervisors for the year ended December 31, 2022 to be not lower than 6% and not higher than 0.75% of profit of the current period, respectively, recognized as employee benefits expense. As such, employees' compensation and remuneration to directors and supervisors for the year ended December 31, 2022 amounted to NT\$17,253 thousand and NT\$2,157 thousand, respectively. The employees' compensation and remuneration to directors and supervisors were recognized as salaries.

The board of directors of the company resolved to pay the employees' compensation and remuneration to directors and supervisors amount NT\$17,253 thousand and NT\$2,157 thousand respectively on February 21, 2023.

For the year ended December 31, 2023, the Company incurred accumulated loss and therefore did not accrue the employees' compensation and remuneration to directors.

(20) Non-operating incomes and expenses

A. Interest income

	For the year ended December 31,	
	2023	2022
Interest income	\$6,525	\$1,739

B. Other incomes

	For the year ended December 31,	
	2023	2022
Rent income	\$299	\$304
Other income	6,502	9,151
Total	\$6,801	\$9,455

C. Other gains and losses

	For the year ended December 31,	
	2023	2022
Gains on lease modification	\$-	\$49
Foreign exchange gain (loss), net	(14,922)	20,196
Impairment losses	-	(6,322)
Gain (Loss) from disposal of property, plant and equipment	(10)	16,372
Gain of financial assets at fair value through profit or loss	2,583	1,500
Loss on disposal of investments	(6,653)	
Other expenses	(488)	(2,006)
Total	<u>\$(19,490)</u>	<u>\$29,789</u>

D. Finance costs

	For the year ended December 31,	
	2023	2022
Interests on bank loans	\$3,072	\$4,526
Interest on lease liabilities	624	1,195
Total	<u>\$3,696</u>	<u>\$5,721</u>

(21) Components of other comprehensive income

For the year ended December 31, 2023

	Arising during the period	Reclassification during the period	Subtotal	Income tax benefit (expense)	OCI, Net of tax
<u>Not reclassified to profit or loss:</u>					
Remeasurements of defined benefits plan	\$143	\$-	\$143	\$-	\$143
<u>May be reclassified to profit or loss in subsequent period:</u>					
Exchange differences arising on translation of foreign operations	2,934	-	2,934	-	2,934
Total OCI	<u>\$3,077</u>	<u>\$-</u>	<u>\$3,077</u>	<u>\$-</u>	<u>\$3,077</u>

For the year ended December 31, 2022

	Arising during the period	Reclassification during the period	Subtotal	Income tax benefit (expense)	OCI, Net of tax
<u>Not reclassified to profit or loss:</u>					
Remeasurements of defined benefits plan	\$7,096	\$-	\$7,096	\$-	\$7,096

Impairment loss on assets	2,773	(2,252)	521
Realized financial assets measured at fair value through profit or loss	(330)	(280)	(610)
Sales returns and allowances	-	2,583	2,583
Provisions of employee benefit obligations	242	-	242
Land value increment tax	(702)	-	(702)
Deferred tax income/ (expense)		\$3,179	
Net deferred tax assets/(liabilities)	\$11,039		\$14,218
Reflected in balance sheet as follows:			
Deferred tax assets	\$12,071		\$15,530
Deferred tax liabilities	\$(1,032)		\$(1,312)

D. Unused balance of deductible net operating loss within the Company was listed as follows:

The amount and duration of the unused deductible losses of the Company are as follows:

Occurrence year	Accumulated net operating loss	Unused balance		Expiration Year
		As of December 31, 2023	2022	
2023(expect)	\$3,700	\$3,700	\$-	2028

The amount and duration of the unused deductible losses of the Subsidiary are as follows:

Occurrence year	Accumulated net operating loss	Unused balance		Expiration Year
		As of December 31, 2023	2022	
2019	\$9,381	\$-	\$9,381	2024
2020	8,142	-	8,142	2025
2021	32,283	27,050	32,283	2026
2022	41,782	41,782	41,782	2027
2023 (expect)	39,997	39,997	-	2028
Total	\$131,585	\$108,829	\$91,588	

E. Unrecognized deferred tax assets

As of December 31, 2023 and 2022, deferred tax assets that have not been recognized as they may not be used to offset future taxable income amounted to NT\$84,103 thousand and NT\$74,591 thousand, respectively.

F. The assessment of income tax return

As of December 31, 2023, the assessment status of income tax returns of the Company and subsidiaries was as follows:

	<u>The assessment of income tax returns</u>
The Company	Assessed and approved up to 2021
Subsidiary – Action Star Technology Co., Ltd.	Assessed and approved up to 2021

(23) Earnings per share

Basic earnings per share is calculated by dividing net profit for the year attributable to the common shareholders of the parent entity by the weighted average number of common shares outstanding during the year.

A. Basic earnings per share

	For the year ended December 31,	
	2023	2022
Net income (loss) available to common shareholders of the parent	<u>\$(83,450)</u>	<u>\$249,235</u>
Weighted average number of common shares outstanding (in thousand shares)	<u>79,973</u>	<u>79,973</u>
Basic earnings per share (in NT\$)	<u>\$(1.04)</u>	<u>\$3.12</u>

B. Diluted earnings per share

	For the year ended December 31,	
	2023	2022
Net income (loss) available to common shareholders of the parent	<u>\$(83,450)</u>	<u>\$249,235</u>
Net income (loss) available to common shareholders of the parent after dilution	<u>\$(83,450)</u>	<u>249,235</u>
Weighted average number of common shares outstanding (in thousand shares)	<u>79,973</u>	<u>79,973</u>
Effect of dilution:		
Employee bonus (compensation) – stock (in thousand shares)	<u>-</u>	<u>560</u>
Weighted average number of common shares outstanding after dilution (in thousand shares)	<u>79,973</u>	<u>80,533</u>
Diluted earnings per share (in NT\$)	<u>\$(1.04)</u>	<u>\$3.09</u>

No other transactions that would significantly change the outstanding common shares or potential common shares incurred during the period after reporting date and up to the approval date of financial statements.

(24) Subsidiary that has material non-controlling interests

Proportion of equity interest held by non-controlling interests

Name	Country	As of December 31,	
		2023	2022
Opti Cloud Technologies, Inc.	China	-%	48.82%
Action Star Technology Co., Ltd.	Taiwan	40.65%	40.65%

Accumulated balances of material non-controlling interest:

	As of December 31,	
	2023	2022
Opti Cloud Technologies, Inc.	\$-	\$11,566
Action Star Technology Co., Ltd.	607,175	721,690

Profit (loss) allocated to material non-controlling interest:

	For the year ended December 31,	
	2023	2022
Opti Cloud Technologies, Inc.	\$(1,382)	\$(2,815)
Action Star Technology Co., Ltd.	(15,873)	114,897

The summarized financial information of this subsidiary is provided below. This information is based on amounts before inter-company eliminations.

Summarized the Group's information of profit or loss is as follows:

For the year ended December 31, 2023

	Opti Cloud Technologies, Inc.	Action Star Technology Co., Ltd.
Operating revenue	\$-	\$1,236,219
Profit/loss from continuing operation	(2,830)	9,370
Total comprehensive income for the period	(2,830)	9,370

For the year ended December 31, 2022

	Opti Cloud Technologies, Inc.	Action Star Technology Co., Ltd.
Operating revenue	\$-	\$2,962,599
Profit/loss from continuing operation	(5,767)	333,344
Total comprehensive income for the period	(5,767)	333,344

Summarized the Group's information of financial position is as follows:

As of December 31, 2023

	Opti Cloud Technologies, Inc.	Action Star Technology Co., Ltd.
Current assets	\$-	\$857,578
Non-current assets	-	358,088
Current liabilities	-	187,683
Non-current liabilities	-	954

As of December 31, 2022

	Opti Cloud Technologies, Inc.	Action Star Technology Co., Ltd.
Current assets	\$23,740	\$1,486,600
Non-current assets	-	379,985
Current liabilities	50	517,398
Non-current liabilities	-	88,885

Summarized the Group's cash flows information is as follows:

For the year ended December 31, 2023

	Opti Cloud Technologies, Inc.	Action Star Technology Co., Ltd.
Operating activities	\$-	\$410,071
Investing activities	-	(138,411)
Financing activities	-	(342,990)
Net increase/(decrease) in cash and cash equivalents	-	(71,330)

For the year ended December 31, 2022

	Opti Cloud Technologies, Inc.	Action Star Technology Co., Ltd.
Operating activities	\$(127)	\$346,126
Investing activities	-	(26,938)
Financing activities	-	(92,437)
Net increase/(decrease) in cash and cash equivalents	(127)	226,751

Total	<u>\$516,951</u>	<u>\$911,521</u>

Note: Including cash and cash equivalents, financial assets measured at amortized cost, accounts receivable, accounts receivable-related parties, other receivables and other receivables-related parties.

(2) Financial risk management objectives and policies

The Group's principal financial risk management objective is to manage the market risk, credit risk and liquidity risk related to its operating activities. The Group identifies, measures, and manages the risks based on its policy and risk preferences.

The Group has established appropriate policies, procedures and internal controls for financial risk management. Before entering into significant transactions, due approval process by the Board of Directors and Audit Committee must be carried out based on related protocols and internal control procedures. The Group complies with its financial risk management policies always.

(3) Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of the changes in market prices. Market risk comprises currency risk, interest rate risk and other price risk (e.g. equity instruments).

In practice, it is rarely the case that a single risk variable will change independently from other risk variables. There are usually interdependencies between risk variables. However, the sensitivity analysis disclosed below does not take into account the interdependencies between risk variables.

Foreign currency risk

The Group's exposure to foreign currency risk relates primarily to the Group's operating activities (when revenue or expense are denominated in a different currency from the Group's functional currency) and the Group's net investments in foreign operations.

The Group has certain foreign currency receivables denominated in the same foreign currency as certain foreign currency payables, therefore natural hedge is achieved. Thus, hedge accounting is not adopted.

Foreign currency sensitivity analysis of possible change in foreign exchange rates on the Group's profit/loss and equity is performed on significant monetary items denominated in foreign currencies as of the reporting period-end. The Group's foreign currency risk is mainly related to volatility in the exchange rates of US dollars and CNY dollars. It is stated as follows:

If NT dollars appreciates/depreciates against US dollars by 1%, net income (loss) for the year ended December 31, 2023 and 2022 would decrease/increase by NT\$3,725 thousand and NT\$8,206 thousand, respectively.

If NT dollars appreciates/depreciates against CNY dollars by 1%, net income (loss) for the year ended December 31, 2023 and 2022 would decrease/increase by NT\$953 thousand and NT\$636 thousand, respectively.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group's exposure to interest rate risk relates primarily to the Group's investments with variable interest rates and loans with fixed and variable interest rates, which are all categorized as loans and receivables.

The Group manages its interest rate risk by having a balanced portfolio of fixed and variable loans and borrowings and entering into interest rate swaps. Hedge accounting does not apply to these swaps as they do not qualify for it.

The interest rate sensitivity analysis is performed on items exposed to interest rate risk as of the end of the reporting period and presumed to be held for one accounting year, including investments and loans with variable interest rates. If interest rate increases/decreases by 0.1%, the net income (loss) for the year ended December 31, 2023 and 2022 would decrease/increase by NT\$437 thousand and NT\$95 thousand, respectively.

Equity price risk

The fair value of the Group's unlisted equity securities are susceptible to market price risk arising from uncertainties about future values of the investment securities. The Group's unlisted equity securities are classified under financial assets measured at fair value through other comprehensive income.

The Group manages the equity price risk through diversification and placing limits on individual and total equity instruments. Reports on the equity portfolio are submitted to the Group's senior management on a regular basis. The Group's Board of Directors reviews and approves all equity investment decisions.

Please refer to Note 12(9) for sensitivity analysis information of other equity instruments or derivatives that are linked to such equity instruments whose fair value measurement is categorized under Level 1.

(4) Credit risk management

Credit risk is the risk that counterparty will not meet its obligations under a contract and result in a financial loss. The Group is exposed to credit risk from operating activities (primarily for accounts and notes receivable) and from its financing activities including bank deposits and other financial instruments.

Customer credit risk is managed by each business unit subject to the Group's established policy, procedures and control relating to customer credit risk management. Credit risk of all customers are assessed based on a comprehensive review of the customers' financial status, credit ratings from credit institutions, past transactions, current economic conditions and the Group's internal credit ratings. The Group also employs some credit enhancement instruments (e.g. prepayment or insurance) to reduce certain customers' credit risk.

As of December 31, 2023 and 2022, receivables from the top ten customers were accounted for 72.63% and 85.93% of the Group's total accounts receivable, respectively. The concentration of credit risk is relatively insignificant for the remaining receivables.

Credit risk from balances with banks and other financial instruments is managed by the Group's finance division in accordance with the Group's policy. The counterparties that the Group transacts with are determined by internal control procedures. They are banks with fine credit ratings and financial institutions, corporate and government agencies with investment-grade credit ratings. Thus, there is no significant default risk. Conclusively, no significant credit risk is expected by the Group.

(5) Liquidity risk management

The Group maintains financial flexibility using cash and cash equivalents, highly-liquid marketable securities, bank loans, etc. The table below summarizes the maturity profile of the Group's financial liabilities based on the contractual undiscounted payments and contractual maturity. The payment amount includes the contractual interest. The undiscounted interest payment relating to borrowings with variable interest rates is extrapolated based on the estimated yield curve as of the end of the reporting period.

Non-derivative financial instruments

	Less than 1 year	1 to 2 years	2 to 3 years	More than 3 years	Total
<u>As of December 31, 2023</u>					
Payables	\$393,477	\$-	\$-	\$-	\$393,477
Lease liabilities	9,367	1,449	526	2,775	14,117
Loans	41,711	40,911	30,158	-	112,780
<u>As of December 31, 2022</u>					
Payables	\$628,987	\$-	\$-	\$-	\$628,987

Loans	55,640	54,658	51,756	101,928	263,982

(6) Movement schedule of liabilities arising from financing activities

Movement schedule of liabilities for year ended December 31, 2023:

	Long-term borrowings	Leases liabilities	Total liabilities from financing activities
As of January 1, 2023	\$249,896	\$31,528	\$281,424
Cash flows	(139,896)	(22,120)	(162,016)
Non-cash changes	-	4,015	4,015
As of December 31, 2023	<u>\$110,000</u>	<u>\$13,423</u>	<u>\$123,423</u>

Movement schedule of liabilities for the year ended December 31, 2022:

	Short-term borrowings	Long-term borrowings	Leases liabilities	Total liabilities from financing activities
As of January 1, 2022	\$106,880	\$301,236	\$55,530	\$463,646
Cash flows	(107,803)	(51,340)	(25,445)	(184,588)
Non-cash changes				
Other	923	-	1,443	2,366
As of December 31, 2022	<u>\$-</u>	<u>\$249,896</u>	<u>\$31,528</u>	<u>\$281,424</u>

(7) Fair values of financial instruments

A. The evaluation methods and assumptions applied in determining the fair value

Fair value is the price that would be received to sell a financial asset or paid to transfer a financial liability in an orderly transaction between willing market participants (not under coercion or liquidation). The following methods and assumptions are used by the Group in estimating the fair values of financial assets and liabilities:

- (a) The carrying amount of cash and cash equivalents, receivables, payables and other current liabilities approximate their fair value due to their short maturity terms.

(b) Fair value of equity instruments without market quotations (including private placement of listed equity securities, unquoted public company and private company equity securities) are estimated using the market method valuation techniques based on parameters such as prices based on market transactions of equity instruments of identical or comparable entities and other relevant information (for example, inputs such as discount for lack of marketability, P/E ratio of similar entities and Price-Book ratio of similar entities).

(c) Fair value of debt instruments without market quotations, bank loans, bonds payable and other non-current liabilities are determined based on the counterparty prices or valuation method. The valuation method uses DCF method as a basis, and the assumptions such as the interest rate and discount rate are primarily based on relevant information of similar instrument (such as yield curves published by the Taiwan Over-The-Counter Securities Exchanges, average prices for Fixed Rate Commercial Paper published by Reuters and credit risk, etc.)

B. Fair value of financial instruments measured at amortized cost

The carrying amount of the Group's financial assets and liabilities measure at amortized cost approximates their fair value.

C. Fair value measurement hierarchy for financial instruments

Please refer to Note 12(9) for fair value measurement hierarchy for financial instruments of the Group.

(8) Derivative financial instruments

The Group's derivative financial instruments include forward currency contracts and embedded derivatives. The related information for derivative financial instruments not qualified for hedge accounting and not yet settled as at December 31 2023 and 2022 is as follows:

Forward currency contracts

The Group entered into forward currency contracts to manage its exposure to financial risk, but these contracts are not designated as hedging instruments. The table below lists the information related to forward currency contracts:

<u>Items (by contract)</u>	<u>Notional Amount</u>	<u>Contract Period</u>
As of December 31, 2023		
Forward currency contract	Sell USD 9,461	2023.10.26 ~ 2024.04.30
As of December 31, 2022		
Forward currency contract	Sell USD 23,225	2022.09.29 ~ 2023.03.31

(9) Fair value measurement hierarchy

A. Fair value measurement hierarchy

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, based on the lowest level input that is significant to the fair value measurement as a whole. Level 1, 2 and 3 inputs are described as follows:

Level 1 – Quoted (unadjusted) market prices in active markets for identical assets or liabilities that the entity can access at the measurement date

Level 2 – Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly

Level 3 – Unobservable inputs for the asset or liability

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Group determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorization at the end of each reporting period.

B. Fair value measurement hierarchy of the Group's assets and liabilities

The Group does not have assets that are measured at fair value on a non-recurring basis. Fair value measurement hierarchy of the Group's assets and liabilities measured at fair value on a recurring basis is as follows:

As of December 31, 2023

	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
<u>Financial assets:</u>				
Financial assets at fair value through profit or loss				
Forward currency contract	<u>\$-</u>	<u>\$6,114</u>	<u>\$-</u>	<u>\$6,114</u>
Financial assets at fair value through other comprehensive income	<u>\$-</u>	<u>\$-</u>	<u>\$3,858</u>	<u>\$3,858</u>
<u>Financial liabilities:</u>				
Financial liabilities at fair value through profit or loss				
Forward currency contract	<u>\$-</u>	<u>\$51</u>	<u>\$-</u>	<u>\$51</u>

As of December 31, 2022

	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
<u>Financial assets:</u>				
Financial assets at fair value through profit or loss				
Forward currency contract	\$-	\$4,591	\$-	\$4,591
Financial assets at fair value through other comprehensive income	\$-	\$-	\$3,858	\$3,858
<u>Financial liabilities:</u>				
Financial liabilities at fair value through profit or loss				
Forward currency contract	\$-	\$1,110	\$-	\$1,110

Transfers between Level 1 and Level 2 during the period

For the year ended December 31, 2023 and 2022, there were no transfers between Level 1 and Level 2 fair value hierarchy.

Reconciliation for fair value measurements on a recurring basis in Level 3 hierarchy

For the year ended December 31 2023, there were no transfers in Level 3 hierarchy.

Reconciliation for fair value measurements in Level 3 of the fair value hierarchy for movements during the year ended December 31 2022, is as follows:

	<u>Assets</u>
	<u>At fair value through other comprehensive income</u>
Beginning balances as of January 1, 2022	\$4,880
Amount recognized in gains/losses (report on other comprehensive income)	(1,022)
Ending balances as of December 31, 2022	\$3,858

Information on significant unobservable inputs to valuation in Level 3 hierarchy

Description of significant unobservable inputs to valuation of recurring fair value measurements categorized within Level 3 of the fair value hierarchy is as follows:

As of December 31, 2023

	Valuation techniques	Significant unobservable inputs	Quantitative information	Relationship between inputs and fair value	Sensitivity of the input to fair value
Financial assets:					
At fair value through OCI					
Stock	Market approach	Discount for lack of marketability	30%	The higher the discount for lack of marketability, the lower the fair value of the stocks	1% increase (decrease) in the discount for lack of marketability would result in decrease (increase) in the Group's equity by NT\$19 thousand

As of December 31, 2022

	Valuation techniques	Significant unobservable inputs	Quantitative information	Relationship between inputs and fair value	Sensitivity of the input to fair value
Financial assets:					
At fair value through OCI					
Stock	Market approach	Discount for lack of marketability	30%	The higher the discount for lack of marketability, the lower the fair value of the stocks	1% increase (decrease) in the discount for lack of marketability would result in decrease (increase) in the Group's equity by NT\$37 thousand

(10) Significant financial assets and liabilities denominated in foreign currencies

Information regarding the Group's significant financial assets and liabilities denominated in foreign currencies was listed below: (In Thousands)

	<u>As of December 31, 2023</u>		
	<u>Foreign</u>	<u>Exchange Rate</u>	<u>NTD</u>
	<u>Currencies</u>		
<u>Financial assets</u>			
Monetary items:			
USD	<u>\$15,398</u>	30.75	<u>\$473,479</u>
CNY	<u>\$8,023</u>	4.3364	<u>\$34,791</u>
<u>Financial liabilities</u>			
Monetary items:			
USD	<u>\$3,222</u>	30.75	<u>\$99,075</u>
CNY	<u>\$30,111</u>	4.3364	<u>\$130,571</u>
	<u>As of December 31, 2022</u>		
	<u>Foreign</u>	<u>Exchange Rate</u>	<u>NTD</u>
	<u>Currencies</u>		
<u>Financial assets</u>			
Monetary items:			
USD	<u>\$34,197</u>	30.73	<u>\$1,050,866</u>
CNY	<u>\$18,436</u>	4.4057	<u>\$81,224</u>
<u>Financial liabilities</u>			
Monetary items:			
USD	<u>\$7,362</u>	30.73	<u>\$226,220</u>
CNY	<u>\$32,933</u>	4.4057	<u>\$145,093</u>

Foreign exchange gain/loss on monetary financial assets and liabilities is shown as below.

	For the year ended December 31,	
	2023	2022
USD	\$(14,901)	\$19,861
Other	(21)	335
Total	\$(14,922)	\$20,196

The above information is disclosed based on the carrying amount of foreign currency (after being converted to functional currency).

(11) Capital management

The primary objective of the Group's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios to support its business and maximize shareholder value. The Group manages and adjusts its capital structure considering changes in economic conditions. To maintain or adjust the capital structure, the Group may adjust dividend payment to shareholders, return capital to shareholders or issue new shares.

13. ADDITIONAL DISCLOSURES

(1) Information on significant transactions

A. Financing provided to others: None.

B. Endorsement/Guarantee provided to others: None.

C. Marketable securities held as of December 31, 2023 (excluding investments in subsidiaries, associates and joint ventures): Please refer to attachment 1.

D. Individual securities acquired or disposed of with accumulated amount of at least NT\$ 300 million or 20 percent of the paid-in capital for the year ended December 31, 2023: None.

E. Acquisition of individual real estate with amount of at least NT\$300 million or 20 percent of the paid-in capital for the year ended December 31, 2023: None.

- F. Disposal of individual real estate with amount of at least NT\$300 million or 20 percent of the paid-in capital for the year ended December 31, 2023: None.
- G. Related party transactions with purchase or sales amount of at least NT\$100 million or 20 percent of the paid-in capital for the year ended December 31, 2023: Please refer to attachment 2.
- H. Receivables from related parties of at least NT\$100 million or 20 percent of the paid-in capital as of December 31, 2023: None.
- I. Derivative instrument transactions: Please refer to Note 12(8).
- J. Intercompany relationships and significant intercompany transactions for the year ended December 31, 2023: Please refer to attachment 5.

(2) Information on investees

- A. Investees over whom the Company exercises significant influence or control (excluding investees in Mainland China): Please refer to attachment 3.
- B. Investees over which the Company exercises control shall be disclosed of information:
 - (a) Financing provided to others: None.
 - (b) Endorsement/Guarantee provided to others: None.
 - (c) Marketable securities held as of December 31, 2023 (excluding investments in subsidiaries, associates and joint ventures): None.
 - (d) Individual securities acquired or disposed of with accumulated amount of at least NT\$300 million or 20 percent of the paid-in capital for the year ended December 31, 2023: None.
 - (e) Acquisition of individual real estate with amount of at least NT\$300 million or 20 percent of the paid-in capital for the year ended December 31, 2023: None.

- (f) Disposal of individual real estate with amount of at least NT\$300 million or 20 percent of the paid-in capital for the year ended December 31, 2023: None.
- (g) Related party transactions with purchase or sales amount of at least NT\$100 million or 20 percent of the paid-in capital for the year ended December 31, 2023: Please refer to attachment 4.
- (h) Receivables from related parties of at least NT\$100 million or 20 percent of the paid-in capital as of December 31, 2023: None.
- (i) Derivative instrument transactions: Please refer to attachment 12(8).

Note 1: Transaction information between Parent company and its subsidiaries should be disclosed by codes below:

- (1) Parent company is coded "0".
- (2) The subsidiaries are coded from "1" in the order presented in the table above.

Note 2: Relationship are divided into the following three types and the types are required to be indicated:

- (1) From the parent company to a subsidiary.
- (2) From a subsidiary to the parent company.
- (3) Between subsidiaries.

Note 3: Regarding the percentage of transaction amount to consolidated operating revenues or total assets, it is computed based on the ending balance to consolidated total assets for balance sheet items; and based on interim accumulated amount to consolidated net revenue for income statement items.

Appendix II

Parent Company only Financial Statements with Independent Auditors' Report for the most recent year

English Translation of an Audit Report Originally Issued in Chinese

INDEPENDENT AUDITORS' REPORT

To: The Board of Directors and Shareholders of
Simula Technology Inc.

Opinion

We have audited the accompanying parent-company-only balance sheets of Simula Technology Inc. (the "Company") as of December 31, 2023 and 2022, and the related parent-company-only statements of comprehensive income, changes in equity and cash flows for the years then ended, and notes to the parent-company-only financial statements, including the summary of significant accounting policies (together referred as "the parent-company-only financial statements").

In our opinion, the parent-company-only financial statements referred to above present fairly, in all material respects, the parent-company-only financial position of the Company as of December 31, 2023 and 2022, and the parent-company-only financial performance and cash flows for the years then ended, in conformity with the requirements of the Regulations Governing the Preparation of Financial Reports by Securities Issuers.

Basis for Opinion

We conducted our audits in accordance with the Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants and the Standards on Auditing of the Republic of China. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Parent-Company-Only Financial Statements section of our report. We are independent of the Company in accordance with the Norm of Professional Ethics for Certified Public Accountant of the Republic of China (the "Norm"), and we have fulfilled our other ethical responsibilities in accordance with the Norm. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of the most significance in our audit of parent-company-only financial statements for the year ended December 31, 2023.

These matters were addressed in the context of our audit of the parent-company-only financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Revenue recognition

We determine that revenue recognition is one of the key audit matters. The Company's revenue amounting to NT\$697,322 thousand for the year ended December 31, 2023 is a significant account to the Company's financial statements. The Company has conducted these sale activities in multi-marketplace, including Taiwan, China, USA, etc. Furthermore, the timing of fulfilling performance obligation needs to be determined based on varieties of sale terms and conditions enacted in the main sale contracts or sale orders. Our audit procedures therefore include, but not limit to, evaluating the properness of accounting policy for revenue recognition, assessing and testing the effectiveness of relevant internal controls related to revenue recognition, sampling-test of details, including obtaining major sale orders or agreements to inspect the terms and conditions, checking the consistency of the fulfillment timing, performing analytical review procedures on monthly sale revenues, executing sale cut-off tests, etc. We have also evaluated the appropriateness of the related disclosure in Note 6 to the parent-company-only financial statements.

Market valuation on inventory (including inventories of the subsidiaries under the equity method)

We determine the market valuation on inventory including inventories of the subsidiaries under the equity method is one of the key audit matters in considering that the amount of inventory was significant and the assessment of sufficiency of inventory loss requires significant management judgement. The Company's main products, are characterized by rapid development in technology and the trend of consumers' preference. Management, in timely considering the status of new products development and the demand from clients, has to evaluate the loss due to market value decline as well as write-down on slow-moving inventories to their net realizable value. Our audit procedures therefore include, but not limit to, evaluating the Company's policy with respect to the assessment of the loss from slow-moving inventory and phased-out items, testing the accuracy of inventory aging schedule, analyzing inventory movement, performing observation on the Company's inventory physical-taking, and inspecting the current status of inventory usage, etc.

Responsibilities of Management and Those Charged with Governance for the Parent-Company-Only Financial Statements

Management is responsible for the preparation and fair presentation of the parent-company-only financial statements in accordance with the requirements of the Regulations Governing the Preparation of Financial Reports by Securities Issuers and for such internal control as management determines is necessary to enable the preparation of parent-company-only financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the parent-company-only financial statements, management is responsible for assessing the ability to continue as a going concern of the Company, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, including audit committee, are responsible for overseeing the financial reporting process of the Company.

Auditor's Responsibilities for the Audit of the Parent-Company-Only Financial Statements

Our objectives are to obtain reasonable assurance about whether the parent-company-only financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing of the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these parent-company-only financial statements.

As part of an audit in accordance with the Standards on Auditing of the Republic of China, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

1. Identify and assess the risks of material misstatement of the parent-company-only financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the internal control of the Company.
3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability to continue as a going concern of the Company. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
5. Evaluate the overall presentation, structure and content of the parent-company-only financial statements, including the accompanying notes, and whether the parent-company-only financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
6. Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Company to express an opinion on the parent-company-only financial statements. We are responsible for the direction, supervision and performance of the company audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of 2023 parent-company-only financial statements and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

1. HISTORY AND ORGANIZATION

Simula Technology Inc. (referred to “the Company”) was established on December 15, 2003. Its main business activities include the manufacture of electronic products, the whole-sale and product designing, and international trading. The Company’s common shares were publicly listed on the Taiwan Over-The-Counter Securities Exchanges on September 16, 2008. The registered business premise and main operation address is at 14F., No. 1351, Zhongzheng Rd., Taoyuan Dist., Taoyuan City, Taiwan.

Qisda Corporation is the ultimate controller of the Group to which the Company belongs.

2. DATE AND PROCEDURE OF AUTHORIZATION FOR FINANCIAL STATEMENTS ISSUANCE

The financial statements of the Company were authorized to be issued in accordance with a resolution of the Board of Directors’ meeting held on February 23, 2024.

3. NEWLY ISSUED OR REVISED STANDARDS AND INTERPRETATIONS

- (1) Changes in accounting policies resulting from applying for the first time certain standards and amendments

The Company applied for the first time International Financial Reporting Standards, International Accounting Standards, and Interpretations issued, revised, or amended which are recognized by the Financial Supervisory Commission (“FSC”) and become effective for annual periods beginning on or after January 1, 2023. The adoption of these new standards and amendments and interpretations of initial application has no material impact on the Company.

(2) Standards or interpretations issued, revised or amended, by International Accounting Standards Board (“IASB”) which are endorsed by FSC, and not yet adopted by the Company as of the end of the reporting period are listed below.

Items	New, Revised or Amended Standards and Interpretations	Effective Date issued by IASB
a	Classification of Liabilities as Current or Non-current – Amendments to IAS 1	January 1, 2024
b	Lease Liability in a Sale and Leaseback – Amendments to IFRS 16	January 1, 2024
c	Non-current Liabilities with Covenants – Amendments to IAS 1	January 1, 2024
d	Supplier Finance Arrangements – Amendments to IAS 7 and IFRS 7	January 1, 2024

(a) Classification of Liabilities as Current or Non-current – Amendments to IAS 1

These are the amendments to paragraphs 69-76 of IAS 1 Presentation of Financial Statements and the amended paragraphs related to the classification of liabilities as current or non-current.

(b) Lease Liability in a Sale and Leaseback – Amendments to IFRS 16

The amendments add additional seller-lessees requirements for the sale and leaseback transactions in IFRS 16, thereby supporting the consistent application of the standard.

(c) Non-current Liabilities with Covenants – Amendments to IAS 1

The amendments improved the information companies provide about long-term debt with covenants. The amendments specify that covenants to be complied within twelve months after the reporting period do not affect the classification of debt as current or non-current at the end of the reporting period.

(d) Supplier Finance Arrangements – Amendments to IAS 7 and IFRS 7

The amendments introduced additional information of supplier finance arrangements and added disclosure requirements for such arrangements.

The abovementioned standards and interpretations were issued by IASB and endorsed by FSC so that they are applicable for annual periods beginning on or after January 1, 2024. The remaining standards and interpretations have no material impact on the Company.

(3) Standards or interpretations issued, revised or amended, by IASB which are not endorsed by FSC, and not yet adopted by the Company as of the end of the reporting period are listed below.

Items	New, Revised or Amended Standards and Interpretations	Effective Date issued by IASB
a	IFRS 10 “Consolidated Financial Statements” and IAS 28 “Investments in Associates and Joint Ventures” – Sale or Contribution of Assets between an Investor and its Associate or Joint Ventures	To be determined by IASB
b	IFRS 17 “Insurance Contracts”	January 1, 2023
c	Lack of Exchangeability – Amendments to IAS 21	January 1, 2025

(a) IFRS 10 “Consolidated Financial Statements” and IAS 28 “Investments in Associates and Joint Ventures” – Sale or Contribution of Assets between an Investor and its Associate or Joint Ventures

The amendments address the inconsistency between the requirements in IFRS 10 Consolidated Financial Statements and IAS 28 Investments in Associates and Joint Ventures, in dealing with the loss of control of a subsidiary that is contributed to an associate or a joint venture. IAS 28 restricts gains and losses arising from contributions of non-monetary assets to an associate or a joint venture to the extent of the interest attributable to the other equity holders in the associate or joint ventures. IFRS 10 requires full profit or loss recognition on the loss of control of the subsidiary. IAS 28 was amended so that the gain or loss resulting from the sale or contribution of assets that constitute a business as defined in IFRS 3 between an investor and its associate or joint venture is recognized in full.

IFRS 10 was also amended so that the gains or loss resulting from the sale or contribution of a subsidiary that does not constitute a business as defined in IFRS 3 between an investor and its associate or joint venture is recognized only to the extent of the unrelated investors’ interests in the associate or joint venture.

(b)IFRS 17 “Insurance Contracts”

IFRS 17 provides a comprehensive model for insurance contracts, covering all relevant accounting aspects (including recognition, measurement, presentation and disclosure requirements). The core of IFRS 17 is the General (building block) Model, under this model, on initial recognition, an entity shall measure a group of insurance contracts at the total of the fulfilment cash flows and the contractual service margin. The carrying amount of a group of insurance contracts at the end of each reporting period shall be the sum of the liability for remaining coverage and the liability for incurred claims.

Other than the General Model, the standard also provides a specific adaptation for contracts with direct participation features (the Variable Fee Approach) and a simplified approach (Premium Allocation Approach) mainly for short-duration contracts.

IFRS 17 was issued in May 2017 and it was amended in 2020 and 2021. The amendments include deferral of the date of initial application of IFRS 17 by two years to annual beginning on or after January 1, 2023 (from the original effective date of January 1, 2021); provide additional transition reliefs; simplify some requirements to reduce the costs of applying IFRS 17 and revise some requirements to make the results easier to explain. IFRS 17 replaces an interim Standard – IFRS 4 Insurance Contracts – from annual reporting periods beginning on or after January 1, 2023.

(c)Lack of Exchangeability – Amendments to IAS 21

These amendments specify whether a currency is exchangeable into another currency and, when it is not, to determining the exchange rate to use and the disclosures to provide. The amendments apply for annual reporting periods beginning on or after January 1, 2025.

The abovementioned standards and interpretations issued by IASB have not yet endorsed by FSC at the date when the Company’s financial statements were authorized for issue, the local effective dates are to be determined by FSC. The remaining new or amended standards and interpretations have no material impact on the Company.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(1) Statement of compliance

The parent-company-only financial statements of the Company for the years ended December 31, 2023 and 2022 were prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers (“the Regulations”).

(2) Basis of preparation

The Company prepared parent-company-only financial statements in accordance with Article 21 of the Regulations, which provided that the profit or loss and other comprehensive income for the period presented in the parent-company-only financial statements shall be the same as the profit or loss and other comprehensive income attributable to stockholders of the parent presented in the consolidated financial statements for the period, and the total equity presented in the parent-company-only financial statements shall be the same as the equity attributable to the parent company presented in the consolidated financial statements. Therefore, the Company accounted for its investments in subsidiaries using equity method and, accordingly, made necessary adjustments.

The parent-company-only financial statements have been prepared on a historical cost basis, except for financial instruments that have been measured at fair value. The parent-company-only financial statements are expressed in thousands of New Taiwan Dollars (“NT\$”) unless otherwise stated.

(3) Foreign currency transactions

The Company’s parent-company-only financial statements are presented in its functional currency, New Taiwan Dollars (NTD). Items included in the parent-company-only financial statements are measured using that functional currency.

Transactions in foreign currencies are initially recorded by the Company at functional currency rates prevailing at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency closing rate of exchange ruling at the reporting date. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. Non-monetary items that are measured at historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions.

All exchange differences arising on the settlement of monetary items or on translating monetary items are taken to profit or loss in the period in which they arise except for the following.

- (a) Exchange differences arising from foreign currency borrowings for an acquisition of a qualifying asset to the extent that they are regarded as an adjustment to interest costs are included in the borrowing costs that are eligible for capitalization.
- (b) Foreign currency items within the scope of IFRS 9 Financial Instruments are accounted for based on the accounting policy for financial instrument.
- (c) Exchange differences arising on a monetary item that forms part of a reporting entity's net investment in a foreign operation is recognized initially in other comprehensive income and reclassified from equity to profit or loss on disposal of the net investment.

When a gain or loss on a non-monetary item is recognized in other comprehensive income, any exchange component of that gain or loss is recognized in other comprehensive income. When a gain or loss on a non-monetary item is recognized in profit or loss, any exchange component of that gain or loss is recognized in profit or loss.

(4) Translation of financial statements in foreign currency

The assets and liabilities of foreign operations are translated into NTD at the closing rate of exchange prevailing at the reporting date and the income and expenses are translated at an average exchange rate for the period. The exchange differences arising on the translation are recognized in other comprehensive income. On disposal of a foreign operation, the cumulative amount of the exchange differences relating to that foreign operation, recognized in other comprehensive income and accumulated in the separate component of equity, is reclassified from equity to profit or loss when the gain or loss on disposal is recognized. The following are accounted for as disposals even if an interest in the foreign operation is retained by the Company: the loss of control over a foreign operation, the loss of significant influence over a foreign operation, or the loss of joint control over a foreign operation.

On partial disposal of a subsidiary that includes a foreign operation that does not result in a loss of control, the proportionate share of the cumulative amount of the exchange differences recognized in other comprehensive income is re-attributed to the non-controlling interests in that foreign operation. In partial disposal of an associate or jointly controlled entity that includes a foreign operation that does not result in a loss of significant influence or joint control, only the proportionate share of the cumulative amount of the exchange differences recognized in other comprehensive income is reclassified to profit or loss.

Any goodwill and any fair value adjustments to the carrying amounts of assets and liabilities arising on the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and expressed in its functional currency.

(5) Current and non-current distinction

An asset is classified as current when:

- (a) The Company expects to realize the asset, or intends to sell or consume it, in its normal operating cycle.
- (b) The Company holds the asset primarily for the purpose of trading.
- (c) The Company expects to realize the asset within twelve months after the reporting period.
- (d) The asset is cash or cash equivalent unless the asset is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is classified as current when:

- (a) The Company expects to settle the liability in its normal operating cycle.
- (b) The Company holds the liability primarily for the purpose of trading.
- (c) The liability is due to be settled within twelve months after the reporting period.
- (d) The Company does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting period. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

All other liabilities are classified as non-current.

(6) Cash and cash equivalents

Cash and cash equivalents comprises cash on hand, demand deposits and short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value (include fixed-term deposits that have matures of 3 months from the date of acquisition).

(7) Financial instruments

Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the instrument.

The Company determines the classification of its financial assets at initial recognition. In accordance with IFRS 9 and the Regulations, financial assets of the Company are classified as financial assets at fair value through profit or loss, financial assets at fair value through other comprehensive income, financial assets measured at amortized cost and notes, accounts and other receivables. All financial assets are recognized initially at fair value plus, in the case of investments not at fair value through profit or loss, directly attributable costs. Financial assets carried at fair value through profit or loss are initially recognized at fair value, and transaction costs are expensed in the income statement.

(A) Financial assets: Recognition and Measurement

Purchase or sale of financial assets is recognized using trade date accounting.

The Company classified financial assets as subsequently measured at amortized cost, fair value through other comprehensive income or fair value through profit or loss on the basis of both:

- (a) The Company's business model for managing the financial assets and
- (b) The contractual cash flow characteristics of the financial asset.

Financial assets measured at amortized cost

A financial asset is measured at amortized cost if both of the following conditions are met and presented as note receivables, trade receivables financial assets measured at amortized cost and other receivables etc., on balance sheet as at the reporting date:

- (a) The financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and
- (b) The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Such financial assets are subsequently measured at amortized cost (the amount at which the financial asset is measured at initial recognition minus the principal repayments, plus or minus the cumulative amortization using the effective interest method of any difference between the initial amount and the maturity amount and adjusted for any loss allowance) and is not part of a hedging relationship. A gain or loss is recognized in profit or loss when the financial asset is derecognized, through the amortization process or in order to recognize the impairment gains or losses.

Interest revenue is calculated by using the effective interest method. This is calculated by applying the effective interest rate to the gross carrying amount of a financial asset except for:

- (a) Purchased or originated credit-impaired financial assets. For those financial assets, the Company applies the credit-adjusted effective interest rate to the amortized cost of the financial asset from initial recognition.
- (b) Financial assets that are not purchased or originated credit-impaired financial assets but subsequently have become credit-impaired financial assets. For those financial assets, the Company applies the effective interest rate to the amortized cost of the financial asset in subsequent reporting periods.

Financial asset measured at fair value through other comprehensive income

A financial asset is measured at fair value through other comprehensive income if both of the following conditions are met:

- (a) The financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and
- (b) The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Recognition of gain or loss on a financial asset measured at fair value through other comprehensive income are described as below:

- (a) A gain or loss on a financial asset measured at fair value through other comprehensive income recognized in other comprehensive income, except for impairment gains or losses and foreign exchange gains and losses, until the financial asset is derecognized or reclassified.
- (b) When the financial asset is derecognized the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss as a reclassification adjustment.

(c) Interest revenue is calculated by using the effective interest method. This is calculated by applying the effective interest rate to the gross carrying amount of a financial asset except for:

- (i) Purchased or originated credit-impaired financial assets. For those financial assets, the Company applies the credit-adjusted effective interest rate to the amortized cost of the financial asset from initial recognition.
- (ii) Financial assets that are not purchased or originated credit-impaired financial assets but subsequently have become credit-impaired financial assets. For those financial assets, the Company applies the effective interest rate to the amortized cost of the financial asset in subsequent reporting periods.

Besides, at initial recognition, the Company make an irrevocable election to present in other comprehensive income subsequent changes in the fair value of an investment in an equity instrument within the scope of IFRS 9 that is neither held for trading nor contingent consideration recognized by an acquirer in a business combination to which IFRS 3 applies. Amounts presented in other comprehensive income are not be subsequently transferred to profit or loss (when disposal of such equity instrument, its cumulated amount included in other components of equity is transferred directly to the retained earnings) and should recorded as financial assets measured at fair value through other comprehensive income on balance sheet. Dividends on such investment are recognized in profit or loss unless the dividends clearly represents a recovery of part of the cost of investment.

Financial asset measured at fair value through profit or loss

Financial assets were measured at amortized cost or measured at fair value through other comprehensive income only if they met particular conditions. All other financial assets were measured at fair value through profit or loss and presented on the balance sheet as financial assets measured at fair value through profit or loss and trade receivable.

Such financial assets are measured at fair value, the gains or losses resulting from remeasurement is recognized in profit or loss which includes any dividend or interest received on such financial assets.

(B) Impairment of financial assets

The Company is recognized a loss allowance for expected credit losses on debt instrument investments measured at fair value through other comprehensive income and financial asset measured at amortized cost. The loss allowance on debt instrument investments measured at fair value through other comprehensive income is recognized in other comprehensive income and not reduce the carrying amount in the statement of financial position.

The Company measures expected credit losses of a financial instrument in a way that reflects:

- (a) An unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- (b) The time value of money; and
- (c) Reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

The loss allowance is measures as follows:

- (a) At an amount equal to 12-month expected credit losses: the credit risk on a financial asset has not increased significantly since initial recognition or the financial asset is determined to have low credit risk at the reporting date. In addition, the Company measures the loss allowance for a financial asset at an amount equal to lifetime expected credit losses in the previous reporting period but determines at the current reporting date that condition is no longer met.
- (b) At an amount equal to the lifetime expected credit losses: the credit risk on a financial asset has increased significantly since initial recognition or financial asset that is purchased or originated credit-impaired financial asset.
- (c) For trade receivables or contract assets arising from transactions within the scope of IFRS 15, the Company measures the loss allowance at an amount equal to lifetime expected credit losses.

(d) For lease receivables arising from transactions within the scope of IFRS 16, the Company measures the loss allowance at an amount equal to lifetime expected credit losses.

At each reporting date, the Company needs to assess whether the credit risk on a financial asset has been increased significantly since initial recognition by comparing the risk of a default occurring at the reporting date and the risk of default occurring at initial recognition. Please refer to Note 12 for further details on credit risk.

(C) Derecognition of financial assets

A financial asset is derecognized when:

- (a) The rights to receive cash flows from the asset have expired
- (b) The Company has transferred the asset and substantially all the risks and rewards of the asset have been transferred
- (c) The Company has neither transferred nor retained substantially all the risks and rewards of the asset but has transferred control of the asset.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the consideration received or receivable including any cumulative gain or loss that had been recognized in other comprehensive income, is recognized in profit or loss.

(D) Financial liabilities and equity

Classification between liabilities or equity

The Company classifies the instrument issued as a financial liability or an equity instrument in accordance with the substance of the contractual arrangement and the definitions of a financial liability, and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. The transaction costs of an equity transaction are accounted for as a deduction from equity (net of any related income tax benefit) to the extent they are incremental costs directly attributable to the equity transaction that otherwise would have been avoided.

Financial liabilities

Financial liabilities within the scope of IFRS 9 Financial Instruments are classified as financial liabilities at fair value through profit or loss or financial liabilities measured at amortized cost upon initial recognition.

Financial liabilities at amortized cost

Financial liabilities measured at amortized cost include interest bearing loans and borrowings that are subsequently measured using the effective interest rate method after initial recognition. Gains and losses are recognized in profit or loss when the liabilities are derecognized as well as through the effective interest rate method amortization process.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or transaction costs.

Derecognition of financial liabilities

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified (whether or not attributable to the financial difficulty of the debtor), such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss.

(E) Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the balance sheet if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously.

(8) Derivative instrument

The Company uses derivative instruments to hedge its foreign currency risks and interest rate risks. A derivative is classified in the balance sheet as financial assets or liabilities at fair value through profit or loss except for derivatives that are designated as and effective hedging instruments which are classified as financial assets or liabilities for hedging.

Derivative instruments are initially recognized at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative. The changes in fair value of derivatives are taken directly to profit or loss, except for the effective portion of hedges, which is recognized in either profit or loss or equity according to types of hedges used.

When the host contracts are either non-financial assets or liabilities, derivatives embedded in host contracts are accounted for as separate derivatives and recorded at fair value if their economic characteristics and risks are not closely related to those of the host contracts and the host contracts are not designated at fair value through profit or loss.

(9) Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- (a) In the principal market for the asset or liability, or
- (b) In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible to by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

(10) Inventories

Inventories are valued at lower of cost or net realizable value item by item.

Costs incurred in bringing each inventory to its present location and condition are accounted for as follows.

Raw materials - At actual purchase cost, using weighted average method

Finished goods and work in progress - Including cost of direct materials and labor and a proportion of manufacturing overheads based on normal operating capacity, using weighted average method.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

Rending of service is accounted in accordance with IFRS 15 but not within the scoping of inventories.

(11) Investments accounted for using the equity method

The Company accounted for its investments in subsidiaries using equity method and made necessary adjustments in accordance with Article 21 of the Regulations. Such adjustments were made after the Company considered the different accounting treatments to account for its investments in subsidiaries in the consolidated financial statements under IFRS 10 “Consolidated Financial Statements” and the different IFRSs adopted from different reporting entity’s perspectives, and the Company recorded such adjustments by crediting or debiting to investments accounted for under the equity method, share of profit or loss of subsidiaries, associates and joint ventures and share of other comprehensive income of subsidiaries, associates and joint ventures.

The Company’s investment in its associate is accounted for using the equity method other than those that meet the criteria to be classified as held for sale. An associate is an entity over which the Company has significant influence. A joint venture is a type of joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint venture.

Under the equity method, the investment in the associate or investment in a joint venture is carried in the balance sheet at cost and adjusted thereafter for the post-acquisition change in the Company’s share of net assets of the associate or joint venture. After the interest in the associate or joint venture is reduced to zero, additional losses are provided for, and a liability is recognized, only to the extent that the Company has incurred legal or constructive obligations or made payments on behalf of the associate or joint venture. Unrealized gains and losses resulting from transactions between the Company and the associate or joint venture are eliminated to the extent of the Company’s related interest in the associate or joint venture.

When changes in the net assets of an associate or a joint venture occur and not those that are recognized in profit or loss or other comprehensive income and do not affects the Company’s percentage of ownership interests in the associate or joint venture, the Company recognizes such changes in equity based on its percentage of ownership interests. The resulting capital surplus recognized will be reclassified to profit or loss at the time of disposing the associate or joint venture on a pro rata basis.

When the associate or joint venture issues new stock, and the Company's interest in an associate or a joint venture is reduced or increased as the Company fails to acquire shares newly issued in the associate or joint venture proportionately to its original ownership interest, the increase or decrease in the interest in the associate or joint venture is recognized in Additional Paid in Capital and Investment accounted for using the equity method. When the interest in the associate or joint venture is reduced, the cumulative amounts previously recognized in other comprehensive income are reclassified to profit or loss or other appropriate items. The aforementioned capital surplus recognized is reclassified to profit or loss on a pro rata basis when the Company disposes the associate or joint venture.

The financial statements of the associate or joint venture are prepared for the same reporting period as the Company. Where necessary, adjustments are made to bring the accounting policies in line with those of the Company.

The Company determines at each reporting date whether there is any objective evidence that the investment in the associate or an investment in a joint venture is impaired in accordance with IAS 28 Investments in Associates and Joint Ventures. If this is the case the Company calculates the amount of impairment as the difference between the recoverable amount of the associate or joint venture and its carrying value and recognizes the amount in the 'share of profit or loss of an associate' in the statement of comprehensive income in accordance with IAS 36 Impairment of Assets. In determining the value in use of the investment, the Company estimates:

- (a) Its share of the present value of the estimated future cash flows expected to be generated by the associate or joint venture, including the cash flows from the operations of the associate and the proceeds on the ultimate disposal of the investment; or
- (b) The present value of the estimated future cash flows expected to arise from dividends to be received from the investment and from its ultimate disposal.

Because goodwill that forms part of the carrying amount of an investment in an associate or an investment in a joint venture is not separately recognized, it is not tested for impairment separately by applying the requirements for impairment testing goodwill in IAS 36 Impairment of Assets.

Upon loss of significant influence over the associate or joint venture, the Company measures and recognizes any retaining investment at its fair value. Any difference between the carrying amount of the associate or joint venture upon loss of significant influence and the fair value of the retaining investment and proceeds from disposal is recognized in profit or loss. Furthermore, if an investment in an associate becomes an investment in a joint venture or an investment in a joint venture becomes an investment in an associate, the entity continues to apply the equity method and does not remeasure the retained interest.

(12) Property, plant and equipment

Property, plant and equipment are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of dismantling and removing the item and restoring the site on which it is located and borrowing costs for construction in progress if the recognition criteria are met. Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately. When significant parts of property, plant and equipment are required to be replaced in intervals, the Company recognized such parts as individual assets with specific useful lives and depreciation, respectively. The carrying amount of those parts that are replaced is derecognized in accordance with the derecognition provisions of IAS 16 “Property, plant and equipment”. When a major inspection is performed, its cost is recognized in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognized in profit or loss as incurred.

Depreciation is calculated on a straight-line basis over the estimated economic lives of the following assets:

Buildings	3 to 50 years
Machinery	2 to 10 years
Office equipment	3 to 5 years
Transportation	5 years
Other equipment	2 to 5 years
Leasehold improvements	The shorter of lease terms or economic useful lives

An item of property, plant and equipment or any significant part initially recognized is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset is recognized in profit or loss.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

(13) Leases

The Company assesses whether the contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset for a period of time, the Company assesses whether, throughout the period of use, has both of the following:

- (a) the right to obtain substantially all of the economic benefits from use of the identified asset; and
- (b) the right to direct the use of the identified asset.

For a contract that is, or contains, a lease, the Company accounts for each lease component within the contract as a lease separately from non-lease components of the contract. For a contract that contains a lease component and one or more additional lease or non-lease components, the Company allocates the consideration in the contract to each lease component on the basis of the relative stand-alone price of the lease component and the aggregate stand-alone price of the non-lease components. The relative stand-alone price of lease and non-lease components shall be determined on the basis of the price the lessor, or a similar supplier, would charge the Company for that component, or a similar component, separately. If an observable stand-alone price is not readily available, the Company estimates the stand-alone price, maximising the use of observable information.

Company as a lessee

Except for leases that meet and elect short-term leases or leases of low-value assets, the Company recognizes right-of-use asset and lease liability for all leases which the Company is the lessee of those lease contracts.

At the commencement date, the Company measures the lease liability at the present value of the lease payments that are not paid at that date. The lease payments discount using the interest rate implicit in the lease if that rate can be readily determined. If that rate cannot be readily determined, the Company uses its incremental borrowing rate. At the commencement date, the lease payments included in the measurement of the lease liability comprise the following payments for the right to use the underlying asset during the lease term that are not paid at the commencement date:

- (a) fixed payments (including in-substance fixed payments), less any lease incentives receivable;
- (b) variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- (c) amounts expected to be payable by the lessee under residual value guarantees;
- (d) the exercise price of a purchase option if the Company is reasonably certain to exercise that option; and
- (e) payments of penalties for terminating the lease, if the lease term reflects the lessee exercising an option to terminate the lease.

After the commencement date, the Company measures the lease liability on an amortised cost basis, which is increasing the carrying amount to reflect interest on the lease liability by using an effective interest method; and reducing the carrying amount to reflect the lease payments made.

At the commencement date, the Company measures the right-of-use asset at cost. The cost of the right-of-use asset comprises:

- (a) the amount of the initial measurement of the lease liability;
- (b) any lease payments made at or before the commencement date, less any lease incentives received;
- (c) any initial direct costs incurred by the lessee; and
- (d) an estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease.

For subsequent measurement of the right-of-use asset, the Company measures the right-of-use asset at cost less any accumulated depreciation and any accumulated impairment losses. That is, the Company measures the right-of-use applying a cost model.

If the lease transfers ownership of the underlying asset to the Company by the end of the lease term or if the cost of the right-of-use asset reflects that the Company will exercise a purchase option, the Company depreciates the right-of-use asset from the commencement date to the end of the useful life of the underlying asset. Otherwise, the Company depreciates the right-of-use asset from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term.

The Company applies IAS 36 “Impairment of Assets” to determine whether the right-of-use asset is impaired and to account for any impairment loss identified.

Except for leases that meet and elect short-term leases or leases of low-value assets, the Company presents right-of-use assets and lease liabilities in the balance sheet and separately presents lease-related interest expense and depreciation charge in the statement comprehensive income.

For short-term leases or leases of low-value assets, the Company elects to recognize the lease payments associated with those leases as an expense on either a straight-line basis over the lease term or another systematic basis.

Company as a lessor

At inception of a contract, the Company classifies each of its leases as either an operating lease or a finance lease. A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership of an underlying asset. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership of an underlying asset. At the commencement date, the Company recognizes assets held under a finance lease in its balance sheet and present them as a receivable at an amount equal to the net investment in the lease.

For a contract that contains lease components and non-lease components, the Company allocates the consideration in the contract applying IFRS 15.

The Company recognizes lease payments from operating leases as rental income on either a straight-line basis or another systematic basis. Variable lease payments for operating leases that do not depend on an index or a rate are recognized as rental income when incurred.

(14) Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is its fair value as at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses, if any. Internally generated intangible assets, not meeting the recognition criteria, are not capitalized and expenditure is reflected in profit or loss for the year in which the expenditure is incurred.

The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired.

The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least at the end of each financial year. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are accounted for by changing the amortization period or method, as appropriate, and are treated as changes in accounting estimates.

Intangible assets with indefinite useful lives are not amortized, but are tested for impairment annually, either individually or at the cash-generating unit (CGU) level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in profit or loss when the asset is derecognized.

A summary of the policies information applied to the Company's intangible assets is as follows:

	<u>Patents</u>	<u>Cost of Computer Software</u>
Useful economic life	5 years	3 to 5 years
Amortization method	Straight-line method during the period of the patent	Straight-line method during the contract term
Internally generated or acquired externally	Acquired externally	Acquired externally

(15) Impairment of non-financial assets

The Company assesses at the end of each reporting period whether there is any indication that an asset in the scope of IAS 36 "Impairment of Assets" may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Company would conduct impairment tests at individual or CGU level. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired. An asset's recoverable amount is the higher of an asset's net fair value or its value in use.

For assets excluding goodwill, an assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the Company estimates the recoverable amount of the asset or CGU. A previously recognized impairment loss is reversed only if there has been an increase in the estimated service potential of an asset which in turn increases the recoverable amount. However, the reversal is limited so that the carrying amount of the asset does not exceed the carrying amount that would have been determined, net of depreciation or amortization, had no impairment loss been recognized for the asset in prior years.

Impairment loss or reversals of continuing operations are recognized in profit or loss.

(16) Revenue recognition

The Company's revenue arising from contracts with customers mainly includes sale of goods. The accounting policies for the Company's types of revenue are explained as follow:

Sale of goods

The Company mainly manufactures and sells of its products. Sales are recognized when control of the goods is transferred to the customer and the goods are delivered to the customers. The main product of the Company is substrate and revenue is recognized based on the consideration stated in the contract. The remaining sales transactions are usually accompanied by volume discounts (based on the accumulated total sales amount for a specified period). Therefore, revenue from these sales is recognized based on the price specified in the contract, net of the estimated volume discounts. Accumulated experience is used to estimate and provide for the discounts, using the expected value method. Revenue is only recognized to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognized will not occur when the uncertainty associated with the variable consideration is subsequently resolved. During the period specified in the contract, refund liability is recognized for the products expected to be returned.

The credit period of the Company's sale of goods is from 30 to 120 days. For most of the contracts, when the Company transfers the goods to customers and has a right to an amount of consideration that is unconditional, these contracts are recognized as trade receivables. The period between the time when the Company transfers the goods to customers and when the customers pay for that goods is usually short and have no significant financing component to the contract. In the case that the Company has the right to transfer the goods to customers but does not has a right to an amount of consideration that is unconditional, these contacts should be presented as contract assets. Besides, in accordance with IFRS 9, the Company measures the loss allowance for a contract asset at an amount equal to the lifetime expected credit losses.

(17) Post-employment benefits

All regular employees of the Company are entitled to a pension plan that is managed by an independently administered pension fund committee. Fund assets are deposited under the committee's name in the specific bank account and hence, not associated with the Company. Therefore, fund assets are not included in the Company's parent-company-only financial statements. Pension benefits for employees of the overseas subsidiaries and the branches are provided in accordance with the respective local regulations.

For the defined contribution plan, the Company will make a monthly contribution of no less than 6% of the monthly wages of the employees subject to the plan. The Company recognizes expenses for the defined contribution plan in the period in which the contribution becomes due. Overseas subsidiaries and branches make contribution to the plan based on the requirements of local regulations and the contribution is expensed as incurred.

Post-employment benefit plan that is classified as a defined benefit plan uses the Projected Unit Credit Method to measure its obligations and costs based on actuarial assumptions. Re-measurements, comprising of the effect of the actuarial gains and losses, the effect of the asset ceiling (excluding net interest) and the return on plan assets, excluding net interest, are recognized as other comprehensive income with a corresponding debit or credit to retained earnings in the period in which they occur. Past service costs are recognized in profit or loss on the earlier of:

- (a) the date of the plan amendment or curtailment, and
- (b) the date that the Company recognizes restructuring-related costs

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset, both as determined at the start of the annual reporting period, taking account of any changes in the net defined benefit liability (asset) during the period as a result of contribution and benefit payment.

(18) Income tax

Income tax expense (benefit) is the aggregate amount included in the determination of profit or loss for the period in respect of current tax and deferred tax.

Current income tax

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities, using the tax rates and tax laws that have been enacted or substantively enacted by the end of the reporting period. Current income tax relating to items recognized in other comprehensive income or directly in equity is recognized in other comprehensive income or equity and not in profit or loss.

The income tax for undistributed earnings of the Company is recognized as income tax expense in the subsequent year when the distribution proposal is approved by the Shareholders' meeting.

Deferred income tax

Deferred income tax is a temporary difference between the tax bases of assets and liabilities and their carrying amounts in balance sheet at the reporting date.

Deferred tax liabilities are recognized for all taxable temporary differences, except:

- (a) Where the deferred tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination; at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and at the time of the transaction, does not give rise to equal taxable and deductible temporary differences.
- (b) In respect of taxable temporary differences associated with investments in subsidiaries, and associates and interests in joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognized for all deductible temporary differences, any unused tax losses and carry forward of unused tax credits to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilized, except:

- (a) Where the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination; at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and at the time of the transaction, does not give rise to equal taxable and deductible temporary differences.
- (b) In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will be reversed in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted at the reporting date. The measurement of deferred tax assets and liabilities reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities. Deferred tax relating to items recognized outside profit or loss is recognized outside profit or loss. Deferred tax items are recognized in correlation to the underlying transaction either in other comprehensive income or directly in equity. Deferred tax assets are reassessed and recognized at each reporting date.

Deferred tax assets and liabilities are offset, if a legally enforceable right exists to set off current income tax assets against current income tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

5. SIGNIFICANT ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of the Company's financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities.

However, uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

(1) Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date that would have a significant risk for a material adjustment to the carrying amounts of assets and liabilities within the next fiscal year are discussed below.

(a) Fair value of financial instruments

Where the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be derived from active markets, they are determined using valuation techniques including income approach (for example, the discounted cash flows model) or the market approach. Changes in assumptions about these factors could affect the reported fair value of the financial instruments. Please refer to Note 12 for more details.

(b) Post-employment benefits

The cost of post-employment benefit pension plan and the present value of the defined benefit obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions, including the change in the discount rate and expected salary level. The assumptions used for measuring pension cost and defined benefit obligation are disclosed in Note 6(12).

(c) Income tax

Uncertainties exist with respect to the interpretation of complex tax regulations and the amount and timing of future taxable income. Given the wide range of international business relationships and the long-term nature and complexity of existing contractual agreements, differences arising between the actual results and the assumptions made, or future changes to such assumptions, could necessitate future adjustments to tax income and expense already recorded. The Company establishes provisions, based on reasonable estimates, for possible consequences of audits by the tax authorities of the respective countries in which it operates. The amount of such provisions is based on various factors, such as experience of previous tax audits and differing interpretations of tax regulations by the taxable entity and the responsible tax authority. Such differences of interpretation may arise on a wide variety of issues depending on the conditions prevailing in the respective company's domicile.

Deferred tax assets are recognized for all carryforward of unused tax losses and unused tax credits and deductible temporary differences to the extent that it is probable that taxable profit will be available or there are sufficient taxable temporary differences against which the unused tax losses, unused tax credits or deductible temporary differences can be utilized. The amount of deferred tax assets determined to be recognized is based upon the likely timing and the level of future taxable profits and taxable temporary differences together with future tax planning strategies. Please refer to Note 6(20) for more details.

(d) Accounts receivables – estimation of impairment loss

The Company estimates the impairment loss of accounts receivables at an amount equal to lifetime expected credit losses. The credit loss is the present value of the difference between the contractual cash flows that are due under the contract (carrying amount) and the cash flows that expects to receive (evaluate forward looking information). However, as the impact from the discounting of short-term receivables is not material, the credit loss is measured by the undiscounted cash flows. Where the actual future cash flows are lower than expected, a material impairment loss may arise. Please refer to Note 6(15) for more details.

(e) Inventory

Estimates of net realizable value of inventories take into consideration that inventories may be damaged, become wholly or partially obsolete, or their selling prices have declined. The estimates are based on the most reliable evidence available at the time the estimates are made. Please refer to Note 6(4) for more details.

6. CONTENTS OF SIGNIFICANT ACCOUNTS

(1) Cash and cash equivalents

	As of December 31,	
	2023	2022
Cash and petty cash	\$69	\$67
Checking and savings	113,037	244,823
Total	<u>\$113,106</u>	<u>\$244,890</u>

(2) Financial assets at fair value through profit or loss

	As of December 31,	
	2023	2022
Mandatorily measured at fair value through profit or loss:		
Derivatives not designated as hedging instruments		
Forward currency contract	\$-	\$-
Valuation adjustment of financial assets as measured by fair value through profit or loss	3,183	2,361
Total	<u>\$3,183</u>	<u>\$2,361</u>
Current	<u>\$3,183</u>	<u>\$2,361</u>
Non-current	<u>\$-</u>	<u>\$-</u>

No financial asset at fair value through profit or loss was pledged as collateral.

(3) Accounts receivable and accounts receivable - related parties, net

	As of December 31,	
	2023	2022
Accounts receivable, gross	\$114,353	\$166,702
Less: loss allowance	(126)	(338)
Net	114,227	166,364
Accounts receivable - related parties, gross	21,305	1,344
Less: loss allowance	-	-
Net	21,305	1,344
Total accounts receivable, net	\$135,532	\$167,708

Account receivables were not pledged.

Accounts receivable are generally on 30-120 day terms. The total carrying amount for the year ended December 31, 2023 and 2022, are NT\$135,658 thousand and NT\$168,046 thousand, respectively. Please refer to Note 6 (15) for more details on loss allowance of accounts receivable for the year ended December 31, 2023 and 2022. Please refer to Note 12 for more details on credit risk management.

(4) Inventory

	As of December 31, 2023		
	Inventories, gross	Allowance for Inventory Valuation and Obsolescence Losses	Inventories, net
Raw material	\$8,374	\$(2,892)	\$5,482
Work in process	11,930	(181)	11,749
Merchandises	8,721	(2,463)	6,258
Total	\$29,025	\$(5,536)	\$23,489

As of December 31, 2022			
	Allowance for Inventory Valuation and Obsolescence		
	Inventories, gross	Losses	Inventories, net
Raw material	\$11,651	\$(1,976)	\$9,675
Work in process	8,283	(746)	7,537
Merchandises	9,388	(1,765)	7,623
Total	\$29,322	\$(4,487)	\$24,835

- A. For the year ended December 31, 2023 and 2022, the Company recognized NT\$554,904 thousand and NT\$861,165 thousand under the caption of costs of sale, respectively. The following items were also included in cost:

Item	For the year ended December 31,	
	2023	2022
Loss from inventory market decline	\$1,049	\$1,302
Loss from inventory write-off obsolescence	647	1,500
Total	\$1,696	\$2,802

- B. The inventories were not pledged.

- (5) Financial assets at fair value through other comprehensive income

	As of December 31,	
	2023	2022
Unlisted companies stocks	\$3,858	\$3,858

Financial assets at fair value through other comprehensive income were not pledged.

In consideration of the Company's investment strategy, the Company disposed and derecognized partial equity instrument investments measured at fair value through other comprehensive income. Details on derecognition of such investments as follow:

	For the year ended December 31, <u>2022</u>
The fair value of the investments at the date of derecognition	\$-
The cumulative gain or loss on disposal reclassified from other equity to retained earnings	(10,858)

(6) Investments accounted for under the equity method

	As of December 31,			
	<u>2023</u>		<u>2022</u>	
Investee companies	Amount	Percentage of Ownership	Amount	Percentage of Ownership
Investments in subsidiaries:				
ASPIRE ASIA INC.	\$116,274	100.00%	\$142,565	100.00%
Simula Technology Corp.	44,911	100.00%	42,177	100.00%
Simula Company Limited	116,676	52.31%	143,342	52.31%
Action Star Technology Co., Ltd.	961,481	59.35%	1,128,656	59.35%
Total	<u>1,239,342</u>		<u>1,456,740</u>	
Investments in associates:				
Mcurich Inc.	-	Not Applicable	6,322	23.33%
Accumulated impairment	-		<u>(6,322)</u>	
Subtotal	-		-	
Total	<u>\$1,239,342</u>		<u>\$1,456,740</u>	

A. Investments in subsidiaries

Investments in subsidiaries were present in the parent-company-only financial statements under the caption of investments accounted for under equity method. Valuation adjustment is made if deemed necessary.

Simula Technology Inc.

Notes to Parent-Company-Only Financial Statements (Continued)

B. Investments in associates:

The Company's investments in Mcurich Inc. was not individually material. The aggregate carrying amount of the Company's interests in Mcurich Inc. was NT\$0 as of December 31, 2022. The aggregate financial information based on the Company's share of other companies was as follows:

	For the year ended December 31, 2022
Accounting profit before tax from continuing operations	\$(947)
Total other comprehensive income, net of tax	-
Total comprehensive income	\$(947)

There were no contingent liabilities or capital commitments with the investment in the associate as of December 31, 2022. Nor any of the Group's investments accounted for under the equity method was pledged as collateral.

The Company's investments in associates was transferred into financial assets at fair value through OCI because the shareholding decreased.

(7) Property, plant and equipment

	Land	Buildings	Machinery	Office Equipment	Transportation	Lease Improvement	Other Equipment	Total

(11) Long-term loans

Details of long-term loans as of December 31, 2023 and 2022 were as follows:

Debtor	2023.12.31	Interest rate	Repayment
Taiwan Business Bank Credit loan	\$110,000	Variable interest rate +0.41%	Effective July 5, 2021 to July 5, 2026. Repayable quarterly NT\$10,000 thousand.
Less: current portion	<u>(40,000)</u>		
Total	<u>\$70,000</u>		
Debtor	2022.12.31	Interest rate	Repayment
Taiwan Business Bank Credit loan	\$150,000	Variable interest rate +0.41%	Effective July 5, 2021 to July 5, 2026. Repayable quarterly NT\$10,000 thousand.
Less: current portion	<u>(40,000)</u>		
Total	<u>\$110,000</u>		

Long-term loans were not pledged.

(12) Post-employment benefits

Defined contribution plan

The Company adopted a defined contribution plan in accordance with the Labor Pension Act of the R.O.C. Under the Labor Pension Act, the Company will make monthly contributions of no less than 6% of the employees' monthly wages to the employees' individual pension accounts. The Company has made monthly contributions of 6% of each individual employee's salaries or wages to employees' pension accounts.

Expenses under the defined contribution plan for the years ended December 31, 2023 and 2022 are NT\$3,910 thousand and NT\$4,092 thousand, respectively.

Defined benefits plan

The Company adopts a defined benefit plan in accordance with the Labor Standards Act of the R.O.C. The pension benefits are disbursed based on the units of service years and the average salaries in the last month of the service year. Two units per year are awarded for the first 15 years of services while one unit per year is awarded after the completion of the 15th year. The total units shall not exceed 45 units. Under the Labor Standards Act, the Company contributes an amount equivalent to 2% of the employees' total salaries and wages on a monthly basis to the pension fund deposited at the Bank of Taiwan in the name of the administered pension fund committee.

The Ministry of Labor is in charge of establishing and implementing the fund utilization plan in accordance with the Regulations for Revenues, Expenditures, Safeguard and Utilization of the Labor Retirement Fund. The pension fund is invested in-house or under mandate, based on a passive-aggressive investment strategy for long-term profitability. The Ministry of Labor establishes checks and risk management mechanism based on the assessment of risk factors including market risk, credit risk and liquidity risk, in order to maintain adequate manager flexibility to achieve targeted return without over-exposure of risk. With regard to utilization of the pension fund, the minimum earnings in the annual distributions on the final financial statement shall not be less than the earnings attainable from the amounts accrued from two-year time deposits with the interest rates offered by local banks. Treasury Funds can be used to cover the deficits after the approval of the competent authority. As the Company does not participate in the operation and management of the pension fund, no disclosure on the fair

value of the plan assets categorized in different classes could be made in accordance with paragraph 142 of IAS 19. The Group expects to contribute NT\$144 thousand to its defined benefit plan during the 12 months beginning after December 31, 2023.

As of December 31, 2023 and 2022, the maturities of the Company's defined benefit plan are in 2033 and 2032.

Pension costs recognized in profit or loss are as follows:

	For the year ended December 31,	
	2023	2022
Current service costs	\$-	\$102
Net interest of defined benefit liability (asset)	39	66
Total	<u>\$39</u>	<u>\$168</u>

Reconciliation in the defined benefit obligation and fair value of plan assets are as follows:

	As of December 31,	
	2023	2022
Defined benefit obligation	\$9,033	\$8,989
Plan assets at fair value	(6,353)	(6,051)
Other non-current liabilities – net defined benefit liability	<u>\$2,680</u>	<u>\$2,938</u>

Reconciliation of liability (asset) of the defined benefit liability is as follows:

	Present value of defined benefit obligation	Fair value of plan assets	Net defined benefit liability(asset)
1/1/2022	\$17,996	\$(7,976)	\$10,020
Current service cost	102	-	102
Interest cost (income)	117	(51)	66
Total	<u>219</u>	<u>(51)</u>	<u>168</u>
Re-measurement on defined benefit liability/assets:			
Actuarial gain/loss due to change in financial assumptions	(721)	-	(721)
Experience gain/loss	(5,763)	-	(5,763)
Re-measurement on defined benefit assets	-	(612)	(612)
Total	<u>(6,484)</u>	<u>(612)</u>	<u>(7,096)</u>
Benefits paid	(2,742)	2,742	-
Contributions by employer	-	(154)	(154)
12/31/2022	8,989	(6,051)	2,938
Current service cost	-	-	-
Interest cost (income)	120	(81)	39
Total	<u>120</u>	<u>(81)</u>	<u>39</u>
Re-measurement on defined benefit liability/assets:			
Actuarial gain/loss due to change in financial assumptions	123	-	123
Experience gain/loss	(199)	-	(199)
Re-measurement on defined benefit assets	-	(67)	(67)
Total	<u>(76)</u>	<u>(67)</u>	<u>(143)</u>
Benefits paid	-	-	-
Contributions by employer	-	(154)	(154)
12/31/2023	<u>\$9,033</u>	<u>\$ (6,353)</u>	<u>\$2,680</u>

The actuarial assumptions used for the Company's defined benefit plan are shown below.

	As of December 31,	
	2023	2022
Discount rate	1.23%	1.35%
Expected rate of salary increases	2.00%	2.00%

Sensitivity analysis

	For the year ended December 31,			
	2023		2022	
	Increase in defined benefit obligation	Decrease in defined benefit obligation	Increase in defined benefit obligation	Decrease in defined benefit obligation
Discount rate increased by 0.25%	\$-	\$(253)	\$-	\$(260)
Discount rate decreased by 0.25%	262	-	270	-
Expected salary level increased by 0.5%	515	-	539	-
Expected salary level decreased by 0.5%	-	(479)	-	(503)

For the purpose of sensitivity analysis above, the Company calculated the impact on defined benefit obligation due to a reasonable and feasible change of one single assumption (i.e. discount rate or expected salary level) with other assumptions remaining equal. Please note that the sensitivity analysis has its limitation due to the co-relation between different actuarial assumptions and the rarity that only one assumption changes at a time.

The method used in the analysis is consistent for both current and prior years.

(13) Equity

A. Common stock

As of December 31, 2023 and 2022, the Company's authorized capital were NT\$1,200,000 thousand, the Company's paid-in capital were NT\$799,729 thousand, each share at par value of NT\$10, divided into 79,972,945 shares.

B. Capital surplus

	As of December 31,	
	2023	2022
Additional paid-in capital	\$545,978	\$545,978
All changes in interests in subsidiaries	1,172	1,172
Changes in equity of investment accounted for using equity method	1,350	1,350
Other	3,218	3,218
Total	<u>\$551,718</u>	<u>\$551,718</u>

According to Company Act, the capital surplus shall not be used except for making good the deficit of the Company. When a company incurs no loss, it may distribute the capital surplus related to the income derived from the issuance of new shares at a premium or income from endowments received by the company. The distribution could be made in cash or in the form of dividend shares to its shareholders in proportion to the number of shares being held by each of them. Capital surplus related to long-term equity investments cannot be used for any purpose.

C. Appropriation of earnings and dividend policies

(a) Legal reserve

According to the Company Act, legal reserve shall be set aside until such amount equal total authorized capital. Legal reserve can be used to offset deficits. If the Company does not incur any loss, the portion of legal reserve exceeding 25% of the paid-in capital may be distributed to shareholders by issuing new shares or by cash in proportion to the number of shares held by each shareholder.

(b) Special reserve

The FSC issued Order No. Financial-Supervisory-Securities-Corporate-1090150022 on March 31, 2021, which sets out the following provisions for compliance:

On a public company's first-time adoption of the IFRS, for any unrealized revaluation gains and cumulative translation adjustments (gains) recorded to shareholders' equity that the company elects to transfer to retained earnings by application of the exemption under IFRS 1, the company shall set aside special reserve. For any subsequent use, disposal or reclassification of related assets, the company can reverse the special reserve by proportion and transfer to retained earnings.

As of December 31, 2023 and 2022, the Company first-time adoption of T-IFRS NT\$26,375 thousand, respectively.

(c) Earning distribution and dividend policies

(1) Earning distribution

According to the Company's Articles of Incorporations, current year's earnings, if any, shall be distributed in the following order:

- a. Payment of all taxes and dues;
- b. Offsetting prior years' operation losses;
- c. Set aside 10% of the remaining amount after deducting items (a) and (b) as legal reserve;
- d. Set aside or reverse special reserve in accordance with law and regulations; and
- e. The distribution of the remaining portion, if any, will be recommended by the Board of Directors and resolved in the shareholders' meeting. If the preceding paragraph is done in cash, it should authorize the board of directors to resolve and report to the shareholders' meetings.

(2) Dividend policies

The company's dividend policy is in line with the growth characteristics of the technology industry and the overall environment, while taking into account a stable and balanced dividend policy, and taking into account factors such as profitability, financial structure, and future development. If there is a surplus in the final annual accounts and the distributable surplus for the current year reaches 2% of the capital, the dividend distribution should not be less than 10% of the distributable surplus for the year. The distribution of surplus may be made in accordance with the company's

overall capital budget planning. Accordingly, at least 10% of the dividends must be paid in the form of cash.

The Company may issue new shares or cash in accordance with the Company Act 241 in the form of statutory surplus reserve or capital reserve, and if the preceding paragraph is done in cash, it should authorize the board of directors to resolve and report to the shareholders' meeting.

As of December 31, 2023, the Company incurred accumulated losses and therefore had no proposal from the board of directors regarding the distribution of earnings.

The appropriations of earnings for the year 2022 were approved through the shareholders' meetings held on June 9, 2023. The details of the distributions are as follows:

	<u>Appropriation of earnings</u>	<u>Dividend per share</u>
	2022	2022
Legal reserve	\$24,547	
Special reserve	(1,050)	
Cash dividend (Note)	199,932	\$2.5
Total	<u><u>\$223,429</u></u>	

Note: According to the Company's Articles of Incorporations, the appropriations of cash dividend for the year 2022 were approved through the Board of Directors' meeting held on February 21, 2023.

Please refer to Note 6(17) for details on employees' compensation and remuneration to directors and supervisors.

(14) Sales

	<u>For the year ended December 31,</u>	
	<u>2023</u>	<u>2022</u>
Revenue from customer contracts		
Sales of goods	<u><u>\$697,322</u></u>	<u><u>\$1,122,031</u></u>

Analysis of revenue from contracts with customers during the year ended December 31, 2023 and 2022 are as follows:

A. Disaggregation of revenue

	<u>For the year ended December 31,</u>	
	<u>2023</u>	<u>2022</u>
Sales of goods-single department	<u>\$697,322</u>	<u>\$1,122,031</u>
The timing for revenue recognition:		
At a point in time	<u>\$697,322</u>	<u>\$1,122,031</u>

B. Contract balances

(a) Contract liabilities – current

	<u>As of December 31,</u>	
	<u>2023</u>	<u>2022</u>
Sales of goods	<u>\$1,075</u>	<u>\$2,139</u>

The significant changes in the Company's balances of contract liabilities for the year periods ended December 31, 2023 and 2022 are as follows:

	<u>For the year ended December 31,</u>	
	<u>2023</u>	<u>2022</u>
The opening balance transferred to revenue	\$(2,139)	\$(8,646)
Increase in receipts in advance during the period (excluding the amount incurred and transferred to revenue during the period)	1,075	714

C. Assets recognized from costs to fulfil a contract

None.

(15) Expected credit losses (gains)

	For the year ended December 31,	
	2023	2022
Operating expenses – Expected credit losses / (gains)		
Accounts receivable	\$-	\$-

Please refer to Note 12 for more details on credit risk.

The Company measures the loss allowance of its contract assets and accounts receivable (including notes receivable and accounts receivable) at an amount equal to lifetime expected credit losses. The assessment of the Company's loss allowance as of December 31, 2023 and 2022 are as follows:

The Company considers the grouping of accounts receivable by counter-parties' credit rating, by geographical region and by industry sector and its loss allowance is measured by using a provision matrix. Details are as follows:

December 31, 2023	Not past due	Past due					Total
		<=30 days	31-90 days	91-120 days	121-270 days	>=271 days	
Gross carrying amount	\$127,670	\$7,988	\$-	\$-	\$-	\$-	\$135,658
Loss ratio	-%	2%	-%	-%	-%	-%	
Lifetime expected credit losses	-	(126)	-	-	-	-	(126)
Carrying amount of accounts receivable	\$127,670	\$7,862	\$-	\$-	\$-	\$-	\$135,532
December 31, 2022							
December 31, 2022	Not past due	Past due					Total
		<=30 days	31-90 days	91-120 days	121-270 days	>=271 days	
Gross carrying amount	\$145,294	\$6,485	\$10,063	\$5,992	\$212	\$-	\$168,046
Loss ratio	-%	-%	-%	-%	100%	-%	
Lifetime expected credit losses	-	-	-	(126)	(212)	-	(338)
Carrying amount of accounts receivable	\$145,294	\$6,485	\$10,063	\$5,866	\$-	\$-	\$167,708

The movement in the provision for impairment of notes receivable, and accounts receivable during the years ended December 31, 2023 and 2022 are as follows:

	<u>Accounts receivable</u>
Beginning balance as of January 1, 2023	\$338
Addition/(reversal) for the current period	-
Overdue receivables transferred to loss allowance	<u>(212)</u>
Ending balance as of December 31, 2023	<u><u>\$126</u></u>
Beginning balance as of January 1, 2022	\$538
Addition/(reversal) for the current period	-
Overdue receivables transferred to loss allowance	<u>(200)</u>
Ending balance as of December 31, 2022	<u><u>\$338</u></u>

(16) Leases

Company as a lessee

The Company leases various properties, including real estate such as buildings and transportation equipment. The lease terms range from 2 to 5 years.

The Company's leases effect on the financial position, financial performance and cash flows are as follows:

A. Amounts recognized in the balance sheet

a. Right-of-use assets

	<u>As of December 31,</u>	
	<u>2023</u>	<u>2022</u>
Buildings	<u>\$2,114</u>	<u>\$216</u>

b. Lease liabilities

	As of December 31,	
	2023	2022
Lease liabilities	\$2,130	\$227
Current	\$988	\$227
Non-current	\$1,142	\$-

Please refer to Note 6 (18)(4) for the interest on lease liabilities recognized during the years ended December 31, 2023 and 2022 and refer to Note 12 (5) Liquidity Risk Management for the maturity analysis for lease liabilities as at December 31, 2023 and 2022.

B. Amounts recognized in the income statement

Right-of-use assets

	For the year ended December 31,	
	2023	2022
Buildings	\$960	\$3,669
Transportation equipment	-	159
Total	\$960	\$3,828

C. Income and costs relating to leasing activities

	For the year ended December 31,	
	2023	2022
The expenses relating to short-term leases	\$993	\$143
The expenses relating to leases of low-value assets-non-current	-	464

The portfolio of short-term leases of the Company to which it is committed at the end of the reporting period is dissimilar to the portfolio of short-term leases to which the short-term lease expenses disclosed above, and the amount of its lease commitments is NT\$0.

D. Cash outflow relating to leasing activities

During the year ended December 31, 2023 and 2022, the Company's total cash outflow for leases amounting to NT\$1,986 thousand and NT\$4,618 thousand, respectively.

(17) Summary statement of employee benefits, depreciation and amortization by function is as follows:

Function Nature	2023			2022		
	Cost of goods sold	Operating expense	Total	Cost of goods sold	Operating expense	Total
Employee benefit						
Salaries & wages	\$-	\$67,105	\$67,105	\$-	\$ 75,425	\$ 75,425
Labor and health insurance	-	6,892	6,892	-	7,191	7,191
Pension	-	3,949	3,949	-	4,260	4,260
Directors' remuneration	-	4,255	4,255	-	6,438	6,438
Other employee benefit	-	15,910	15,910	-	33,210	33,210
Depreciation	3,173	6,572	9,745	5,300	9,785	15,085
Amortization	-	1,534	1,534	-	1,172	1,172

A : The headcounts of the Company amounted to 71 and 75, respectively, during the years ended December 31, 2023 and 2022. Among the Company's directors, there were 6 and 6 who were not the employees, respectively.

B : Companies who have been listed on Taiwan Stock Exchange or Taiwan Over – The Counter Securities Exchange should disclose the following information:

- (a) Average employee benefits of 2023 and 2022 are NT\$1,322 thousand and NT\$1,599 thousand, respectively.
- (b) Average salaries of 2023 and 2022 are NT\$945 thousand and NT\$1,005 thousand, respectively.
- (c) Change in average salaries are (6.02)%.
- (d) In accordance with the regulations, the Company has established an audit committee to replace the supervisor, so the supervisor's remuneration has not been recognized.

(e) The salary and remuneration policy of the Company:

Board of Directors and managers' salaries are referred to the industry standards, and the bonuses are allocated according to their performance, risk taking and level of contribution, etc. Employees' salaries are based on their academic background, professional knowledge, years of experience, and their KPI. Employees' annual salaries are also adjusted based on Company's condition to motivate and retain outstanding employees.

C : According to the resolution, not lower than 5% of profit of the current year is distributable as employees' compensation and no higher than 3% of profit of the current year is distributable as remuneration to directors and supervisors. However, the Company's accumulated losses shall have been covered. The aforementioned employees' compensation will be distributed in shares or cash. The employees who fulfill specific requirements may be granted such compensation.

According to the resolution, 5%~20% of profit of the current year is distributable as employees' compensation and no higher than 1% of profit of the current year is distributable as remuneration to directors and supervisors. However, the Company's accumulated losses shall have been covered. The Company may have the profit distributable as employees' compensation in the form of shares or in cash; and in addition thereto a report of such distribution is submitted to the shareholders' meeting. Information on the Board of Directors' resolution regarding the employees' compensation and remuneration to directors and supervisors can be obtained from the "Market Observation Post System" on the website of the TWSE.

The Company estimated the amounts of the employees' compensation and remuneration to directors and supervisors for the year ended December 31, 2022 to be not lower than 6% and not higher than 0.75% of profit of the current period, respectively, recognized as employee benefits expense. As such, employees' compensation and remuneration to directors and supervisors for the year ended December 31, 2022 amounted to NT\$17,253 thousand and NT\$2,157 thousand, respectively. The employees' compensation and remuneration to directors and supervisors were recognized as salaries.

The board of directors of the company resolved to pay the employees' compensation and remuneration to directors and supervisors amount NT\$17,253 thousand and NT\$2,157 thousand respectively on February 21, 2023.

For the year ended December 31, 2023, the Company incurred accumulated loss and therefore did not accrue the employees' compensation and remuneration to directors.

(18) Non-operating incomes and expenses

A. Interest incomes

	<u>For the year ended December 31,</u>	
	<u>2023</u>	<u>2022</u>

Remeasurements of defined benefits plan	\$7,096	\$-	\$7,096	\$-	\$7,096
Unrealised gain (losses) on valuation of financial assets at fair value through OCI	(1,022)	-	(1,022)	-	(1,022)
<u>May be reclassified to profit or loss in subsequent period:</u>					
Exchange differences arising on translation of foreign operations	7,708	-	7,708	-	7,708
Total OCI	<u>\$13,782</u>	<u>\$-</u>	<u>\$13,782</u>	<u>\$-</u>	<u>\$13,782</u>

(20) Income tax

The major components of income tax expense (benefit) are as follows:

Income tax expense (benefit) recognized in profit or loss

	For the year ended December 31,	
	2023	2022
Current income tax expense (benefit):		
Current income tax expense	\$-	\$18,664
Adjustments in respect of current income tax of prior periods	(318)	(2,675)
Surtax on undistributed earnings	-	980
Land value increment tax	-	169
Deferred tax expense (benefit):		
Deferred tax expense (benefit) relating to origination and reversal of temporary differences	(1,064)	1,771
Total income tax expense (benefit)	<u><u>\$(1,382)</u></u>	<u><u>\$18,909</u></u>

A reconciliation between tax expense and the product of accounting profit multiplied by applicable tax rates is as follows:

	<u>For the year ended December 31,</u>	
	<u>2023</u>	<u>2022</u>
Accounting profit (loss) before tax from continuing operations	<u>\$(84,832)</u>	<u>\$268,144</u>
Tax payable at the enacted tax rates	\$(16,966)	\$53,629
Tax effect of expenses not deductible for tax purposes	4,634	(35,464)
Tax effect of deferred tax assets/liabilities	11,268	2,270
Adjustments in respect of current income tax of prior periods	(318)	(2,675)
Land value increment tax	-	169
Surtax on undistributed earnings	-	980
Total income tax recognized in profit or loss	<u>\$(1,382)</u>	<u>\$18,909</u>

Deferred tax assets (liabilities) relate to the following.

For the year ended December 31, 2023

	Beginning balance as of January 1, 2023	Deferred tax income (expense) recognized in profit or loss	Ending balance as of December 31, 2023
Temporary differences			
Allowance for inventory valuation and obsolescence losses	\$897	\$210	\$1,107
Bad debts loss	878	64	942
Unrealized exchange loss (gain)	275	973	1,248
Impairment loss on assets	521	-	521
Realized financial assets measured at fair value through profit or loss	(452)	(183)	(635)
Provisions of employee benefit obligations	242	-	242
Deferred tax income/ (expense)		<u>\$(1,064)</u>	
Net deferred tax assets/(liabilities)	<u>\$2,361</u>		<u>\$3,425</u>
Reflected in balance sheet as follows:			
Deferred tax assets	<u>\$2,813</u>		<u>\$4,060</u>
Deferred tax liabilities	<u>\$(452)</u>		<u>\$(635)</u>

For the year ended December 31, 2022

	Beginning balance as of January 1, 2022	Deferred tax income (expense) recognized in profit or loss	Ending balance as of December 31, 2022
Temporary differences			
Allowance for inventory valuation and obsolescence losses	\$637	\$260	\$897
Bad debts loss	562	316	878
Unrealized exchange loss (gain)	15	260	275
Impairment loss on assets	2,773	(2,252)	521
Realized financial assets measured at fair value through profit or loss	(97)	(355)	(452)
Provisions of employee benefit obligations	242	-	242
Deferred tax income/ (expense)		\$(1,771)	
Net deferred tax assets/(liabilities)	\$4,132		\$2,361
Reflected in balance sheet as follows:			
Deferred tax assets	\$4,229		\$2,813
Deferred tax liabilities	\$(97)		\$(452)

The following table contains information of the unused tax losses of the Group:

Occurrence year	Accumulated net operating loss	Unused balance		Expiration Year
		As of December 31, 2023	2022	
2023(expect)	\$3,700	\$3,700	\$-	2028

Unrecognized deferred tax assets

As of December 31, 2023 and 2022, deferred tax assets that have not been recognized as they may not be used to offset future taxable income amounted to NT\$51,321 thousand and NT\$40,052 thousand, respectively.

The assessment of income tax return

As of December 31, 2023, the tax assessments on the Company's tax filings have been approved up to the year of 2021.

(21) Earnings per share

Basic earnings per share is calculated by dividing net profit for the year attributable to the common shareholders of the parent entity by the weighted average number of common shares outstanding during the year.

A. Basic earnings per share

	For the year ended December 31,	
	2023	2022
Net income available to common shareholders of the parent	<u>\$(83,450)</u>	<u>\$249,235</u>
Weighted average number of common shares outstanding (in thousand shares)	<u>79,973</u>	<u>79,973</u>
Basic earnings per share (in NT\$)	<u>\$(1.04)</u>	<u>\$3.12</u>

B. Diluted earnings per share

	For the year ended December 31,	
	2023	2022
Net income available to common shareholders of the parent	\$(83,450)	\$249,235
Net income available to common shareholders of the parent after dilution	\$(83,450)	\$249,235
Weighted average number of common shares outstanding (in thousand shares)	79,973	79,973
Effect of dilution:		
Employee bonus (compensation) – stock (in thousand shares)	-	560
Weighted average number of common shares outstanding after dilution (in thousand shares)	79,973	80,533
Diluted earnings per share (in NT\$)	\$(1.04)	\$3.09

No other transactions that would significantly change the outstanding common shares or potential common shares incurred during the period after reporting date and up to the approval date of financial statements.

7. RELATED PARTY TRANSACTIONS

A. Deal with related parties as of the end of the reporting period

Related parties and Relationship

Related parties	Relationship
Qisda Corporation	Parent company
Simula Technology Corporation	Subsidiary
Action Star Technology Co., Ltd.	Subsidiary

(1) Categories of financial instruments

Financial assets

	As of December 31,	
	2023	2022
Financial assets at fair value through profit or loss:		
Mandatorily measured at fair value through P/L	\$3,183	\$2,361
Financial assets at fair value through OCI	3,858	3,858
Financial assets measured at amortized cost (Note)	283,401	449,716
Total	<u>\$290,442</u>	<u>\$455,935</u>

Financial liabilities

	As of December 31,	
	2023	2022
Financial liabilities at fair value through profit or loss:		
Mandatorily measured at fair value through P/L	\$7	\$102
Financial liabilities measured at amortized cost:		
Payables (include related parties)	123,825	159,477
Long-term loans (including current portion with maturity less than 1 year)	110,000	150,000
Lease liabilities	2,130	227
Total	<u>\$235,962</u>	<u>\$309,806</u>

Note: Including cash and cash equivalents, accounts receivable, accounts receivable-related parties, other receivables and other receivables-related parties.

(2) Objectives and policies of financial risk management

The Company's principal financial risk management objective is to manage the market risk, credit risk and liquidity risk related to its operating activities. The Company identifies, measures, and manages the aforementioned risks based on its policy and risk preferences.

The Company has established appropriate policies, procedures and internal controls for financial risk management. Before entering into significant transactions, due approval process by the Board of Directors and Audit Committee must be carried out based on related protocols and internal control procedures. The Company complies with its financial risk management policies at all times.

(3) Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of the changes in market prices. Market risk comprises currency risk, interest rate risk and other price risk (e.g. equity instruments).

In practice, it is rarely the case that a single risk variable will change independently from other risk variables. There are usually interdependencies between risk variables. However, the sensitivity analysis disclosed below does not take into account the interdependencies between risk variables.

Foreign currency risk

The Company's exposure to foreign currency risk relates primarily to the Company's operating activities (when revenue or expense are denominated in a different currency from the Company's functional currency) and the Company's net investments in foreign operations.

The Company has certain foreign currency receivables denominated in the same foreign currency as certain foreign currency payables, therefore natural hedge is achieved. Thus, hedge accounting is not adopted.

The foreign currency sensitivity analysis of the possible change in foreign exchange rates on the Company's profit/loss and equity is performed on significant monetary items denominated in foreign currencies as of the reporting period-end. The Company's foreign currency risk is mainly related to volatility in the exchange rates of US dollars. It is stated as follows:

If NT dollars appreciates/depreciates against US dollars by 1%, the net income (loss) for the years ended December 31, 2023 and 2022 would decrease/increase by NT\$1,686 thousand and NT\$1,726 thousand, respectively.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to interest rate risk relates primarily to the Company's investments with variable interest rates and loans with fixed and variable interest rates, which are all categorized as loans and receivables.

The interest rate sensitivity analysis is performed on items exposed to interest rate risk as of the end of the reporting period and presumed to be held for one accounting year, including investments and loans with variable interest rates. If interest rate increases/decreases by 1%, the net income (loss) for the years ended December 31, 2023 and 2022 would decrease/increase by NT\$3 thousand and NT\$95 thousand, respectively.

Equity price risk

The fair value of the Company's unlisted equity securities are susceptible to market price risk arising from uncertainties about future values of the investment securities. The Company's unlisted equity securities are classified under financial assets measured at fair value through other comprehensive income. The Company manages the equity price risk through diversification and placing limits on individual and total equity instruments. Reports on the equity portfolio are submitted to the Company's senior management on a regular basis. The Company's Board of Directors reviews and approves all equity investment decisions.

Please refer to Note 12(9) for sensitivity analysis information of other equity instruments or derivatives that are linked to such equity instruments whose fair value measurement is categorized under Level 1.

(4) Credit risk management

Credit risk is the risk that counterparty will not meet its obligations under a contract and result in a financial loss. The Company is exposed to credit risk from operating activities (primarily for accounts and notes receivable) and financing activities (primarily for bank deposits and other financial instruments).

Customer credit risk is managed by each business unit subject to the Company's established policy, procedures and control relating to customer credit risk management. Credit risk of all customers are assessed based on a comprehensive review of the customers' financial status, credit ratings from credit institutions, past transactions, current economic conditions and the Company's internal credit ratings. The Company also employs some credit enhancement instruments (e.g. prepayment or insurance) to reduce certain customers' credit risk.

As of December 31, 2023 and 2022, receivables from the top ten customers were accounted for 73.13% and 77.63% of the Company's total accounts receivable, respectively. The concentration of credit risk is relatively not significant for the remaining receivables.

Credit risk from balances with banks, fixed-income securities and other financial instruments is managed by the Company's finance division in accordance with the Company's policy. The counterparties that the Company transacts with are determined by internal control procedures. They are banks with fine credit ratings and financial institutions, corporate and government agencies with investment-grade credit ratings. Thus, there is no significant default risk. Consequently, there is no significant credit risk for these counter parties.

(5) Liquidity risk management

The Company maintains financial flexibility through the use of cash and cash equivalents, highly-liquid marketable securities, bank loans, etc. The table below summarizes the maturity profile of the Company's financial liabilities based on the contractual undiscounted payments and contractual maturity. The payment amount includes the contractual interest. The undiscounted interest payment relating to borrowings with variable interest rates is extrapolated based on the estimated yield curve as of the end of the reporting period.

Non-derivative financial instruments

	Less than 1 year	1 to 2 years	2 to 3 years	More than 3 years	Total
<u>As of December 31, 2023</u>					
Payables	\$123,825	\$-	\$-	\$-	\$123,825
Lease liabilities	1,020	930	225	-	2,175
Loans	41,711	40,911	30,158	-	112,780
<u>As of December 31, 2022</u>					
Payables	\$159,477	\$-	\$-	\$-	\$159,477
Lease liabilities	228	-	-	-	228
Loans	42,352	41,604	40,854	30,149	154,959

(6) Movement schedule of liabilities arising from financing activities

Movement schedule of liabilities for the year ended December 31, 2023:

	Long-term borrowings	Lease liabilities	Total liabilities from financing activities
As of January 1, 2023	\$150,000	\$227	\$150,227
Cash flows	(40,000)	(993)	(40,993)
Non-cash changes	-	2,896	2,896
As of December 31, 2023	\$110,000	\$2,130	\$112,130

Movement schedule of liabilities for the year ended December 31, 2022:

	Short-term borrowings	Long-term borrowings	Lease liabilities	Total liabilities from financing activities
As of January 1, 2022	\$106,880	\$190,000	\$5,364	\$302,244
Cash flows	(106,880)	(40,000)	(4,011)	(150,891)
Non-cash changes	-	-	(1,126)	(1,126)
As of December 31, 2022	\$-	\$150,000	\$227	\$150,227

(7) Fair values of financial instruments

A. The evaluation methods and assumptions applied in determining the fair value

Fair value is the price that would be received to sell a financial asset or paid to transfer a financial liability in an orderly transaction between willing market participants (not under coercion or liquidation). The following methods and assumptions are used by the Company in estimating the fair values of financial assets and liabilities:

- (a) The carrying amount of cash and cash equivalents, receivables, payables and other current liabilities approximate their fair value due to their short maturity terms.

- (b) Fair value of equity instruments without market quotations (including private placement of listed equity securities, unquoted public company and private company equity securities) are estimated using the market method valuation techniques based on parameters such as prices based on market transactions of equity instruments of identical or comparable entities and other relevant information (for example, inputs such as discount for lack of marketability, P/E ratio of similar entities and Price-Book ratio of similar entities).

- (c) Fair value of debt instruments without market quotations, bank loans, bonds payable and other non-current liabilities are determined based on the counterparty prices or valuation method. The valuation method uses DCF method as a basis, and the assumptions such as the interest rate and discount rate are primarily based on relevant information of similar instrument (such as yield curves published by the Taiwan Over-The-Counter Securities Exchanges, average prices for Fixed Rate Commercial Paper published by Reuters and credit risk, etc.)

B. Fair value of financial instruments measured at amortized cost

The carrying amount of the Company's financial assets and liabilities measure at amortized cost approximates their fair value.

C. Fair value measurement hierarchy for financial instruments

Please refer to Note 12(9) for Fair value measurement hierarchy for financial instruments of the Company.

(8) Derivative financial instruments

The Company's derivative financial instruments include forward currency contracts and embedded derivatives. The related information for derivative financial instruments not qualified for hedge accounting and not yet settled as at December 31 2023 and 2022 is as follows:

Forward currency contracts

The Company entered into forward currency contracts to manage its exposure to financial risk, but these contracts are not designated as hedging instruments. The table below lists the information related to forward currency contracts:

<u>Items (by contract)</u>	<u>Notional Amount</u>	<u>Contract Period</u>
As of December 31, 2023		
Forward currency contract	Sell foreign currency USD 4,941	2023.10.26 ~ 2024.04.30
As of December 31, 2022		
Forward currency contract	Sell foreign currency USD 5,025	2022.09.29 ~ 2023.03.31

(9) Fair value measurement hierarchy

A. Fair value measurement hierarchy

All asset and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, based on the lowest level input that is significant to the fair value measurement as a whole. Level 1, 2 and 3 inputs are described as follows:

Level 1 – Quoted (unadjusted) market prices in active markets for identical assets or liabilities that the entity can access at the measurement date

Level 2 – Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly

Level 3 – Unobservable inputs for the asset or liability

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Company determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorization at the end of each reporting period.

B. Fair value measurement hierarchy of the Company's assets and liabilities

The Company does not have assets that are measured at fair value on a non-recurring basis. Fair value measurement hierarchy of the Company's assets and liabilities measured at fair value on a recurring basis is as follows.

As of December 31, 2023

	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
<u>Financial assets:</u>				
Financial assets at fair value through profit or loss				
Forward currency contract	\$-	\$3,183	\$-	\$3,183
Financial assets at fair value through other comprehensive income				
	\$-	\$-	\$3,858	\$3,858
<u>Financial liabilities:</u>				
Financial liabilities at fair value through profit or loss				
Forward currency contract	\$-	\$7	\$-	\$7

As of December 31, 2022

	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
<u>Financial assets:</u>				
Financial assets at fair value through profit or loss				
Forward currency contract	\$-	\$2,361	\$-	\$2,361
Financial assets at fair value through other comprehensive income				
	\$-	\$-	\$3,858	\$3,858
<u>Financial liabilities:</u>				
Financial liabilities at fair value through profit or loss				
Forward currency contract	\$-	\$102	\$-	\$102

Transfers between Level 1 and Level 2 during the period

For the year ended December 31, 2023 and 2022, there were no transfers between Level 1 and Level 2 fair value hierarchy.

Reconciliation for fair value measurements in Level 3 of the fair value hierarchy for movements during the period is as follows:

For the year ended December 31, 2023 was no transfers in Level 3 hierarchy.

Reconciliation for fair value measurements in Level 3 of the fair value hierarchy for movements during the year ended December 31 2022, is as follows:

	<u>Assets</u>
	<u>At fair value through other comprehensive income</u>
Beginning balances as of January 1, 2022	\$4,880
Amount recognized in gains/losses (report on other comprehensive income)	(1,022)
Ending balances as of December 31, 2022	\$3,858

Information on significant unobservable inputs to valuation in Level hierarchy

Description of significant unobservable inputs to valuation of recurring fair value measurements categorized within Level 3 of the fair value hierarchy are as below:

As of December 31, 2023

	Valuation techniques	Significant unobservable inputs	Quantitative information	Relationship between inputs and fair value	Sensitivity of the input to fair value
Financial assets:					
At fair value through OCI					
Stock	Market approach	Discount for lack of marketability	30%	The higher the discount for lack of marketability, the lower the fair value of the stocks	1% increase (decrease) in the discount for lack of marketability would result in decrease (increase) in the Group's equity by NT\$19 thousand

As of December 31, 2022

	Valuation techniques	Significant unobservable inputs	Quantitative information	Relationship between inputs and fair value	Sensitivity of the input to fair value
Financial assets:					
At fair value through OCI					
Stock	Market approach	Discount for lack of marketability	30%	The higher the discount for lack of marketability, the lower the fair value of the stocks	1% increase (decrease) in the discount for lack of marketability would result in decrease (increase) in the Group's equity by NT\$37 thousand

(10) Significant financial assets and liabilities denominated in foreign currencies

Information regarding the Company's significant financial assets and liabilities denominated in foreign currencies was listed below: (In Thousands)

	<u>As of December 31, 2023</u>		
	<u>Foreign currencies</u>	<u>Foreign exchange rate</u>	<u>NTD</u>
<u>Financial assets</u>			
Monetary items:
